Social Change In A Metropolitan Community:

Social Change in a Metropolitan Community Otis Dudley Duncan, Beverly Duncan, Howard Schuman, 1974-05-06 How has American society changed over the last fifteen years Do we raise our children differently now than in 1953 Has women's liberation produced a shift in attitudes toward marriage or altered our idea about appropriate activities for women Have our attitudes toward race undergone a significant revision In this challenging volume three eminent sociologists examine questions like these in the light of hard data which have become available year by year over the last two decades The major purpose of the book is to demonstrate how measures of social change can be developed capitalizing on past efforts in survey research An omnibus survey carried out in 1971 was designed almost entirely as a selective repetition of questions originally asked in the 1950s It provides precise and reliable measures of change in such areas as marital and sex roles social participation child rearing religious behavior political orientations and racial attitudes Lucid and authoritative *Social Change in a Metropolitan Community* presents a unique body of information on changes in public opinion social norms and institutional behavior Its large number of statistical measurements are presented in an extremely accessible form almost always as simple percentage comparisons The research findings included here are unduplicated by any other study and as a source of information on current social trends they provide fascinating reading for anyone who wishes to enlarge his understanding of the temper of our times

Social Change and Politics Morris Janowitz, 2017-07-05 This classic study deals with social control in advanced industrial society especially the United States and particularly the half century after World War I The United States is representative of Western advanced industrial nations that have been faced with marked strain in their political institutions These nation states have been experiencing a decline in popular confidence and distrust of the political process an absence of decisive legislative majorities and an increased inability to govern effectively that is to balance and to contain competing interest group demands and resolve political conflicts Janowitz uses the sociological idea of social control to explore the sources of these political dilemmas Social control does not imply coercion or the repression of the individual by societal institutions Social control is rather the face of coercive control It refers to the capacity of a social group including a whole society to regulate itself Self regulation implies a set of higher moral principles beyond those of self interest Since the end of World War II the expanded scope of empirical research has profoundly transformed the sociological discipline The repeated efforts to achieve a theoretical reformulation have left a positive residue but there have been no new conceptual breakthroughs that are compelling This book is a concerted and detailed effort organize and to make sense out of the vastly increased body of empirical research

The Metropolitan Community Cynthia Taines, 2025-06-30 In metropolitan areas across the United States city and suburban public school students receive grossly unequal funding Since funding is critical to student success this means the primarily Black Latinx and low income students attending city schools are being denied an equal education So entrenched is this system that it can feel normal or too big to undo Yet recent student activism

in the form of an innovative cross community school partnership offers new hope The Metropolitan Community Partnering for Equality Across the Educational Divide tells the story of two Chicago area schools one suburban one urban whose students come together to examine the disparities between their schools and advocate for change It follows these students over a year as they meet tour each other s schools wrestle with how to discuss unfairness and ultimately commit to fighting together for a more equal education In depth interviews and detailed observations chronicle the students advocacy which unfolds in conversation with teachers and administrators and eventually brings them to the table with legislators from whom they demand better policies Through the examples set by students readers are invited to develop their own metro outlook to see how our seemingly separate worlds are connected by the educational system we hold in common and must work together to reshape The first book to depict sustained allyship between city and suburban students The Metropolitan Community offers an invigorating pedagogical approach organizational model and political strategy for achieving educational justice through youth led partnerships and collaboration Perfect for courses such as School and Society Curriculum and Instruction Diversity and Equity in Education Socio cultural Foundations Educational Policy Culturally Relevant Pedagogy Sociology of Education Urban Education Social Studies Methods Multicultural Education Anthropology of Education School Counseling School Psychology and School Social Work **The Quality of American Life** Angus Campbell, Philip E. Converse, Willard L.

Rodgers, 1976-03-25 Considers how Americans define the quality of their life experiences as expressed in their perceptions evaluations and satisfactions Based on research conducted by the Institute for Social Research at the University of Michigan the book uses data which are representative of the national population eighteen years of age and older and employs the major social characteristics of class age education and income The authors cover such topics as the residential environment the experience of work marriage and family life and personal resources and competence They also report on the situation of women and the quality of the life experience of black people Social Indicator Models Kenneth C. Land, Seymour

Spilerman, 1975-02-14 Deals in comprehensive fashion with a diverse array of objective and subjective social indicators and shows how these indicators can be used potentially to inform and perhaps guide social policy Written with clarity and authority it will be of paramount interest to those concerned with the interpretation and analysis of social indicators and to those interested in their use For the former it serves as an illuminating introduction to some of the analytical tasks that lie ahead in the study of social indicators For the latter it provides a solid foundation upon which future policy analysis may be based Proceedings, American Philosophical Society (vol. 119, No. 6, 1975) , Historical Social Psychology Kenneth Gergen, Mary Gergen, 2014-01-27 The vast majority of research in social psychology focuses on momentary events an attitude is changed dissonance is reduced a cognition is primed and so on Little attention is paid to the unfolding of events over time to social life as an ongoing process in which events are related in various ways as life unfolds Originally published in 1984 Historical Social Psychology opens a space for theory and research in which temporal process is central Contributors to

this broad ranging work provide a rich range of perspectives from the theoretical to the methodological from micro sequences to the life span and from contemporary history to the long dur e Together these authors set the stage for a major shift in the focus of social psychological inquiry *Love in America* Francesca M. Cancian,1990-08-31 In the last twenty five years Americans have gained considerable freedom in thier personal lives Relationships are now more flexible and self development has become a primary goal for both men and women Most scholars have criticized this trend to greater freedom arguing that it undermines family bonds and promotes selfishness and extreme independence Francesca Cancian is more optimistic In this book she shows that many American couples succeed in combining self development with commitment and that interdependence not independence is their ideal In interdependent relationships love and self development do not conflict but reinforce each other Love in America compares traditional forms of marriage with these newer forms of close relationships Starting with the nineteenth century Cancian shows how gender roles became polarized with love which was identified with emotional expression no practical help being the responsibility of women while self development was regarded as a masculine concern These traditional images of love and relationships are still held by many Americans today even though as Cancian points out this can lead to marital conflict and individual stress and illness By contrast new images of love emphasizing self development for men and women and flexible androgynous roles began to emerge around 1900 accelerating in the 1960s She concludes that this trend to self development and androgyny will continue but that whether it will lead to more interdependent relationships or to more independence and isolation depends partly on economic and political changes in the wider society The evidence for Cancian s argument comes from sociological historical and psychological sources Her book will interest readers in these disciplines as well s appeal to a wide general audience

necessary in understanding the functioning of today's world Private Pleasure, Public Plight David Popenoe, A social and cultural analysis of community life in metropolitan areas of the USA Sweden and England The author focuses on how environment and culture interact to shape human behaviour Despite their similarities the three societies vary widely offering opportunities to compare and contrast Evolving Households Jeremy Greenwood, 2019-01-29 The transformative effect of technological change on households and culture seen from a macroeconomic perspective through simple economic models In Evolving Households Jeremy Greenwood argues that technological progress has had as significant an effect on households as it had on industry Taking a macroeconomic perspective Greenwood develops simple economic models to study such phenomena as the rise in married female labor force participation changes in fertility rates the decline in marriage and increased longevity These trends represent a dramatic transformation in everyday life and they were made possible by advancements in technology Greenwood also addresses how technological progress can cause social change Greenwood shows for example how electricity and labor saving appliances freed women from full time household drudgery and enabled them to enter the labor market He explains that fertility dropped when higher wages increased the opportunity cost of having children he attributes the post World War II baby boom to a combination of labor saving household technology and advances in obstetrics and pediatrics Marriage rates declined when single households became more economically feasible people could be more discriminating in their choice of a mate Technological progress also affects social and cultural norms Innovation in contraception ushered in a sexual revolution Labor saving technological progress at home together with mechanization in industry that led to an increase in the value of brain relative to brawn for jobs fostered the advancement of women's rights in the workplace Finally Greenwood attributes increased longevity to advances in medical technology and rising living standards and he examines healthcare spending the development of new drugs and the growing portion of life now spent in retirement **Religious Assortative Marriage** Robert Alan Johnson, 2013-10-22 Religious Assortative Marriage in the United States aims to formulate and apply to American religious data macrosociological models of assortative marriage in pluralistic populations These models postulate that the factors determining assortative marriage are population structure social divisions and norms of endogamy An important application of these models is to counter the ideological assumption implicit in the popular image of a melting pot of nations that the amalgamation of groups in the marriage market is the inevitable outcome of a historical plan of assimilation The book begins by establishing a demographic framework by embedding assortative marriage in a broader model of the replacement of religious composition This is followed by separate chapters on specialized theories concerned with the social determinants of assortative marriage available religious marital selection data in the United States and regional residential and cohort differentials in assortative marriage The final chapter discusses how the general marriage market model that is sufficiently flexible to be broadly applicable to diverse structures of religious or other assortative marriage can be mathematically manipulated to generate laws of social statics and dynamics

Theories & Methods in Rural Community Studies H. Mendras, I. Mihailescu, 2013-10-22 This volume is the result of an international comparative research project entitled The Future of Rural Communities in Industrialized Societies The presentation of national studies led to discussions on the methods of local studies on their theoretical basis and on their scientific and practical use It is these discussions which are featured in this book The national studies themselves are now published by Pergamon Press in volumes I and II of Rural Community Studies in Europe with a third volume to come

Changing and Unchanging Face of United States Civil Society Marcella Ridlen Ray, Ray has written a book that should be read by anyone interested in the current debates about the general health of civil society in the United States American Journal of Sociology The formation maintenance and well being of American civil society is a topic of intense debate in the social sciences Until now this debate has lacked rigor with the term civil society commonly used interchangeably and imprecisely with other terms such as civic engagement Today's discourse also lacks methodological discipline and relies too heavily on narrowly selected evidence in support of a particular argument In this invaluable contribution to the debate Marcella Ridlen Ray supplies an empirical study based on a theoretical model of democratic civil society one that posits high levels of communication diversity autonomy mediation and voluntary association In Ray's account the emergent story of U S civil society is that of a dynamic institution not necessarily one that is linear in its progression It is a tale of flux resilience and stability over the long term that is consistent with subtexts on political equilibrium she notes in the work of early political analysts such as Aristotle Machiavelli Locke Burke and later Tocqueville Ray dispels the widely accepted myth that Americans are increasingly apathetic and withdrawn from common interests The evidence reveals a persistence of long standing public spiritedness despite the fact that individuals use wider discretion in deciding if and how to attach to community and despite a historical lack of enthusiasm for performing civic duties in lieu of more pleasurable leisure activity This public spiritedness continues to reflect embedded religious cultural values that disproportionately influence how and when people dedicate time and money to associational life U S civil society has grown more inclusive and democratic as Americans venture at growing rates across differences in perspective ideas beliefs and experience to form diverse networks of interest association and community No longer confined to an immediate or local area the social space of Americans now incorporates national international and cyber spatial dimensions Social connectedness is extensive due to the expansion of social space and the multiplication of weak social ties that transcend geographic and spatial boundaries Ray's theoretical model gives form and coherence to her massive compilation of quantitative and qualitative data She uses this to improve the visibility of civil society an institution essential to democracy itself This volume provides the basis for a systematic evaluation of a major American institution as well as a framework for comparison with other Western democracies Marcella Ridlen Ray is senior fellow School of Public Policy and adjunct professor in Sociology and Anthropology at George Mason University in Fairfax Virginia

Developments in American Sociological Theory, 1915-1950 Roscoe C.

Hinkle,1994-01-01 This book presents a comprehensive extended and systematic analysis of social theory as it developed between the two World Wars a period during which major transformation occurred Centering on the continuities on the one hand and discontinuities on the other in substantive theory it deals with the major ideas of Cooley Ellwood Park Thomas Ogburn Bernard Chapin Mead Faris Hankins MacIver Reuter Lundberg H P Becker Parsons Znaniecki Sorokin and Blumer Finally the problematic relevancy of the past for the present is directly confronted The author examines how basic assumptions of theory in particular periods have used relatively unique schema and generated considerable controversy

The Last Half-Century Morris Janowitz,1978 The Last Half Century represents the culmination of a lifetime of scholarship by Morris Janowitz In this comprehensive and systematic analysis of the major trends in American society during the past fifty years he probes the weakening of popular party affiliations and the increased inability of elected representatives to rule Centering his work on the crucial concept of social control Janowitz orders and assesses a vast amount of empirical research to clarify the failure of basic social institutions to resolve our chronic conflicts For Janowitz social control denotes a society s capacity to regulate itself within a moral framework that transcends simple self interest He poses urgent questions Why has social control been so drastically weakened in our advanced industrial society And what strategies can we use to strengthen it again The explanation rests in part on the changes in social structure which make it more and more complicated for citizens to calculate their political self interest At the same time complex economic and defense problems also strain an already overburdened legislative system making effective responsive political rule increasingly difficult Janowitz concludes by assessing the response of the social sciences to the pressing problem of social control and asserts that new forms of citizen participation in the government must be found
