

One of the most important areas in looking at a horoscope is interpreting from the aspects indications of possible accidents; and the subject is made all the more difficult by defining what constitutes an accident. The author defines it as "a bodily mishap occasioned without intent either on the part of the sufferer or the agent (if any) inflicting it". There are various gradations of accidents, and in the research for this book, one of the primary considerations was to discover if possible any factors that are common to all serious accidents. Here with the evidence of statistics are 168 cases from Britain and the United States which will assist astrologers in examining charts.
