Browning,2016-06-07 Frank Browning takes us into human gender geographies around the world from gender neutral kindergartens in Chicago and Oslo to women s masturbation classes in Shanghai from conservative Catholics in Paris fearful of God and Nature to transsexual Mormon parents in Utah As he shares specific and engaging human stories he also elucidates the neuroscience that distinguishes male and female biology shows us how all parents brains change during the first weeks of parenthood and finally how men s and women s responses to age differ worldwide based not on biology but on their earlier life habits Starting with Simone de Beauvoir s world famous observation that one is not born a woman but instead becomes a woman Browning goes on to show equally that no one is born a man but learns how to perform as a man and that there is no fixed way of being masculine or feminine Increasingly the categories of male and female and even gay and straight seem old fashioned and reductive Just visible on the horizon is a world of gender and sexual fluidity that will remake our world in fundamental ways Linking science to culture and behavior and delving into the lives of individuals challenging historic notions Browning questions the traditional division of Nature vs Nurture in everything from plant science to sexual expression arguing in the end that life consists of an endless waltz between these two ancient notions

Cassette Books Library of Congress. National Library Service for the Blind and Physically Handicapped,2000 *The Boston Globe Index* ,2001 **Nurturing the Older Brain and Mind** Pamela M. Greenwood,Raja Parasuraman,2012-01-27 Two noted researchers explain scientific evidence that shows why certain experiential and lifestyle factors may promote and maintain cognitive vitality in older adults Although our physical abilities clearly decline as we age cognitive decline in healthy old age is neither universal nor inevitable In *Nurturing the Older Brain* Pamela Greenwood and Raja Parasuraman show that scientific research does not support the popular notion of the inexorable and progressive effects of cognitive aging in all older adults They report that many adults maintain a high level of cognitive function into old age and that certain experiential and lifestyle factors including education exercise diet and opportunities for new learning contribute to the preservation of cognitive abilities Many popular accounts draw similar conclusions and give similar lifestyle advice but lack supporting scientific evidence Greenwood and Parasuraman offer a comprehensive review of research on cognitive and brain aging They show that even the aged brain remains capable of plasticity the ability to adapt to and benefit from experience and they summarize evidence that brain plasticity is heightened by certain types of cognitive training by aerobic exercise and by certain diets They also report on the somewhat controversial use of estrogen and cognition enhancing drugs on environmental adaptations including virtual assistants that help older adults age in place and on genetic factors in cognitive aging The past twenty years of research points to ways that older adults can lead rich and cognitively vital lives As millions of baby boomers head toward old age Greenwood and Parasuraman s accessible book could not be more timely *Shifting Gears* Richard Haiduck,2020-11-17 *Shifting Gears* will whet your appetite with first hand tales of retirement so varied your head will spin Sara Zeff Geber PhD Author *Essential Retirement Planning for Solo Agers* Richard dismantles the idea that
