Social Capital Stephen Baron, John Field, Tom Schuller, 2000-11-30 The idea of social capital is increasingly prominent in international national and local policy making and in the social sciences However its rapid rise to prominence has not been matched by proper scrutiny of the idea and its consequences This book provides the first full critical analysis of social capital written by authors from a wide range of disciplinary and policy backgrounds The book asks searching questions Is the concept of social capital really new Does it offer significant analytic purchase Can it be an operational as opposed to rhetorical concept Can policies based on social capital deal with conflict and social exclusion These issues are explored through studies of education health political science urban regeneration economic development and other areas and disciplines The authors who include academics professionals and policy specialists are all distinguished and prominent contributors in their own fields

Social Capital Scott L. McLean, David A. Schultz, Manfred B. Steger, 2002-11 This collection tackles the theme of isolation and the breakdown of mediating social institutions It is in part a response to Robert Putnam's *Bowling Alone* as well as an attempt to create a broader idea of civil society

Economics of Social Relations Atilano Pena-López, Matías Membiela Pollán, 2025 Starting from the idea that economic relations are social relations and every economic fact is first a social fact this book explores one of the crucial problems within economic science how to embody the social dimension into the study of economic reality from a critical perspective This book opens with an examination of the concept of social capital incorporating all the approaches from the last 30 years of analysis It reviews the two main orientations of existing research programmes in social capital the macro or culturalist perspective and the micro or individual social capital Furthermore it proposes a reconstruction of the theory from a micro perspective Finally taking this approach this book explores the link between social capital and the negative aspects of social reality such as corruption or inequality and through the study of so called relational goods the influence of social capital on subjective well being The analysis of the concept of social capital not only involves economists but also requires a necessary bridge with sociology anthropology political science and even psychology This book will therefore be crucial reading for anyone engaged in the problem of the interrelation between economy and society

Social Capital John Field, 2008-04-30 The term social capital is a way of defining the intangible resources of community shared values and trust upon which we draw in daily life It has achieved considerable international currency across the social sciences through the very different work of Pierre Bourdieu in France and James Coleman and Robert Putnam in the United States and has been widely taken up within politics and sociology as an explanation for the decline in social cohesion and community values in western societies It has also been adopted by policy makers particularly in international governmental bodies such as the World Bank This fully revised second edition of Social Capital provides a thorough overview of the intense and fast moving debate surrounding this subject This clear and comprehensive introduction explains the theoretical underpinning of the subject the empirical work that has been done to explore its operation and the influence that it has had on public policy and practice It includes guides to further reading and a list of the most important websites

Beyond Social Capital Irene van Staveren, Peter Knorringa, 2007-12-13 This book challenges the mainstream conception of social capital as an individual resource In its place it offers an understanding of social capital as a social phenomenon residing in human relationships

Critical Perspectives in Public Health Judith Green, Ronald Labonté, 2007-10 Combining analytical introductory chapters edited versions of influential articles from the journal Critical Public Health and specially commissioned review articles this volume examines the contemporary roles of critical voices in public health research and practice from a range of disciplines and contexts

Youth Programs as Builders of Social Capital Matthew Calvert, Mary Emery, Sharon Kinsey, 2013-08-07 This volume builds understanding of practices in youth and community development that create or build social capital assets at the individual group and community levels The authors explore whether programs contribute to the development of social capital at the individual and community scales thereby fostering and enhancing positive youth development as well as community development It includes articles on defining and measuring social capital through instruments designed to document impact and also to engage program participants The authors then discuss program practices that build social capital in a wide range of youth development settings from community based service learning to 4 H community clubs Finally they focus on building social capital in particular contexts including work in rural communities with the most vulnerable youth The volume is designed to help practitioners Refine their dual focus on youth and community development Clarify constructs that help translate the

public value of positive youth development to community stakeholders Provide examples of practices that link youth and youth programs more intentionally to the social relationships that knit communities together This is the 138th volume of New Directions for Youth Development the Jossey Bass quarterly report series dedicated to bringing together everyone concerned with helping young people including scholars practitioners and people from different disciplines and professions

Social Capital and Economics Asimina Christoforou, John Davis, 2014-05-30 This volume provides a collection of critical new perspectives on social capital theory by examining how social values power relationships and social identity interact with social capital This book seeks to extend this theory into what have been largely under investigated domains and at the same time address long standing classic questions in the literature concerning the forms determinants and consequences of social capital Social capital can be understood in terms of social norms and networks It manifests itself in patterns of trust reciprocity and cooperation The authors argue that the degree to which and the different ways in which people exhibit these distinctively social behaviours depend on how norms and networks elicit their values reflect power relationships and draw on their social identities This volume accordingly adopts a variety of different concepts and measures that incorporate the variety of contextually specific factors that operate on social capital formation In addition it adopts an interdisciplinary outlook that combines a wide range of social science disciplines and methods of social research Our objective is to challenge standard rationality theory explanations of norms and networks which overlook the role of values power and identity This volume appeals to researchers and students in multiple social sciences including economics sociology political science social psychology history public policy and international relations that employ social capital concepts and methods in their research It can be seen as a set of new extensions of social capital theory in connection with its themes of social values power and identity that would advance the scholarly literature on social norms and networks and their impact on social change and public welfare

Networks, Trust and Social Capital Sokratis M. Koniordos, 2017-03-02 The concepts of social networks social capital and trust play an increasingly central role in the social sciences They have become indispensable conceptual tools for the analysis of post industrial late modern societies which are characterized by such features as the relative decline of formal hierarchies the development of flexible social arrangements in the sphere of production and the extreme mobility of capital This is the first book to study the interrelationships between these important concepts both theoretically and empirically Drawing on empirical investigations from a range of diverse European social contexts the contributors develop an economic sociology that builds on and extends established theoretical perspectives The book opens with an introduction to the theoretical ideas relating social capital to reciprocity trust and social networks in line with current debates The authors go on to discuss the concept of social embeddedness addressing the economic effects of social capital by examining the network and trust foundations of labour markets and investigating the structural limits of trusting networks They conclude with an exploration of the impact of networking and the functioning of trust and social capital on the economic arrangements

and performance of nascent capitalist economies in post Communist Europe This thematically unified collection by a team of distinguished contributors from across Europe provides an innovative and distinctive contribution to an expanding area of research

The Family in Question R. D. Grillo, 2008 The family lives of immigrants and ethnic minority populations have become central to arguments about the right and wrong ways of living in multicultural societies While the characteristic cultural practices of such families have long been scrutinized by the media and policy makers these groups themselves are beginning to reflect on how to manage their family relationships Exploring case studies from Austria the Netherlands Norway Portugal Spain Switzerland the United Kingdom and Australia The Family in Question explores how those in public policy often dangerously reflect the popular imagination rather than recognizing the complex changes taking place within the global immigrant community In hoeverre allochtonen vrij zijn hun cultuur te uiten in de multiculturele samenleving staat bijna dagelijks ter discussie in de media en politiek Vaak wordt vergeten dat ook migrantenfamilies zelf worstelen om hun tradities en gebruiken vorm te geven in een pluriforme samenleving waarin relaties met familie zeer complex kunnen zijn In The Family Question worden migrantenfamilies in onder andere Nederland Oostenrijk en Noorwegen onderzocht Hieruit blijkt dat spelers op het vlak van beleidsvorming vaak toegeven aan populaire misverstanden over allochtonen en zo bijdragen aan de heersende xenofobie en stereotypering van immigranten
