The Atomic Theory Of Lucretius:

The Atomic Theory of Lucretius Fleeming Jenkin, 1868 *The Atomic Theory of Lucretius Contrasted with Modern Doctrines of Atoms and Evolution* John Masson, 1884 *The Atomic Theory of Lucretius* Fleeming Jenkin, 2020-12-08

In *The Atomic Theory of Lucretius* Fleeming Jenkin meticulously unpacks and contemporizes the ancient Roman philosopher Lucretius's understanding of atomic theory. Through a scholarly lens, Jenkin delves into the poetic and philosophical implications of Lucretius's work, particularly how it intersects with the scientific discourse of the 19th century. The book's literary style is rich and accessible, combining rigorous analysis with a narrative that brings Lucretius's ideas to life, inviting readers into the complexities of atomism and its existential ramifications within the broader context of Epicurean thought.

Fleeming Jenkin, a notable physicist and engineer, was deeply influenced by the scientific inquiries of his time, particularly the burgeoning fields of thermodynamics and atomic theory. His academic background and personal fascination with the intersection of science and philosophy led him to engage with Lucretius's text, illuminating its relevance for modern readers. Jenkin believed in the importance of contrasting ancient wisdom with contemporary scientific advancements, and this book serves as the culmination of his endeavor to bridge those worlds.

For anyone interested in the foundations of atomic theory, philosophy, or the historical evolution of scientific thought, Jenkin's thorough exploration offers invaluable insights. This book not only serves as a scholarly resource but also as an invitation to contemplate the enduring legacy of Lucretius's ideas, making it a must-read for both scholars and casual readers alike.

Excerpt from *The Atomic Theory of Lucretius Contrasted With Modern Doctrines of Atoms and Evolution*. It is strange that the Greek atomic theory of which Lucretius is the sole exponent has not long before this been set in a clear and detailed form before the English reader. In Professor Veitch's little book *Lucretius and the Atomic Theory* 1875 only fifteen pages pp 10-25 deal with Lucretius's theory of atoms and that only in a general way while the rest of the volume is occupied with a very able criticism of modern Materialism. The scope of Professor Sellar's work does not allow him to enter at all minutely into the science of Lucretius though his chapter on the connecting links between Lucretius's science and his poetry is most valuable. Zeller has indeed given us in his *Pre Socratic Philosophy* an admirable sketch of the system of Democritus but his account of the later development of the atomic theory in the hands of Epicurus is by no means equally complete. Lange's short chapters on Democritus, Epicurus and Lucretius in his *History of Materialism* contain acute enough criticism though in his statement of facts Lange is by no means so trustworthy as Zeller.

volition is vested and in these are logically found the bases for free will which no mere materialist could assert Will with Lucretius is held so to act on matter that Mr Masson ingenuously writes Lucretius conception of Declination as a movement so exceedingly slight the tiny soul atom swerving from the straight line not more than the least possible degree at the impulse of its own Freewill does not this come pretty near to Herschel s no greater force than is required to remove a single material molecule from its place through a space inconceivably minute p 117 This which seems formally mechanical is in reality moral Of course Mr Masson dwells as he could not help doing on the grand lacuna in the philosophy of Lucretius his total failure to account for consciousness Lucretius admitted no more than sensation which he holds is felt in the body as a whole and not in any part separately and yet he insisted on the sense of free will But Mr Masson has made it clear that Lucretius if he did not clearly formulate all his conceptions perceived the necessity of founding on personal experience and if he did not see his way to accept the immortality of the soul this was a defect for the principle of free will logically implied it One of the happiest summaries of the points of relationship between Lucretius and Professor Clifford and his school of thinkers is thus given by Mr Masson The reasoning of both is based on the same principle and both apply it with equal boldness The question is an instructive one In both cases materialism finding itself hard pressed escapes as it were by a back door and in so doing unconsciously confesses its own powerlessness to account unaided for the origin of life and thought In one point the pagan has the advantage of the modern philosophy in showing none of the bitterness against all forms of religious belief The British Quarterly Review Volume 80 1884 Lucretius and the Atomic Theory Veitch John,1901
