The Ecological Self

Rekha M. Shangpliang

The Ecological Self:

The Ecological Self Freya Matthews, 2006-05-23 This is the first book length treatment of the metaphysical foundations of ecological ethics The author seeks to provide a metaphysical illumination of the fundamental ecological intuitions that we are in some sense one with nature and that everything is connected with everything else Drawing on contemporary cosmology systems theory and the history of philosophy Freya Mathews elaborates a new metaphysics of interconnectedness She offers an inspiring vision of the spiritual implications of ecology which leads to a deepening of our conception of conservation

The Ecological Self Freya Matthews, 2016-03-31 This is the first book length treatment of the metaphysical foundations of ecological ethics The author seeks to provide a metaphysical illumination of the fundamental ecological intuitions that we are in some sense one with nature and that everything is connected with everything else Drawing on contemporary cosmology systems theory and the history of philosophy Freya Mathews elaborates a new metaphysics of interconnectedness She offers an inspiring vision of the spiritual implications of ecology which leads to a deepening of our conception of conservation

The Ecological Self Freya Mathews, 2021-05-16 Environmental disasters from wildfires and vanishing species to flooding and drought have increased dramatically in recent years and debates about the environment are rarely far from the headlines There is growing awareness that these disasters are connected indeed that in the fabric of nature everything is interconnected However until the publication of Freya Mathews *The Ecological Self* there had been remarkably few attempts to provide a conceptual foundation for such interconnectedness that brought together philosophy and science In this acclaimed book Mathews skilfully weaves together a thought provoking metaphysics of the environment She connects the ideas of the seventeenth century philosopher Spinoza with twentieth century systems theory and Einstein's physics to argue that the atomistic cosmology inherited from Newton gave credence to a picture of the universe as fragmented rather than as whole Furthermore it is such faulty thinking that presents human beings as similarly disconnected and individualistic with the dire consequence that they regard nature as of purely instrumental rather than intrinsic value She concludes by arguing for an ethics of ecological interdependence and for a basic egalitarianism among living species A compelling and fascinating account of how we must change our thinking about the environment *The Ecological Self* is a classic of ecological and environmental thinking This Routledge Classics edition includes a substantial new Introduction by the author

The Eco-Self in Early Modern English Literature Elizabeth Gruber, 2025-10-01 *The Eco Self in Early Modern English Literature* tracks an important shift in early modern conceptions of selfhood arguing that the period hosted the birth of a new subset of the human the eco self which melds a deeply introspective turn with an abiding sense of humans' embedment in the world A confluence of cultural factors produced the relevant changes Of paramount significance was the rapid spread of literacy in England and across Europe reading transformed the relationship between self and world retooled moral reasoning and even altered human anatomy This book pursues the salutary possibilities including the ecological

benefits of this redesigned self by advancing fresh readings of texts by William Shakespeare Christopher Marlowe John Webster and Margaret Cavendish The eco self offers certain refinements to ecological theory by renewing appreciation for the rational deliberative functions that distinguish humans from other species The Ecological Self Emory University,1993

Greening of the Self Joanna Macy,2013-03-18 The premise of Greening of the Self is that we are not individuals separate from the world Instead we are always co arising or co creating the world and we cannot escape the consequence of what we do to the environment Joanna Macy s innovative writing beautifully demonstres that by broadening our view of what constitutes self we can cut through our dualistic views and bring about the emergence of the ecological self Part of the Parallax Press Moments series *The Cultural Psychology of Self* Ciaran Benson,2002-01-04 Philosophers and psychologists both investigate the self but often in isolation from one another this book brings together studies by philosophers and psychologists in an exploration of the self and its function It will be of interest to all those involved in philosophy psychology and sociology **Reconceptualizing the Ecological Self** Lisa Kretz,2008 **Self, Interaction, and Natural Environment** Andrew J. Weigert,1997-02-20 Self Interaction and Natural Environment helps us as individuals to understand environmental issues and to respond accordingly Although it acknowledges that such issues exist on a worldwide scale it sharpens our focus on the personal level For example it shows that most people do not consider the pollution they cause by operating cars or fertilizing lawns Throughout the text the author links ideas to both social concerns and everyday activities helping readers to comprehend political decisions that involve the environment as well as making them more aware of their own role in that respect **Returning the Self to Nature** Jeanine M. Canty,2022-11-01 Nautilus Book Award Winner Using the lens of ecopsychology Returning the Self to Nature shows that the pervasive and extreme forms of narcissism we find in many modern societies are fundamentally the result of alienation from the natural world But it doesn t have to be that way Returning the Self to Nature is written for the person who no longer wishes to function in a world that revolves around selfish disconnected identity models and yearns to step into healthy relationships with one s self one s community and our planet Seeing the suffering of the planet and that of humans as inseparably linked the ecological crisis as psychological crisis and vice versa opens the door to a mutuality of healing between people and nature At the heart of both chronic and acute forms of narcissism is a socially constructed false self an isolated damaged ego in a delusional cycle of selfishness Through unflinching analysis and meditation practices that encourage visualizing and embodying the wild naturalness of being human the reader will gain skills to begin experiencing a courageous pluralistic and ecological self This book is an invitation to wake up from the dream of the false self and join the movement toward social and planetary healing *Integrating the Ecological Self* William R. Dickson,1999 *A New Psychology for Sustainability Leadership* Steve Schein,2017-09-08 During the last decade the sustainability position in multinational corporations has grown in influence Much literature has explored how corporations can play an important role in solving the environmental challenges facing the planet However until now there

has been little research on sustainability leadership at the individual level In this book Schein explores the deeper psychological motivations of sustainability leaders He shows how these motivations relate to overall effectiveness and capacity to lead transformational change and he explores the ways in which the complexity of sustainability is driving new approaches to leadership Drawing on interviews with 75 leaders from over 40 multinational corporations and NGOs Schein explores how ecological worldviews are developed and expressed in global sustainability practice By applying key theories from developmental psychology integral ecology and eco psychology to sustainability practice Schein encourages us to think about leadership in a different way A New Psychology for Sustainability Leadership will be of interest to an interdisciplinary audience of social scientists educators corporate executives and social entrepreneurs The insights from this book can be usefully integrated into leadership curriculum and development programs to help the next generation of leaders respond to global challenges

Exploring the Self Dan Zahavi, 2000-01-01 The aim of this volume is to discuss recent research into self experience and its disorders and to contribute to a better integration of the different empirical and conceptual perspectives Among the topics discussed are questions like What is a self What is the relation between the self givenness of consciousness and the givenness of the conscious self How should we understand the self disorders encountered in schizophrenia and What general insights into the nature of the self can pathological phenomena provide us with Most of the contributions are characterized by a distinct phenomenological approach The chapters by Butterworth Strawson Zahavi and Marbach are general in nature and address different psychological and philosophical aspects of what it means to be a self Next Eilan Parnas and Sass turn to schizophrenia and ask both how we should approach and understand this disorder and more specifically what we can learn about the nature of selfhood and existence from psychopathology The chapters by Blakemore and Gallagher present a defense and a criticism of the so called model of self monitoring respectively The final three chapters by Cutting Stanghellini Schwartz and Wiggins represent anthropologically oriented attempts to situate pathologies of self experience Series B

The Self in Infancy P. Rochat, 1995-10-30 The origins of knowledge about the self is arguably the most fundamental problem of psychology It is a classic theme that has preoccupied great psychologists beginning with William James and Freud On reading current literature today s developmental psychologists and ethologists are clearly expressing a renewed interest in the topic Furthermore recent progress in the study of infant and animal behavior provides important and genuinely new insights regarding the origins of self knowledge This book is a collection of current theoretical views and research on the self in early infancy prior to self identification and the well documented emergence of mirror self recognition The focus is on the early sense of self of the young infant Its aim is to provide an account of recent research substantiating the precursors of self recognition and self identification By concentrating on early infancy the book provides an updated look at the origins of self knowledge

Environment and Society Rekha M. Shangpliang, 2020-01-01 The book is an outcome of a seminar which was held at the Department of Sociology NEHU on the theme Environment and

Society The Context of North East India It is a compilation of 19 papers presented at the seminar The book is divided into 4 sections comprising of a wide range of papers which deal with different themes on environment and society in the North East The North East India presents a dual character of bio diversity as well as human and cultural diversity The traditional wisdom of the indigenous communities of this region is reflective of their deep sense of eco consciousness which needs to be properly documented analysed and realized by the world community The book focuses on the need to have a deeper conceptual and theoretical understanding of the relationship between natural environment and the folk communities with particular reference to their eco consciousness and environmental management strategies To deal with this the most emerging concepts like deep ecology authentic ecology environmental citizenship and noosphere theory were discussed in the Seminar The book makes a re appraisal of the new environmental debate on development options in contemporary India and the ecological limits to growth and development It is against this backdrop that this seminar was focused on the linkages between culture and ecology The outcome of the seminar was that it brought together different minds to ponder and think over the issue of sustainability of natural resources

The Paradox of Self-consciousness José Luis Bermúdez, 2000 In this book Jos Luis Berm dez addresses two fundamental problems in the philosophy and psychology of self consciousness 1 Can we provide a noncircular account of fully fledged self conscious thought and language in terms of more fundamental capacities 2 Can we explain how fully fledged self conscious thought and language can arise in the normal course of human development Berm dez argues that a paradox the paradox of self consciousness arises from the apparent strict interdependence between self conscious thought and linguistic self reference The paradox renders circular all theories that define self consciousness in terms of linguistic mastery of the first person pronoun It seems to follow from the paradox of self consciousness that no such account or explanation can be given Drawing on recent work in empirical psychology and philosophy the author argues that any explanation of fully fledged self consciousness that answers these two questions requires attention to primitive forms of self consciousness that are prelinguistic and preconceptual Such primitive forms of self consciousness are to be found in somatic proprioception the structure of exteroceptive perception and prelinguistic forms of social interaction The author uses these primitive forms of self consciousness to dissolve the paradox of self consciousness and to show how the two questions can be given an affirmative answer

The Self and its Emotions Kristján Kristjánsson, 2010-02-08 If there is one value that seems beyond reproach in modernity it is that of the self and the terms that cluster around it such as self esteem self confidence and self respect It is not clear however that all those who invoke the self really know what they are talking about or that they are all talking about the same thing What is this thing called self then and what is its psychological philosophical and educational salience More specifically what role do emotions play in the creation and constitution of the self This book proposes a realist emotion grounded conception of selfhood In arguing for a closer link between selfhood and emotion than has been previously suggested the author critically explores and integrates self research from diverse academic fields This is

a provocative book that should excite anyone interested in cutting edge research on self issues and emotions that lies at the intersection of psychology philosophy of mind moral philosophy and moral education **Regarding Nature** Andrew McLaughlin,1993-01-01 McLaughlin philosophy City U of New York argues that industrialism is the cause of our current environmental crisis and that the solution requires a fundamental change in how we understand nature and humanity He reviews the capitalist socialist industrial and scientific views of nature the ideology of control anthropocentrism and other topics Paper edition unseen 16 95 Annotation copyright by Book News Inc Portland OR **The Body and the Self** Jose Luis Bermudez,Naomi Eilan,Anthony Marcel,1998-01-23 The Body and the Self brings together recent work by philosophers and psychologists on the nature of self consciousness the nature of bodily awareness and the relation between the two The central problem addressed is How is our grasp of ourselves as one object among others underpinned by the ways in which we use and represent our bodies The contributors take up such issues as how should we characterize the various distinctive ways we have of being in touch with our own bodies in sensation proprioception and action How exactly does our grip on our bodies as objects connect with our ability to perceive the external environment and with our ability to engage in various forms of social interaction Can any of these ways of representing our bodies affect a bridge between body and self **The Conceptual Self in Context** Ulric Neisser,David A. Jopling,1997-08-13 This book explores the self concept its cultural psychopathological and philosophical implications

Yeah, reviewing a books **The Ecological Self** could be credited with your close connections listings. This is just one of the solutions for you to be successful. As understood, exploit does not recommend that you have astonishing points.

Comprehending as capably as covenant even more than further will manage to pay for each success. next to, the broadcast as well as keenness of this The Ecological Self can be taken as competently as picked to act.
