Martin, 2024-04-23 This book examines personal and professional understandings of religion in psychotherapy and advocates for integrity competency and cultural pluralism in clinical practice A major feature of this book is that it confirms the massive

proliferation of religion oriented approaches to counseling and therapy in recent years It attributes this rise to opportunism and exaggerated individualism among therapists and to the frequent failures of professional associations clinical preparation programs and other influences In response to these influences it identifies the need for guiding principles for integrating religion into therapy discusses the religious issues that clients bring to therapy and advocates for major changes in clinical practice with emphasis on integrity and competence Building on a large volume of research and using evidence based conclusions it clarifies how these two major features of contemporary life can be integrated with integrity and competence The author maintains that religion should be a feature of the practice of counseling and therapy so long as it addresses the clinically relevant needs of clients However it also explores how the religion of counselors and therapists often expresses the needs of counselors and therapists instead of addressing the needs of their clients In the context of these questions and discussion of contentious challenges this book provides guidelines for relating religion with clinical practice and recommends needed actions by clinical preparation programs professional associations individual therapists state legislatures licensing boards social service agencies and corporations All of this stands on the conspicuous need for professional accountability in the delivery of mental health care

Therapy Thieves Francis A. Martin, 2020-03-13 Why are we practicing counselors and psychotherapists committed to failure This is the question that has haunted Dr Francis Martin as he has cataloged well over 20 000 distinct psychotherapy approaches advertised on the websites of licensed mental health professionals No doubt some of these are harmful most of them ineffective and many simply made up but the sheer volume of such techniques and practices advertised by licensed professionals holding advanced degrees whose services are billed to clients and insurance companies calls the credibility of the entire mental health profession into question Based on significant original research that joins research from others this book describes a near universal crisis in mental health care and recommends ways to rescue the field from itself The crisis is caused by declining competence among counselors and psychotherapists who have failed to regulate themselves and who therefore deliver inadequate if not harmful services The book calls for major specific and urgently needed reforms

Medicalizing Counselling Tom Strong, 2017-09-18 This book discusses how counselling a profession known for diverse and innovative practices has recently been influenced by scientific marketplace and administrative developments corresponding with a medicalized focus on psychiatric diagnoses and related evidence based treatments Tensions associated with this medicalized focus refer to competing logics and accountabilities regarding how to understand and address concerns brought to counselling Tom Strong reviews such tensions as they relate to counsellors approaches to practice experienced as incompatible with a medicalized approach The role of media and technology therapy culture and counsellor education are examined with respect to medicalizing tensions that professionals and clients of counselling increasingly face The book will interest readers who share concerns regarding the potential for a mental health monoculture grounded in the diagnose and treatment logic of medicalized counselling

Gospel Conversations Robert W. Kelleman, 2015-09-01 How does a person learn to counsel others with the truth of God's Word? Bob Kelleman believes that the best way to learn counseling is by doing it by giving and receiving biblical counseling in the context of real, raw Christian community. Gospel Conversations explores the four compass points of biblical counseling: Sustaining It's Normal to Hurt, Healing It's Possible to Hope, Reconciling It's Horrible to Sin but Wonderful to Be Forgiven, Guiding It's Supernatural to Mature. These four compass points combine to equip readers to develop twenty-two ministry relational competencies: the how-to of caring like Christ. This book serves as a practical training manual that can be used for large and small group interaction. Gospel Conversations is the second volume in The Equipping Biblical Counselors Series, a comprehensive relational training curriculum for the local church that provides a model for equipping God's people to change lives with Christ's changeless truth. This two-volume series weaves together comprehensive biblical insight with compassionate Christian engagement.
