**The Martians of Science** István Hargittai, 2008 Hargittai tells the story of five remarkable Hungarians Wigner won a Nobel Prize in theoretical physics Szilard was the first to see that a chain reaction based on neutrons was possible initiated the Manhattan Project but left physics to try to restrict nuclear arms von Neumann could solve difficult problems in his head and developed the modern computer for more complex problems von Kármán became the first director of NASA's Jet Propulsion Laboratory providing the scientific basis for the U S Air Force and Teller was the father of the hydrogen bomb whose name is now synonymous with the controversial Star Wars initiative of the 1980s

**General George C. Marshall and the Atomic Bomb** Frank A. Settle Jr., 2016-04-18 This book details the evolution of General George Marshall's relationship with the atomic bomb including the Manhattan Project and the use of atomic weapons on Japan as it emerged as the ultimate weapon of mass destruction The atomic bomb is not only the most powerful weapon ever used in the history of warfare it is also the most significant in terms of its long term impact on U S military power and policy and as the reason behind the conflict that raged for four decades without actually happening the Cold War General George C Marshall played an instrumental role in the development and use of the atomic bomb in World War II as well as in issues involving nuclear weapons in the post World War II period This book tells the story of Marshall's experience with the atomic bomb from his early skepticism of its effectiveness as a weapon to his oversight of its development and deployment against Japan in World War II to his recognition of the bomb as a weapon of such dire consequence that it should never be used again Intended for a general audience as well as scholars with specific knowledge about the subject matter this book presents a cohesive account of General Marshall's involvement with nuclear weapons and atomic power as Army chief of staff during World War II and as secretary of state and secretary of defense in the early years of the Cold War

Marshall's involvement with the use of nuclear weapons is set in the context of the Allies efforts to force Japan to surrender and the initiation of the Cold War. Readers will gain insight into Marshall's quest for obtaining a Japanese surrender, his views on the use of the atomic bomb on Japan versus the use of conventional weapons including fire bombing or poison gas, his interactions with Roosevelt and Truman on nuclear issues, and Marshall's diplomatic skillfulness in dealing with the issues surrounding the control and use of nuclear weapons as secretary of state and secretary of defense in the post World War II era. These included consideration of the use of the atomic bomb during the Berlin crisis and the Korean war.

*The American Experience in World War II: The atomic bomb in history and memory* Walter L. Hixson, 2003. World War II changed the face of the United States, catapulting the country out of economic depression, political isolation, and social conservatism. Ultimately, the war was a major formative factor in the creation of modern America. This unique twelve-volume set provides comprehensive coverage of this transformation in its domestic policies, diplomatic relations, and military strategies, as well as the changing cultural and social arenas. The collection presents the history of the creation of a super power prior to, during, and after the war, analyzing all major phases of the U.S. involvement, making it a one-stop resource that will be essential for all libraries supporting a history curriculum. This volume is available on its own or as part of the twelve-volume set *The American Experience in World War II*. For a complete list of the volume titles in this set, see the listing for *The American Experience in World War II*. ISBN 0 415 94028 1

**The Atomic Bomb and American Society** Rosemary B. Mariner, G. Kurt Piehler, 2009. Drawing on the latest research on the atomic bomb and its history, the contributors to this provocative collection of eighteen essays set out to answer two key questions: First, how did the atomic bomb, a product of unprecedented technological innovation, rapid industrial-scale manufacturing, and unparalleled military deployment, shape U.S. foreign policy, the communities of workers who produced it, and society as a whole? And second, how has American society's perception that the bomb is a means of military deterrence in the Cold War era evolved under the influence of mass media, scientists, public intellectuals, and even the entertainment industry? In answering these questions, *The Atomic Bomb and American Society* sheds light on the collaboration of science and the military in creating the bomb, the role of women working at Los Alamos, the transformation of nuclear physicists into public intellectuals as the reality of the bomb came into widespread consciousness, the revolutionary change in military strategy following the invention of the bomb, and the development of Cold War ideology, the image of the bomb that was conveyed in the popular media, and the connection of the bomb to the commemoration of World War II. As it illuminates the cultural, social, political, environmental, and historical effects of the creation of the atomic bomb, this volume contributes to our understanding of how democratic institutions can coexist with a technology that affects everyone, even if only a few are empowered to manage it. Rosemary B. Mariner is

formerly Joint Chiefs of Staff Chair and Professor of Military Studies for the National War College She is currently a lecturer in history at the University of Tennessee Knoxville G Kurt Piehler is associate professor of history and former director of the Center for the Study of War and Society at the University of Tennessee Knoxville which hosted the conference that formed the basis of this volume He is the author of *Remembering War the American Way* and *World War II in the American Soldiers Lives Series* as well as the coeditor with John Whiteclay Chambers II of *Major Problems in American Military History*
