

THE ECONOMY OF THE EARTH

Philosophy, Law, and the Environment

SECOND EDITION

Mark Sagoff

The background of the cover is a classic landscape painting. In the foreground on the left, a large, dark evergreen tree stands on a rocky outcrop. A river or lake flows through the center of the valley, reflecting the light. In the distance, rolling mountains are visible under a hazy sky. The overall tone is serene and naturalistic.

The Economy Of The Earth Philosophy Law And The Environment:

The Economy of the Earth Mark Sagoff, 2007-12-03 Mark Sagoff draws on the last twenty years of debate over the foundations of environmentalism in this comprehensive revision of *The Economy of the Earth* Posing questions pertinent to consumption cost benefit analysis the normative implications of neo Darwinism the role of the natural in national history and the centrality of the concept of place in environmental ethics he analyses social policy in relation to the environment pollution the workplace and public safety and health Sagoff distinguishes ethical from economic questions and explains which kinds of concepts arguments and processes are appropriate to each He offers a critique preference and willingness to pay as measures of value in environmental economics and defends political cultural aesthetic and ethical reasons to protect the natural environment

Beyond Mothering Earth Sherilyn Macgregor, 2011-11-01 Women's environmental activism is often described in maternalist terms as if motherhood and caring for the environment go hand in hand While feminists celebrate this connection women and all those who care for people and environments are facing increasing burdens and decreasing time for civic engagement In *Beyond Mothering Earth* MacGregor argues that celebrations of earthcare as women's unique contribution to the search for sustainability often neglect to consider the importance of politics and citizenship in women's lives Drawing on interviews with women who juggle private caring with civic engagement in quality of life concerns she proposes an alternative a project of feminist ecological citizenship that affirms the practice of citizenship as an intrinsically valuable activity while recognizing the foundational aspects of caring labour and natural processes that allow its specificity to flourish *Beyond Mothering Earth* provides an original and empirically grounded understanding of women's involvement in quality of life activism and an analysis of citizenship that makes an important contribution to contemporary discussions of green politics globalization neoliberalism and democratic justice It will be of value to scholars and activists interested in the politics of environmental sustainability and the shifting meanings of citizenship in an increasingly vulnerable world

Environmental Security and Environmental Management: The Role of Risk Assessment Benoit Morel, Igor Linkov, 2007-05-22 The concept of environmental security has emerged as one basis for understanding international conflicts This phrase can mean a variety of things It can signify security issues stemming from environmental concerns or conflicting needs or it can mean that the environment is treated as a resource for the long term and the question is what should be done today to preserve the quality of the environment in the future In the same way that energy security is about ensuring access to energy for the long run it can also mean that pressing environmental concerns create a situation where different countries and communities are forced to collaboratively design a unified response even if cooperation is not generally in the logic of their relations Over the last several years the authors of this book and their colleagues have tried to demonstrate the power of risk assessment and decision analysis as valuable tools that decision makers should use for a broad range of environmental problems including environmental security Risk analysis is almost more a state of mind or a way of

looking at problems than it is a kind of algorithm or a set of recipes It projects a kind of rationality on problems and forces a certain degree of quantitative rigor as opposed to the all too common tendency of making environmental recommendations based on anecdotal evidence

Key Thinkers on the Environment Joy A. Palmer Cooper, David E. Cooper, 2017-09-14 Key Thinkers on the Environment is a unique guide to environmental thinking through the ages Joy A Palmer Cooper and David E Cooper themselves distinguished authors on environmental matters have assembled a team of expert contributors to summarize and analyse the thinking of diverse and stimulating figures from around the world and from ancient times to the present day Among those included are philosophers such as Rousseau Kant Spinoza and Heidegger activists such as Chico Mendes and Wangari Maathai literary giants such as Virgil Goethe and Wordsworth major religious and spiritual figures such as Buddha and St Francis of Assisi eminent scientists such as Darwin Lovelock and E O Wilson Lucid scholarly and informative the essays contained within this volume offer a fascinating overview of humankind's view and understanding of the natural world

Earth Follies Joni Seager, 2019-03-21 First published in 1993 The question of agency is essential to our understanding of environmental problems who is responsible and why Threats such as ozone depletion global warming and overconsumption are all precipitated by the powerful institutions which shape modern life institutions which are overwhelmingly controlled by men and dominated by masculine presumptions Joni Seager argues that the gender bias inherent in western culture is inextricably linked to our environmental crisis She analyses the traditional institutes of power governments the military and transnational corporations and also takes a critical look at the equally patriarchal environmental establishment comparing the work of the official environmental movement grounded in masculine thought with the smaller scale direct actions taken by women driven to protect their homes and communities *Earth Follies* represents an incisive and utterly convincing feminist critique of our environmental crises and offers radical and productive priorities for the environmental agenda

The Routledge Companion to Ethics John Skorupski, 2010-06-21 The Routledge Companion to Ethics is an outstanding survey of the whole field of ethics by a distinguished international team of contributors Over 60 chapters are divided into six clear sections the history of ethics meta ethics perspectives from outside ethics ethical perspectives morality debates in ethics The Companion opens with a comprehensive historical overview of ethics including chapters on Plato Aristotle Hume and Kant and ethical thinking in China India and the Arabic tradition The second part covers the domain of meta ethics The third part covers important challenges to ethics from the fields of anthropology psychology sociobiology and economics The fourth and fifth sections cover competing theories of ethics and the nature of morality respectively with entries on consequentialism Kantian morality virtue ethics relativism evil and responsibility amongst many others A comprehensive final section includes the most important topics and controversies in applied ethics such as rights justice and distribution the end of life the environment poverty war and terrorism The Routledge Companion to Ethics is a superb resource for anyone interested in the subject whether in philosophy or related disciplines such as politics

education or law Fully indexed and cross referenced with helpful further reading sections at the end of each chapter it is ideal for those coming to the field of ethics for the first time as well as readers already familiar with the subject **Seeking Environmental Justice** Sarah Wilks,2008 Based on presentations made at the conference entitled Environmental Justice and Global Citizenship held in July 2006 at Oxford UK 14 papers consider environmental concerns against their social contexts Contributors address theories in environmental management as they pertain to society and to orientations in perverse ecologies the framework of sustainability including voluntary agreements and incentives class and conflict in environmental governance including the uses of effective conflict information management including the public debate on genetic modification and the differences between experts and laymen environmental activism education including environmental education in a course on ethics and international development and the effects of free trade corporate capitalism and empowerment of professionals on sustainability and international environmental law Environmental Rights Steve Vanderheiden,2017-07-05 The essays selected for this volume present critical viewpoints from the debate about the need to establish rights on behalf of greater environmental protection Three main areas for developing environmental rights are surveyed including extensionist theories that link existing rights for example to subsistence or territory to threats of harm from exacerbated resource scarcity pollution or rapid environmental change proposals for rights to specified environmental goods or services such as rights to a safe environment and the capacity to assimilate greenhouse gas emissions and rights that protect the interests of parties not currently recognized as having rights including nonhuman subjects natural objects and future generations This volume captures the potential for and primary challenges to the development of rights as instruments for safeguarding the planet s life support capacities and features proposals and analyses which argue the need to create an avenue of recourse against ecological degradation whether on behalf of human or nonhuman right holders *Environmental Politics* Robert Garner,Lyn Jaggard,2011-08-17 The impact of the environment in general and climate change in particular is now entrenched as a key political concern The comprehensively revised third edition of this popular text provides an accessible concise and international introduction to the politics of the environment in theory and practice at both the national and global level Values at Sea Dorinda G. Dallmeyer,2003 The human impact on vast areas of the oceans remains relatively unregulated Sometimes in fact the only controls over our exploitation of marine resources lie in our environmental consciousness While the field of environmental ethics has explored rights and duties for land use stewardship and policy relatively little attention has been given to comparable issues of marine environments Values at Sea makes an important step toward moving environmental ethics discussions into a broader framework Gathered here are fifteen papers by an interdisciplinary group of scholars including ethicists marine scientists anthropologists economists geographers lawyers and activists From the Great Lakes to the Pacific Islands from the open sea to coastal areas the papers cover a broad array of ethical issues and policy matters related to such topics as the valuation of marine life indigenous

peoples knowledge and environmental stewardship endemic and exotic species aquaculture oil spills and species protection

Reimagining Ethics Matteo Andreozzi, 2025-08-24 Several environmental problems are currently seriously undermining the traditional belief that the moral community should be restricted to human beings only New scientific theories especially in the fields of biology ethology and ecology together with recent scientific discoveries demonstrating how human activities are jeopardizing ecosystem services urge for a paradigmatic change in our moral convictions Environmental ethics has taken up the challenge and opened an extremely urgent and inspiring call for philosophical research This is the call for extending the moral community to non human and non paradigmatic entities regarding them as moral patients The main aim of this book is to analyze the possibility and the legitimacy of a non anthropocentric environmental ethic In pursuing this aim I primarily demonstrate the possibility and need to extend the status of moral patient beyond the ideal paradigmatic human being I also provide an original categorization of several theoretical projects that have been proposed in the last few decades Secondly this book comprises a constructive critique of the most significant moral theories debated in the field and outlines a personal theoretical proposal for a new environmental ethic My claim is that the refusal of ethical and ontological supremacy of human beings is not only necessary but also sufficient to set the foundation for a formally and materially valid ethical system Even without abandoning the most accepted forms of moral epistemology it is nonetheless possible to admit the need to respect different kinds of non human and non paradigmatic moral patients Environmental Justice and the Rights of

Indigenous Peoples Laura Westra, 2012 More than 300 million people in over 70 countries make up the worlds indigenous populations Yet despite ever growing pressures on their lands environment and way of life through outside factors such as climate change and globalization their rights in these and other respects are still not fully recognized in international law In this incisive book Laura Westra deftly reveals the lethal effects that damage to ecological integrity can have on communities Using examples in national and international case law she demonstrates how their lack of sufficient legal rights leaves indigenous peoples defenceless time and again in the face of governments and businesses who have little effective incentive to consult with them let alone gain their consent in going ahead with relocations mining plans and more The historical background and current legal instruments are discussed and through examples from the Americas Africa Oceania and the special case of the Arctic a picture emerges of how things must change if indigenous communities are to survive It is a warning to us all from the example of those who live most closely in tune with nature and are the first to feel the impact when environmental damage goes unchecked **Environmental Resources** A.S. Mather, K. Chapman, 2018-10-08

Environmental Resources provides a comprehensive text for undergraduate resource management courses It begins with an introduction to natural and environmental resources and then considers them in the context of politics time and space

Economic Institutions and Environmental Policy Antonio Nicita, 2019-01-15 This title was first published in 2001 This wide ranging and comprehensive collection investigates the background to environmental economic development over the

last thirty years and the political implications of new directions resulting from technological and cultural changes in environmental issues It examines the application of economic analysis to environmental problems in the past and solutions to the current issues of water soil air energy waste and urban ecology discussing the implications of political decisions cultural changes and technological constraints It will prove a stimulating resource for students academics researchers and policy makers alike Ibss: Political Science: 1988 British Library of Political and Economic Science,1992 This bibliography lists the most important works in political science published in 1988 **Living in Integrity** Laura Westra,1998 This innovative book takes a new look at environmental ethics and the need for ecological and biological integrity Laura Westra explores the necessity for radical alteration not only of interpersonal ethics but also of social institutions and public policy In the process Westra denies the validity of majority rule in environmentally ethical concerns Issues discussed in the book include the link between ecological integrity and human health an environmental evaluation of business and technology biotechnology and transgenics in agriculture and aquaculture and the environmental ethics of the ancient Greeks and Kant Living in Integrity is a valuable book for philosophers and environmentalists alike Thinking Through the Environment Mark J. Smith,2005-09-30 This reader brings together material from ecological thought environmental policy environmental philosophy social and political thought historical sociology and cultural studies The extracts tell the story of the way the natural environment has been understood in the modern world and how this has recently been questioned as contemporary societies are seen as characterised by uncertainty and complexity The literature guides the reader through the conventional grounds for thinking about rights and obligations in relation to future generations non human animals and the biotic communities bringing each into question This then leads into a critical examination of social and political theories and their capacity for drawing on ecological thought Each of the seven sections of readings is introduced by the editor who locates the set of readings within the specific themes and issues at the heart of each section This broad reaching and thought provoking set of readings stresses the diversity of response to environmental problems both within and between anthropocentric and ecocentric approaches and will encourage the reader to examine how they are manifested in the areas of environmental ethics policy analysis and social and political theory *FUNDAMENTAL ECONOMICS - Volume II* Mukul Majumdar , Ian Wills,Pasquale M.
