NASA EP. United States. National Aeronautics and Space Administration, 1968 **SATA Autobiography Series** Joyce Nakamura, 1992-11-26 A collection of autobiographical essays written by prominent authors and illustrators of books for children and young adults **Life in the Universe, 5th Edition** Jeffrey Bennett, Seth Shostak, Nicholas Schneider, Meredith MacGregor, 2022-05-31 The world's leading textbook on astrobiology ideal for an introductory one semester course and now fully revised and updated Are we alone in the cosmos How are scientists seeking signs of life beyond our home planet Could we colonize other planets moons or even other star systems This introductory textbook written by a team of four renowned science communicators educators and researchers tells the amazing story of how modern science is seeking the answers to these and other fascinating questions They are the questions that are at the heart of the highly interdisciplinary field of astrobiology the study of life in the universe Written in an accessible conversational style for anyone intrigued by the possibilities of life in the solar system and beyond Life in the Universe is an ideal place to start learning about the latest discoveries and unsolved mysteries in the field From the most recent missions to Saturn's moons and our neighboring planet Mars to revolutionary discoveries of thousands of exoplanets from the puzzle of life's beginning on Earth to the latest efforts in the search for intelligent life elsewhere this book captures the imagination and enriches the reader's understanding of how astronomers planetary scientists biologists and other scientists make progress at the cutting edge of this dynamic field Enriched with a wealth of engaging features this textbook brings any citizen of the cosmos up to speed with the scientific quest to discover whether we are alone or part of a universe full of life An acclaimed text designed to inspire students of all backgrounds to explore foundational questions about life in the cosmos Completely revised and updated to include the latest developments in the field including recent exploratory space missions to Mars frontier exoplanet science research on the origin of life on Earth and more Enriched with helpful learning aids including in chapter Think about It questions optional Do the Math and Special Topic boxes Movie Madness boxes end of chapter exercises and problems quick quizzes and much more Supported by instructor's resources including an illustration package and test bank available upon request Contemporary Authors New Revision Susan Trosky, 1993-01-29 In response to the escalating need for up to date information on writers Contemporary Authors New Revision Series brings researchers the most recent data on the world's most popular authors These exciting and unique author profiles are essential to your holdings because sketches are entirely revised and up to date and completely replace the original Contemporary Authors entries For your convenience a soft cover cumulative index is sent biannually While Gale strives to replicate print content some content may not be available due to rights restrictions Call your Sales Rep for details *The Science Teacher*, 1979 Some issues are accompanied by a CD ROM on a selected topic *Masters of the Universe* Helge Kragh, 2014-11-20 How did our modern picture of the universe come into being Masters of the Universe tells this fascinating story in an unusual format that blends factual and fictional elements It is based on a series

of interviews that a fictional person conducted with leading astronomers and physicists between 1913 and 1965 Among the interviewed scientists are giants such as Albert Einstein Edwin Hubble and George Gamow but also scientists who are less well known today or not primarily known as cosmologists such as Karl Schwarzschild Paul Dirac and Svante Arrhenius By following the interviews the reader gets a lively and almost authentic impression of the problems that faced this early generation of cosmologists Although the interviews are purely fictional a product of the author s imagination they could have taken place in just the way that is described They are solidly based on historical facts and moreover supplemented with careful annotations and references to the literature In this way the book bridges the gap between scholarly and popular history of science
