The Resurrection and Immortality William West,2006-08 THE RESURRECTION AND IMMORTALITY Is man born with an immortal soul or do the saved put on immortality at the resurrection This is one of the most important questions of all times It has more influence on our conception of our nature our view of life in this world and life after death the nature of God than any other question The resurrection and an undying immortal soul are not compatible If one is true then the other one cannot be YOUR WHOLE THEOLOGY what you believe IS DETERMINED BY YOUR VIEW OF THE SOUL Not only does man now having an immortal soul make the resurrection impossible it makes the judgment be passed and the second coming of Christ pointless for there could not be a resurrection or a judgment at His coming The resurrection doctrine of unconditional immortality are contradictory to each other You must choose one or the other You cannot believe both Christ taught the resurrection It is our only hope of life after death not now having immortality and never dying The undead cannot be raised If the soul is immortal and never dies there cannot be a resurrection of those not dead If there is to be a resurrection of the dead the dead cannot be alive cannot be living immortal souls The doctrine of unconditional immortality Changes the nature of God makes Him cruel and sadistic Changes the message we preach to the lost and their fate whether they will have an eternal life with torment or a second death form which there will never be a resurrection Changes the nature of man whether he is now mortal or immortal Changes the nature of the resurrection of Christ whether He was dead and raised by God or only His earthly body was dead and He just came back from Heaven to it Changes the nature of our resurrection whether we are dead and resurrected or just come back from somewhere The resurrection an immortal soul The wages of sin is death the wages of sin is an eternal life of torment

For over half a millennium the Empire of the Vampyres stood united and unchallenged Immortality was their greatest
weapon The world was their playground But therein lay their greatest weakness a secret that created their entire race which
also held the power to destroy it And so came the dark years in the year 2006 AD when the Source a tiny but powerful
creature whose blood fed their immortality was stolen With their only lifeline gone their Empire stood on the verge of
collapse plagued by accelerated aging And so the search began and for five years all of immortal kind waited in darkness But
in the midst of their desperation facing death fate would bring the Source to the most unlikely person a seemingly ordinary
nineteen year old boy named Hunter Everett Loyalties will be questioned Friendships will be challenged Love will be tested
This is his story this will be his legacy A Means to an End William R. Clark,2002-02-28 Why do we age Is aging inevitable
Will advances in medical knowledge allow us to extend the human lifespan beyond its present limits Because growing old has
long been the one irreducible reality of human existence these intriguing questions arise more often in the context of science
fiction than science fact But recent discoveries in the fields of cell biology and molecular genetics are seriously challenging
the assumption that human lifespans are beyond our control With such discoveries in mind noted cell biologist William R
Clark clearly and skillfully describes how senescence begins at the level of individual cells and how cellular replication may
be bound up with aging of the entire organism He explores the evolutionary origin and function of aging the cellular
connections between aging and cancer the parallels between cellular senescence and Alzheimer s disease and the insights
gained through studying human genetic disorders such as Werner s syndrome that mimic the symptoms of aging Clark also
explains how reduction in caloric intake may actually help increase lifespan and how the destructive effects of oxidative
elements in the body may be limited by the consumption of antioxidants found in fruits and vegetables In a final chapter
Clark considers the social and economic aspects of living longer the implications of gene therapy on senescence and what we
might learn about aging from experiments in cloning This is a highly readable provocative account of some of the most far
reaching and controversial questions we are likely to ask in the next century **The Haunting of the Immortal Killer**
