**Sir Peter Lely (1618-1680): Dutch Classicist, English Portraitist, and Collector** Brandon Henderson, 2008-07-24 The Dutch born English Baroque portrait painter Sir Peter Lely 1618 1680 is chiefly known for his drowsy sensual beauties and bewigged courtiers associated with the Restoration court of Charles II He is often seen as merely successor or imitator of Sir Anthony Van Dyck 1599 1641 with a common resemblance in all his sitters and an inability to capture a true likeness as well as an absence of any personal characterization or psychological interest Alternately this dissertation aims to reveal Lely s genius of superb draughtsmanship fine color and lively composition as well as to examine and reinstate the artist s impact and deep impress on British painting Lely s early style owes much to his Dutch origin and training with the pioneers of Dutch classicism and the distinctive qualities of his early work and the change in his traditions and techniques are examined The development of Lely s portrait style is examined from his arrival in England in the early 1640s through his years as leading aristocratic and society portraitist and Principal Painter to the King in the 1660s to his mature work in the 1670s when his work is characterized by a restricted palette and cool restraint And finally Lely as collector is examined He assembled one of the largest and most impressive private collections of art in seventeenth century Europe and his acquisitions and their influences benefits and effects are considered Upon Lely s death his highly important collection was dispersed by auction in a series of four well publicized sales in 1681 1682 1688 and 1694 respectively These sales brought many important works to the London art market and were some of the most important sales to date in England as well as the most spectacular of the modern auction world Although Lely initially emulated the style and techniques of Van

Dyck he juxtaposed his profound Dutch qualities of rich color dramatic illumination and romantic landscapes and ultimately imbued a sensuality languor and luxurious negligence into the traditions and continuity of Van Dyck s grand Baroque style of English portraiture Subsequently together later with Sir Godfrey Kneller 1646 1723 Sir Peter Lely completely dominated British portraiture from the death of Van Dyck in 1641 until William Hogarth 1697 1764 challenged his style in the first half of the eighteenth century Due to large file size some images within this ebook do not appear in high resolution

*The Invention of the Model* Susan Waller, 2017-07-05 Although mastery of the representation of the human figure was central to art making as early as the fifteenth century in Europe in the nineteenth century French imagination the artist's model became identified as a distinct social type and cultural trope This study of the artist's model in Paris between 1830 and 1870 incorporates three histories a social history of professional models a cultural history of models as social types and an art history of representations of the model in elite and popular visual culture It takes as its starting point the artist model transaction demonstrating that stereotypes of the model that figured in the public imagination were framed both by gender and ethnicity the book develops a nuanced typology of different types of models Interwoven with the analysis of the constructed identities of models are accounts of the lives of particular models and the histories of the urban population groups from which they emerged The Invention of the Model Artists and Models in Paris 1830 1870 is an adept exploration of
