

the gulf really so wide? If each side were to listen more attentively to each other (and also to the testimony of parish priests, missionaries and lay Christians living out and suffering for their faith) they might well find that it is not after all a choice between being radical, schizoid or conservative: we all have the same calling to work out, for ourselves and for the Church, what it *means* to say that God was in Christ, reconciling the world to himself.

The Availability of Religious Ideas By RAMCHANDRA GANDHI

Macmillan 1974 109 pp. £7.95

By the availability of religious ideas, the author of this essay (a grandson of Mahatma Gandhi) means two things. First, he thinks the ideas are necessary for the fullest understanding of central philosophical problems. Second, he thinks the ideas are available to humanists who stand outside all religious traditions. These contentions are problematic.

Asking what it is like to be a human being is not like asking what it is like to be something specific such as a father or a pilot. Neither is it like asking what it is like to be a child or a woman. In all these cases one can contrast one state with others, but 'being human' is not a state among others. Nevertheless, if instead of asking 'What is it like to be a human being?' we ask, 'What are human beings?' we find that the question is to be answered not by science or introspection but by philosophical reflection.

Such reflection leads to speculations about the soul. What do we mean by 'I'? Gandhi argues that the use of 'I' is not an act of naming and that H. D. Lewis's claim that consciousness communicates self-identity directly is an illusion. To use 'I' is to take up an audience-stance. By an audience-stance Gandhi means the context in which one person addresses another. He claims that when another addresses me he does not pick me out, does not refer to me. I find this claim odd. It is not made clearer by saying, 'In addressing me you seem to gain a special inward access to me. This is sufficiently rich to enable me to grasp that you have identified me, but because of the essentially non-referential character of your mode of identification, I feel that you have communicated to me your thought of me as myself, and not as a creature of a particular kind, but quite simply as myself' (p. 26.) Since the 'I' is only called forth in being addressed, to use 'I' is to imagine that one is being addressed if one is not actually being addressed. This claim is confused. Compare the following soliloquies. First, 'I'll say to him that I can't come if he asks'. Second, 'It's a nice day. I think I'll go for a walk.' How can Gandhi's analysis be applied to cases such as the second? I learn

The International Social Survey Programme 1984-2009 Max Haller, Roger Jowell, Tom W Smith, 2009-09-11 The social sciences rely more on the comparative method than on experimental data mainly because the latter is difficult to acquire amongst human populations The International Social Survey Programme has played a pioneering role in creating and sustaining methodologically sophisticated mass attitude surveys across the globe Starting in 1984 with five nations it now encompasses forty five nations spread over five continents each administering an identical annual survey to a random sample of their population Analyses of the data or descriptions of the methodology already appear in over 3 000 publications This book contains new contributions from three dozen eminent scholars who analyse and compare the perceptions and attitudes of citizens across all five continents nations and over time Subjects range from inequality and the role of the state ethnic national and global identities the changing relevance of religion beliefs and practices gender roles family values and work orientations household and society Some chapters focus on methodological issues others focus on substantive findings This book sets new standards for cross cultural research *Architectures of Justice* Henrik Palmer Olsen, Stuart

Toddington, 2016-05-23 Law can be seen to consist not only of rules and decisions but also of a framework of institutions providing a structure that forms the conditions of its workable existence and acceptance In this book Olsen and Toddington conduct a philosophical exploration and critique of these conditions what they are and how they shape our understanding of what constitutes a legal system and the role of justice within it The Struggle of Faith in a World of Beliefs Henry F. Lazenby, 2000-06-14 Christians have always struggled with what should characterize their lives and actions in the world Often they have inferred that their identity as Christians should revolve around either a list of doctrines proposed as orthodox or a set of ethics designed to promote a common morality Usually this emphasis on doctrines and ethics obscures the essential character of Christian faith As a result the real struggle has been to keep one's Christian faith intact while different and sometimes opposing beliefs or traditions compete for one's loyalty This book presents a way to resolve this struggle by noting the definitive characteristics of a Christian and the roles a church plays in helping Christians develop their full potential as human beings **Religion and Magic in Socialist and Post-Socialist Contexts** Alexandra
