The Economics and Politics of the Slowdown in Regulatory Reform, 1996      The Economics and Politics of the Slowdown in Regulatory Reform Roger G. Noll, 1999      **Reviving Regulatory Reform** Robert William Hahn, 2000 This study into regulatory reform shows that technological impacts on the economic benefits and costs of regulation and a deeper understanding of the social effects of the regulatory institution are driving policymakers to question the familiar and to propose daring changes      *OECD Reviews of Regulatory Reform: China 2009 Defining the Boundary between the Market and the State* OECD, 2009-05-05 This review of China's regulatory system focuses on the overall economic context for regulatory reform the government's capacity to manage regulatory reform competition policy and enforcement and market openness      **Managing the Regulatory Process** J. Luis Guasch, Pablo Tomas Spiller, 1999-01-01 developing countries complementing their far reaching privatization programs are engaged in deregulating various sectors of their economies and devising new regulatory frameworks for others particularly the utilities sectors As economies become more open pressures on countries to become more competitive drive the call for regulatory reform to reduce costs and foster increased productivity competitiveness and growth This report provides an overview of the costs and benefits of regulation throughout the world It provides case histories of regulation in different countries developed and developing and in various sectors such as transportation utilities and power It presents different strategies that were employed Furthermore it identifies lessons learned and lays the foundations for a best practice scenario for other countries to adopt While the challenges to regulatory reform are considerable so are the efforts that developing countries are making to face them These lessons when properly adapted to each country's own environment can significantly increase the likelihood of effective regulation      The Quality of Regulatory Analyses United States. **of the Japanese Financial Big Bang** Tetsuro Toya, 2006-04-06 In 1996 the Japanese government introduced a policy package initiating massive deregulation and liberalization in the nation's financial sector referred to as Japan's financial Big Bang. This book argues that the emergence of the Big Bang Initiative poses numerous challenges to conventional interpretations of Japanese politics and represents a clear case of institutional change in Japanese finance. Whereas many observers stress continuity in Japanese politics, this book argues that the emergence in the 1990s of performance failures and scandals attributed to the bureaucracy as well as the increase in the likelihood of a change in government in this period led policymaking patterns surrounding the Big Bang to differ radically from those dominating public policymaking in the past. These developments led to change in the nature of the alliance between the ruling Liberal Democratic Party (LDP) and the Ministry of Finance (MOF) to a shift in priorities within the MOF and to a heightened role for the public in policymaking. The result was that the MOF, long perceived as entrenched and seeking to maximize tangible tokens of organizational power, became more than willing to launch the Big Bang despite the fact that these reforms would strip the ministry of many of its regulatory tools and sever the ministry's close ties with the financial sector. The book also argues that these new developments prevented financial industry actors from forestalling these reforms as they had done in the past with other reforms similarly threatening the viability of weaker firms. The findings reveal that not only politicians but also bureaucrats and interest groups have reasons to pursue public support to enhance their respective political influence. Consequently, well-organized groups do not always prevail over the unorganized public.

**The Supply-side Revolution** United States. Congress. Joint Economic Committee, 2000. McNair Paper 57. Argues that the demands placed by military officers on the provisions of the Dayton agreement reflect a steady increase in the influence of military officers in crafting defense policy rather than the recognition of any lessons learned in Somalia or Haiti.

**Regulatory quality in Europe** Claudio Radaelli, Fabrizio De Francesco, 2013-07-19 The European Union and its member states are investing in ambitious programmes for better regulation and targets of regulatory quality. This book, available in paperback for the first time, lifts the veil of excessively optimistic propositions covering the whole better regulation agenda. It provides an innovative conceptual framework to handle the political complexity of regulatory governance. It approaches better regulation as an emerging public policy with its own political context, actors, problems, rules of interaction, instruments, activities, and impacts. Focusing on the key tools of impact assessment, consultation, simplification, and access to legislation, the authors provide fresh empirical evidence on the progress made in the member states and in Brussels, drawing on an extensive research project and an original survey of directors of better regulation programmes in Europe. Radaelli and De Francesco show how indicators define, measure, and appraise better regulation policy, linking measures to policy processes in which the stakeholders learn by monitoring. Although better regulation is a top priority for competitiveness in Europe and the legitimacy of EU policy, the level of commitment and the

development of tools vary considerably The major challenge for better regulation is institutionalisation this calls for clear choices in terms of what the EU wants from better regulation Essential reading for academics political scientists lawyers and public economists and policy makers in charge of regulatory reforms in governments and international organisations

reforms so as to protect specific parts of the population and there are ways to experiment gradually to avoid costly policy mistakes
