Rumour and Radiation Paul Hegarty, 2015-01-01 This is a book about video art and about sound art The thesis is that sound first entered the gallery via the video art of the 1960s and in so doing created an unexpected noise The early part of the book looks at this formative period and the key figures within it then jumps to the mid 1990s when video art has become such a major part of contemporary art production it no longer seems an autonomous form Paul Hegarty considers the work of a range of artists including Steve McQueen Christian Marclay Ryan Trecartin and Jane and Louise Wilson proposing different theories according to the particular strategy of the artist under discussion Connecting them all are the twinned ideas of intermedia and synaesthesia Hegarty offers close readings of video works as influenced by their sound while also considering the institutional and material contexts Applying contemporary sound theory to the world of video art Paul Hegarty offers an entirely fresh perspective on the interactions between sound sound art and the visual

All Ears Peter Szendy, 2016-12-01 The world of international politics has recently been rocked by a seemingly endless series of scandals involving auditory surveillance the NSA's warrantless wiretapping is merely the most sensational example of what appears to be a universal practice today What is the source of this generalized principle of eavesdropping All Ears The Aesthetics of Espionage traces the long history of moles from the Bible through Jeremy Bentham's panacoustic project all the way to the intelligence gathering network called Echelon Together with this archeology of auditory surveillance Szendy offers an engaging account of spycraft's representations in literature Sophocles Shakespeare Joyce Kafka Borges opera Monteverdi Mozart Berg and film Lang Hitchcock Coppola De Palma Following in the footsteps of Orpheus the book proposes a new concept of overhearing that connects the act of spying to an excessive intensification of listening At the heart of listening Szendy locates the ear of the Other that manifests itself as the originary division of a split hearing that turns the drive for mastery and surveillance into the death drive

music of the early 20th century to the Japanese noise music and glitch electronica of today. It situates different musics in their cultural and historical context and analyses them in terms of cultural aesthetics. Paul Hegarty argues that noise is a judgement about sound that what was noise can become acceptable as music and that in many ways the idea of noise is similar to the idea of the avant garde. While it provides an excellent historical overview, the book's main concern is in the noise music that has emerged since the mid 1970s, whether through industrial music, punk, free jazz or the purer noise of someone like Merzbow. The book progresses seamlessly from discussions of John Cage, Erik Satie and Pauline Oliveros through to bands like Throbbing Gristle and the Boredoms. Sharp and erudite and underpinned throughout by the ideas of thinkers like Adorno and Deleuze, *Noise Music* is the perfect primer for anyone interested in the louder side of experimental music.
