The Egalitarians Human And Chimpanzee An Anthropological View Of Social Organization:

The Egalitarians - Human and Chimpanzee Margaret Power,1991-09-26 An innovative book challenging the perceived view of chimpanzees as being aggressive and fiercely territorial *The Chimpanzees of the Budongo Forest* Vernon Reynolds,2005-06-30 Unlike humans who came down from the trees and developed bipedal locomotion chimpanzees have remained in the original habitat of our ancestors the tropical rainforests of Africa In this book Vernon Reynolds describes in detail the work of a large number of students and senior researchers on the wild chimpanzees of the Budongo Forest Reserve in Western Uganda He presents a coherent and in depth account of one chimpanzee community of more than 60 individuals living in the Sonso area in the middle of the Budongo Forest which he and his colleagues have studied intensively over the last 15 years The chimpanzees have never been provisioned and live in an entirely natural state Reynolds describes their forest habitat their diet and culture their social organization and behaviour their diseases and the threats to them that derive from the actions of people in the surrounding villages the most serious of these being the presence of snares set by hunters to catch small antelopes and pigs As founder and head of the Budongo Forest Project Professor Reynolds has been responsible for compiling the numerous publications reports and dissertations written about these chimpanzees In this book he combines these new and often unpublished studies with past publications about Budongo Forest Where appropriate he also compares the Budongo chimpanzees with wild chimpanzees studied at other sites across Africa The result is the most comprehensive account of the Budongo chimpanzees ever published with a wealth of referenced material that will serve as a source of information for many years to come **The Political Economy of Social Inequalities** Vincente

Navarro,2020-11-25 In the last two decades of the 20th century we witnessed a dramatic growth in social inequalities within and among countries This has had a most negative impact on the health and quality of life of large sectors of the populations in the developed and underdeveloped world This volume analyzes the reasons for this increase in inequalities and its consequences for the well being of populations Scholars from a variety of disciplines and countries analyze the different dimensions of this topic **Origins of Psychopathology** Horacio Fabrega (Jr.),2002 What are the origins of human

psychopathology Is mental illness a relatively recent phenomenon or has it been with us throughout evolution In *Origins of Psychopathology* Horacio F rega Jr employs principles of evolutionary biology to better understand the significance of mental illness He explores whether what psychiatry has categorized as mental disorders could have existed during earlier phases of human evolution F brega approaches the prominent features of mental disorders as adaptive responses to the environment and life s circumstances which in turn can only be understood in the context of our evolutionary past Taking his cue from theoretical issues raised by research into primate behavior and early hominid evolution he poses the question What if any aspects of mental illness are rooted in our evolution Does mental illness occur in primates and other animals and if so what does this tell us about mental illness in human evolution How has mental illness played an adaptive role How has the

development of language and higher cognitive functions affected characteristics of psychopathology F brega synthesizes insights from both the clinical and the evolutionary points of view This facet of psychopathology which involves its origins and manifestations viewed across the expanse of human evolution has until now been largely neglected in psychiatric education theory and practice *Medical Sociology: Social structures and health* Graham Scambler,2005 [A Socio-Legal History of the Laws of War](#) Christopher W. Mullins,2023-08-24 Rooted in critical historical documents from the Tudors to the American Revolution this rich history the first of two volumes provides a cogent understanding of how the current historical moment has developed as well as of the potential paths that lie ahead *The Cultured Chimpanzee* W. C. McGrew,2004-10-21 Publisher Description **Unhealthy Societies** Richard G. Wilkinson,2002-09-11 Among developed countries it is not the richest societies that have the best health but those that have the smallest income differences between rich and poor Why This book shows that social cohesion is crucial to the quality of life **The War of the Sexes** Paul Seabright,2013-10-13 Men and women have long sought different things The result Seemingly inevitable conflict Yet we belong to the most cooperative species on the planet Isn t there a way we can use this capacity to achieve greater harmony and equality between the sexes In *The War of the Sexes* Paul Seabright draws on biology sociology anthropology and economics to argue that there is but first we must understand how the tension between conflict and cooperation developed in our remote evolutionary past how it shaped the modern world and how it still holds us back both at home and at work From publisher s description *The Impact of Inequality* Richard G. Wilkinson,2020-11-25 In this book pioneering social epidemiologist Richard Wilkinson shows how inequality affects social relations and well being In wealthy countries health is not simply a matter of material circumstances and access to health care it is also how your relationships and social standing make you feel about life Using detailed evidence from rich market democracies the book addresses people s experience of inequality and presents a radical theory of the psychosocial impact of class stratification The book demonstrates how poor health high rates of violence and low levels of social capital all reflect the stresses of inequality and explains the pervasive sense that despite material success our societies are sometimes social failures What emerges is a new conception of what it means to say that we are social beings and of how the social structure penetrates our personal lives and relationships

Bibliographie Internationale D'anthropologie Sociale Et Culturelle 1991 British Library of Political and Economic Science,1993 The IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences **The Group Dimension** Claire Bacha,2024-07-24 *The Group Dimension* presents a thorough exploration of the history and theory of the group dimension particularly in the context of modern capitalist society The book traces the development of capitalism from feudalism where the first polis groups can be identified and describes the growth of the power of the state prescribed by John Maynard Keynes to form neoliberalism Bacha then explores the deep history of human groups examines how our

brains are built for and by multibody interactions and understandings and provides an overview of our knowledge of groups building on findings from group analysis The book concludes by exploring how an understanding of groups their facilitation and their consciousness redefines current individualistic and autistic freedom to build the new world through dialogue The Group Dimension will be essential reading for anyone involved in groups as practitioners or clients It will also be of interest to readers looking to learn more about groups in the context of modern politics social and liberation movements

National Library of Medicine Current Catalog National Library of Medicine (U.S.),1992 *The Dynamics of Ancient Empires* Ian Morris,Walter Scheidel,2009-01-13 The world s first known empires took shape in Mesopotamia between the eastern shores of the Mediterranean Sea and the Persian Gulf beginning around 2350 BCE The next 2 500 years witnessed sustained imperial growth bringing a growing share of humanity under the control of ever fewer states Two thousand years ago just four major powers the Roman Parthian Kushan and Han empires ruled perhaps two thirds of the earth s entire population Yet despite empires prominence in the early history of civilization there have been surprisingly few attempts to study the dynamics of ancient empires in the western Old World comparatively Such grand comparisons were popular in the eighteenth century but scholars then had only Greek and Latin literature and the Hebrew Bible as evidence and necessarily framed the problem in different more limited terms Near Eastern texts and knowledge of their languages only appeared in large amounts in the later nineteenth century Neither Karl Marx nor Max Weber could make much use of this material and not until the 1920s were there enough archaeological data to make syntheses of early European and west Asian history possible But one consequence of the increase in empirical knowledge was that twentieth century scholars generally defined the disciplinary and geographical boundaries of their specialties more narrowly than their Enlightenment predecessors had done shying away from large questions and cross cultural comparisons As a result Greek and Roman empires have largely been studied in isolation from those of the Near East This volume is designed to address these deficits and encourage dialogue across disciplinary boundaries by examining the fundamental features of the successive and partly overlapping imperial states that dominated much of the Near East and the Mediterranean in the first millennia BCE and CE A substantial introductory discussion of recent thought on the mechanisms of imperial state formation prefaces the five newly commissioned case studies of the Neo Assyrian Achaemenid Persian Athenian Roman and Byzantine empires A final chapter draws on the findings of evolutionary psychology to improve our understanding of ultimate causation in imperial predation and exploitation in a wide range of historical systems from all over the globe Contributors include John Haldon Jack Goldstone Peter Bedford Josef Wieseh fer Ian Morris Walter Scheidel and Keith Hopkins whose essay on Roman political economy was completed just before his death in 2004 *Mimesis and the Human Animal* Robert Storey,1996-12-16 In *Mimesis and the Human Animal* Robert Storey argues that human culture derives from human biology and that literary representation therefore must have a biological basis As he ponders the question What does it mean to say that art imitates

life he must consider both What is life and What is art A unique approach to the subject of mimesis Storey s book goes beyond the politicizing of literature grounded in literary theory to develop a scientific basis for the creation of literature and art

Origins of Altruism and Cooperation Robert W. Sussman, C. Robert Cloninger, 2011-08-02 This book is about the evolution and nature of cooperation and altruism in social living animals focusing especially on non human primates and on humans Although cooperation and altruism are often thought of as ways to attenuate competition and aggression within groups or are related to the action of selfish genes there is increasing evidence that these behaviors are the result of biological mechanisms that have developed through natural selection in group living species This evidence leads to the conclusion that cooperative and altruistic behavior are not just by products of competition but are rather the glue that underlies the ability for primates and humans to live in groups The anthropological primatological paleontological behavioral neurobiological and psychological evidence provided in this book gives a more optimistic view of human nature than the more popular conventional view of humans being naturally and basically aggressive and warlike Although competition and aggression are recognized as an important part of the non human primate and human behavioral repertoire the evidence from these fields indicates that cooperation and altruism may represent the more typical normal and healthy behavioral pattern The book is intended both for the general reader and also for students at a variety of levels graduate and undergraduate it aims to provide a compact accessible and up to date account of the current scholarly advances and debates in this field of study and it is designed to be used in teaching and in discussion groups The book derived from a conference sponsored by N S F the Wenner Gren Foundation for Anthropological Research the Washington University Committee for Ethics and Human Values and the Anthropedia Foundation for the study of well being

The Moral Lives of Animals Dale Peterson, 2011-03-15 Wild elephants walking along a trail stop and spontaneously try to protect and assist a weak and dying fellow elephant Laboratory rats finding other rats caged nearby in distressing circumstances proceed to rescue them A chimpanzee in a zoo loses his own life trying to save an unrelated infant who has fallen into a watery moat The examples above and many others argues Dale Peterson show that our fellow creatures have powerful impulses toward cooperation generosity and fairness Yet it is commonly held that we Homo sapiens are the only animals with a moral sense that we are somehow above and apart from our fellow creatures This rigorous and stimulating book challenges that notion and it shows the profound connections the moral continuum that link humans to many other species Peterson shows how much animal behavior follows principles embodied in humanity s ancient moral codes from the Ten Commandments to the New Testament Understanding the moral lives of animals offers new insight into our own

Behavioural Diversity in Chimpanzees and Bonobos Christophe Boesch, Gottfried Hohmann, Linda Frances Marchant, 2002-08 Chimpanzees Pan troglodytes and bonobos Pan paniscus otherwise known as pygmy chimpanzees are the only two species of the genus Pan As they are our nearest relatives there has been much research devoted to investigating the similarities and differences between them This book

offers an extensive review of the most recent observations to come from field studies on the diversity of Pan social behaviour with contributions from many of the world's leading experts in this field. A wide range of social behaviours is discussed including tool use, hunting, reproductive strategies and conflict management as well as demographic variables and ecological constraints. In addition to interspecies behavioural diversity, this text describes exciting new research into variations between different populations of the same species. Researchers and students working in the fields of primatology, anthropology and zoology will find this a fascinating read.

A History of Leadership Morgen Witzel, 2019-12-06

The evolution of leadership into a widely accepted concept occurred without any shared understanding and acceptance of its meaning and relevance in contemporary society. Why do some people become leaders? What is the source and legitimacy of leadership power? This book journeys into the heart of the relationship between leaders and followers, the social space and the arena where both contest and collaboration take place, and leadership itself is played out. In the book, Morgen Witzel moves beyond traditional traits and skills framing, offering a fresh historical analysis that involves many different actors with different motives and needs. By analysing the evolution of power relationships, the book analyses the interactions around how power is used and control is bargained for to illuminate the centrepiece of leadership. A wide-ranging history of a slippery subject, this book provides students, scholars and reflective practitioners with an empirical historical base on which to test their own ideas and experiences.
