Care in the Past Lindsay Powell,William Southwell-Wright,Rebecca Gowland,2016-11-30 Care giving is an activity that has been practiced by all human societies From the earliest societies through to the present all humans have faced choices regarding how people in positions of dependency are to be treated As such care giving and the form it takes is a central experience of being a human and one that is culturally mediated

Archaeology has tended to marginalise the study of care and debates surrounding our ability to recognise it within the archaeological record have often remained implicit rather than a focus of discussion These 12 papers examine the topic of care in past societies and specifically how we might recognise the provision of care in archaeological contexts and to open up an inter disciplinary conversation including historical bioarchaeological faunal and philosophical perspectives The topic of care is examined through three different strands the provision of care throughout the life course namely that provided to the youngest and oldest members of a society care giving and attitudes towards impairment and disability in prehistoric and historic contexts and the role of animals as both recipients of care and as tools for its provision

Creating Mental Illness Allan V. Horwitz,2002-01-15 In this surprising book Allan V Horwitz argues that our current conceptions of mental illness as a disease fit only a small number of serious psychological conditions and that most conditions currently regarded as mental illness are cultural constructions normal reactions to stressful social circumstances or simply forms of deviant behavior Thought provoking and important Drawing on and consolidating the ideas of a range of authors Horwitz challenges the existing use of the term mental illness and the psychiatric ideas and practices on which this usage is based Horwitz

enters this controversial territory with confidence conviction and clarity Joan Busfield American Journal of Sociology Horwitz properly identifies the financial incentives that urge therapists and drug companies to proliferate psychiatric diagnostic categories He correctly identifies the stranglehold that psychiatric diagnosis has on research funding in mental health Above all he provides a sorely needed counterpoint to the most strident advocates of disease model psychiatry Mark Sullivan Journal of the American Medical Association Horwitz makes at least two major contributions to our understanding of mental disorders First he eloquently draws on evidence from the biological and social sciences to create a balanced integrative approach to the study of mental disorders Second in accomplishing the first contribution he provides a fascinating history of the study and treatment of mental disorders from early asylum work to the rise of modern biological psychiatry Debra Umberson Quarterly Review of Biology

Mental Health, Social Mirror William R. Avison, Jane D. McLeod, Bernice A. Pescosolido, 2007-08-19 In 2004 the discipline of sociology celebrated the 100th anniversary of the founding of the American Sociological Association In 2005 the Section on Medical Sociology celebrated 50 years since the formation of the Committee on Medical Sociology within the ASA And in 2003 the Section on the Sociology of Mental Health celebrated ten years since its founding within the American branch of the discipline This brief accounting marks the American based or nizational landmarks central to concerns about how social factors shape the mental health problems individuals face as well as the individual and system responses that follow This history also lays a trail of how the focus on mental health and illness has narrowed from a general concern of the discipline to a more intense substantively focused community of scholars targeting a common set of specific theoretical and empirical questions While mental health and illness figured prominently in the writings of classical sociologists contem rary sociologists often view research on mental health as peripheral to the real work of the discipline The sentiment real or perceived is that the sociology of mental health along with its sister medical sociology

may be in danger of both losing its prominence in the discipline and losing its connection to the mainstream core of sociological knowledge Pescosolido Kronenfeld 1995 *College Drinking* George W. Dowdall, 2023-07-03 Drinking is recognized as one of the most important problems confronting students on campus today with major impacts on health and safety This book answers crucial questions about why students drink examines its complex links to campus crime and sexual assault and offers new insights on how to address the issue It differs from other studies of college drinking by dispelling the myth that the problem is universal Dowdall's research reveals that the incidence of alcohol abuse varies enormously between colleges and in doing so identifies interventions and policies that have been effective and those that have failed His study is also unique in looking upstream at the broader cultural organizational and social forces that shape this behavior where most studies focus only on downstream behaviors well after students have selected their college and have started drinking Students and parents can take action to lower the risk of binge drinking by following the book's recommendations and consulting the data it provides about alcohol violations and crime at thousands of colleges For administrators and student affairs personnel it both defines and illuminates the issue and outlines effective interventions *A Handbook for the Study of Mental Health* Allan V. Horwitz, Teresa L. Scheid, 1999-04-13 This book offers the first comprehensive presentation of the sociology of mental health and illness including original contemporary contributions by experts in the relevant aspects of the field Divided into three sections the chapters cover the general perspectives in the field the social determinants of mental health and current policy areas affecting mental health services The *Sociology of Mental Health and Illness* is designed for classroom use in sociology social work human relations human services and psychology With its useful definitions overview of the historical social and institutional frameworks for understanding mental health and illness and non technical style the text is suitable for advanced undergraduate or lower level graduate students ***Tie a Knot and Hang on*** Teresa Scheid, 2018-04-17 *Tie a Knot and Hang On* is an analysis of mental health care work that crosses the borders of diverse sociological traditions The work seeks to understand the theoretical and empirical linkages between environmental pressures and activities and how these intersect with organizations and individuals The work draws upon a research tradition that sees the issue of mental health care in terms of institutional pressures and normative values The author provides a description and a sociological analysis of mental health care work emphasizing the interaction of professionally generated norms that guide the emotional labor of mental health care workers and the organizational contexts within which mental health care is provided She concludes with a discussion of emerging institutional forces that will shape the mental health care system in the future These forces are having greater impact than ever before as managed care comes to have a huge fiscal as well as institutional impact on the work of mental health professionals Scheid's book is a brilliant nuanced effort to explain the institutional demands for efficiency and cost containment with the professional ethics that emphasize quality care for the individual The book is essential reading for those interested in mental health care organizations and the providers

responding to these seemingly larger abstract demands The work offers a rich mixture not just of the problems faced by mental health care personnel but the equilibrium currently in place u an equilibrium that shapes the theory of the field no less than the activities of its practitioners Teresa L Scheid is associate professor of sociology at the University of North Carolina at Charlotte She has published widely in the area including major essays in Sociology of Health and Illness Sociological Quarterly Perspectives on Social Problems and The Journal of Applied Behavioral Science
