The Australian Alternative:

The Australian Alternative Laura E. Faulk, Odie B. Faulk, 1975 **Aboriginal Black Power and the Rise of the Australian Black Panther Party, 1967-1972** Alyssa L. Trometter, 2022-01-01 Examining transnational ties between the USA and Australia this book explores the rise of the Aboriginal Black Power Movement in the 1960s and early 1970s. Aboriginal adaptation of the American Black Power movement paved the way for future forms of radical Aboriginal resistance including the eventual emergence of the Australian Black Panther Party. Through analysis of archival material including untouched government records, previously unexamined newspapers and interviews conducted with both Australian and American activists, this book investigates the complex and varied process of developing the Black Power movement in a uniquely Australian context. Providing a social and political account of Australian activism across Victoria, New South Wales and Queensland, the author illustrates the fragmentation of Aboriginal Black Power marked by its different leaders, protests and propaganda.

From Fear to Hope: Alternative Australian Narratives on War and Peacemaking Pamela Leach, 2018-07-10 This book scrutinises peace and war through Australian lenses. It uncovers a deeper understanding of these terms and reflects a desire to bring to light alternative Australian ideas of war and peacemaking. Certain stories have eclipsed others that add importantly to Australia's history. This Quaker initiative considers a plurality of voices and the truths they purport. It unpacks the act of memorialising to discover the marked impact we make in our efforts to hold on to meaning and to our past. What have been the effects of our responses to the maxim 'Lest we forget'?

The China Alternative Graeme Smith, Terence Wesley-Smith, 2021-03-01 In this collection, 17 leading scholars based in Solomon Islands, Fiji, Papua New Guinea, Timor-Leste, Australia, New Zealand, the United States and China analyse key dimensions of the changing relationship between China and the Pacific Islands and explore the strategic economic and diplomatic implications for regional actors. The China Alternative includes chapters on growing great power competition in the region as well as the response to China's rise by the US and its Western allies and the island countries themselves. Other chapters examine key dimensions of China's Pacific engagement, including Beijing's programs of aid and diplomacy as well as the massive investments of the Belt and Road Initiative. The impact of China's rivalry for recognition with Taiwan is examined and several chapters analyse Chinese communities in the Pacific and their relationships with local societies. The China Alternative provides ample material for informed judgements about the ability of island leaders to maintain their agency in the changing regional order as well as other issues of significance to the peoples of the region. China's discovery of the diverse Pacific islands intriguingly resonant of the era of European explorers is impacting on this too long overlooked region through multiple currents, that this important book guides us through.

Rowan Callick, Griffith University. The China Alternative is a must-read for all students and practitioners interested in understanding the new geopolitics of the Pacific. It assembles a stellar cast of Pacific scholars to deeply explore the impact of the changing role of China on the Pacific islands region. Significantly, it also puts the Pacific

island states at the centre of this analysis by questioning the collective agency they might have in this rapidly evolving strategic context Greg Fry The Australian National University

Alternative Visions of the International Law on Foreign Investment C. L. Lim, 2016-03-03 This book is about the forces that are reshaping the international law on foreign investment today It begins by explaining the liberal origins of contemporary investment treaties before addressing a current backlash against these treaties and the device of investment arbitration The book describes a long standing legal intellectual resistance to a neo liberal global economic agenda and how tribunals have interpreted various treaty standards instead It introduces our reader to the changes now taking place in the design of a range of familiar treaty clauses and it describes how some of these changes are now driven not only by developing and emerging economies but also by the capital exporting nations Finally it explores the

life career and writings of Muthucumaraswamy Sornarajah a scholar whose work has been dedicated to the realisation of many of these changes and his views about the hold global capital has over legal practice **Visions and Realities of Party Government** Francis G. Castles, Rudolf Wildenmann, 1986 No detailed description available for Visions and Realities of Party Government **Alternative Educational Programmes, Schools and Social Justice** Glenda McGregor, Martin Mills, Pat Thomson, Jodie Pennacchia, 2019-10-18 Alternative education caters and cares for students whose regular schools have failed and excluded them Fifty years of international research reports that alternative settings are characterised by close and powerful staff student relationships a curriculum which is relevant engaging and meaningful and the strong sense of agency afforded young people by the opportunity to make decisions Together these three practices produce increased life chances for alternative education participants However despite these apparent successes alternative education seems to have had little impact on mainstream schools This collection of papers addresses the important question what might regular schools and teachers learn about socially just pedagogies from alternative education practices In providing answers to this question authors interrogate the taken for granted wisdom about alternative education while also taking account of ongoing policy shifts differing locations and populations and persistent and intersecting patterns of raced classed and gendered inequalities They draw on a range of theoretical and methodological approaches to interrogate the ways in which alternative schools and alternative education both challenge and legitimate the kinds of schooling most of us expect for our own and other people's children The chapters in this book were originally published as a special issue of Critical Studies in Education **Material Geographies of Household Sustainability** Andrew Gorman-Murray, 2016-05-13 Charting new research directions this book constructs a series of imperatives for linking culturally informed research around household sustainability with policy and planning The household or home is a critical scale for understanding activities that connect individual behaviours and societal attitudes The focus on the household in this collection provides a window into the sheer diversity of homemaking and maintenance activities that entail resource use These practices have affective or emotive dimensions as well as habitual aspects Diversity innovation and change at the household scale is often missed in policy approaches which assume that simplistic economic motivations drive demand and this can in turn be managed through regulation or market pricing The research challenge extends beyond describing existing unsustainable economies driving resource intensive behaviour to consider realistic options for transformations in cultural practices material relationships and ultimately the political economies they sit within Without change in these systems government initiatives to promote ecological modernisation run the risk of simply green washing the very economies of consumption that currently drive unsustainable practices Social and cultural change at the household level is critical to promoting sustainability at a range of wider scales **The Routledge Companion to Alternative Organization** Martin Parker, George Cheney, Valérie Fournier, Chris Land, 2014-01-03 Despite the Great Recession slightly different forms of global capitalism are still portrayed as the only game in town by the vast

majority of people in power in the world today Unbridled growth trade liberalisation and competition are advocated as the only or best ways of organizing the contemporary world Unemployment yawning gaps between rich and poor political disengagement and environmental devastation are too often seen as acceptable side effects of the dominance of neo liberalism But the reality is that capitalism has always been contested and that people have created many other ways of providing for themselves This book explores economic and organizational possibilities which extend far beyond the narrow imagination of economists and management theorists Chapters on co operatives community currencies the transition movement scrounging co housing and much more paints a rich picture of the ways in which another world is not only possible but already taking shape The aim of this companion is to move beyond complaining about the present and into exploring this diversity of organisational possibilities Our starting point is a critical analysis of contemporary global capitalism is merely the opening for thinking about organizing as a form of politics by other means and one that can be driven by the values of solidarity freedom and responsibility This comprehensive companion with an international cast of contributors gives voice to forms of organizing which remain unrepresented or marginalised in organizational studies and conventional politics yet which offer more promising grounds for social and environmental justice It is a valuable resource for students activists and researchers interested in alternative approaches to economy and society in a variety of disciplinary and interdisciplinary fields

The Cultures of Alternative Mobilities Phillip Vannini, 2016-03-16 The Cultures of Alternative Mobilities presents a series of ethnographic studies focusing on the local cultures of mobilities and immobilities emphasizing the everyday sense of contingency and heterogeneity that accompanies them Compensating for the excess of theory and criticism based on the notion of hypermobilities this book sheds light on the nuanced differences and idiosyncrasies of mobility with a view to rediscovering meanings and lifestyles marked by movement and immobility Original empirical and global case studies are presented by an international team of scholars exploring the complex negotiated and contingent nature of the social worlds of movement By avoiding sweeping generalizations on the deeply connected and readily mobile nature of society as a whole this volume sheds light on the diversity of mobility modes in an accessible and interdisciplinary form that will be of key interest to sociologists geographers and scholars of human mobility communication and culture
