Anastasiya Kornetzki, 2012-03-01 This book is devoted to the analysis of cross media and cross cultural peculiarities of Russian British and American media discourse from the intertextual perspective The study of a complex variety of intertextual links which exist between texts and genres is a contemporary aspect in the theory of intertextuality There are numerous theoretical approaches in the study of intertextuality but there is a lack of an empirically profound framework for its analysis across many disciplines An interdisciplinary approach to the study of intertextuality is a necessary step to investigate this phenomenon comprehensively This book offers an alternative approach to the study of intertextuality singling out intra textual textual and inter genre levels on which this phenomenon comes to the fore The Tauchnitz Edition and Related Paperback Series Melanie Mienert, Stefan Welz, Dietmar Böhnke, 2024-11-26 The Tauchnitz Edition and Related Paperback Series English Literature in Your Pocket unites a broad variety of interests and different perspectives concerning the legacy of the Tauchnitz Edition in particular and English language paperback series in general It provides an international and interdisciplinary approach to the paperback revolution as part of media culture throughout the 19th and 20th centuries The Bernhard Tauchnitz Collection of British and American Authors initiated in 1841 was not only a successful entrepreneurial endeavor but a milestone in the history of print culture as well The Leipzig based Tauchnitz publishers renowned all over the world for their series of affordable pocket books in English produced more than 5000 volumes within the course of over 100 years Cultural and literary repercussions of this unique achievement have been far reaching since the late 19th century It pioneered a new way of mass market publishing innovative copyright arrangements and a close cooperation with many important English language novelists of the day Still in present times the Tauchnitz Edition and its successors are stimulating both academic research in various fields and the enthusiasm of collectors and readers

The New Coastal History David Worthington, 2017-10-17 This book provides a pathway for the New Coastal History Our littorals are all too often the setting for climate change and the political refugee and migration crises that blight our age Yet historians have continued in large part to ignore the space between the sea and the land Through a range of conceptual and thematic chapters this book remedies that Scotland a country where one is never more than fifty miles from saltwater provides a platform as regards the majority of chapters in accounting for and supporting the clusters of scholarship that have begun to gather around the coast The book presents a new approach that is distinct

Crossing The Strait James A.O.C. Brown,2012-04-19 The Strait of Gibraltar is a ubiquitous symbol of the supposed dividing line between Europe and the Muslim world This book re evaluates that perception with reference to new archival evidence about the links between the Gharb region of Morocco and Gibraltar and the establishment of the Moroccan consulate there focusing on the period around 1750 1850 It shows the development of a complex set of political social and economic relationships across the strait that connected Morocco to Gibraltar and beyond In the light of this evidence the book challenges prevailing arguments that emphasise the isolationist impulses of the Moroccan sultanate and Moroccan society and highlights the extent to which European expansion in this period was shaped by local responses

S. Miles,2014-07-01 Based on three decades of fieldwork throughout the developing world Scars of Partition is the first book to systematically evaluate the long term implications of French and British styles of colonialism and decolonization for ordinary people throughout the so called Third World It pays particular attention to the contemporary legacies of artificial boundaries superimposed by Britain and France that continue to divide indigenous peoples into separate postcolonial states In so doing it uniquely illustrates how the distinctive stamps of France and Britain continue to mark daily life along and behind these inherited borders in Africa Asia Oceania and the Caribbean Scars of Partition draws on political science anthropology history and geography to examine six cases of indigenous indentured and enslaved peoples partitioned by colonialism in West Africa West Indies South Pacific Southeast Asia South India and the Indian Ocean William F S Miles demonstrates that sovereign nations throughout the developing world despite basic differences in culture geography and politics still bear the underlying imprint of their colonial pasts Disentangling and appreciating these embedded colonial legacies is critical to achieving full decolonization particularly in their borderlands **Evaluating and Measuring the Value, Use and Impact of Digital Collections** Lorna M. Hughes,2012 A huge investment has been made in digitizing scholarly and cultural heritage materials through initiatives based in museums libraries and archives as well as higher education institutions The Digital Economy is an important component of institutional planning and much attention is given to the investment in digital projects and programmes However few initiatives have examined the actual use value and impact of digital collections and the role of digital collections in the changing information environment As the creative cultural and educational sector faces a period of restricted funding it is timely to re examine the use of the digital collections that have been created in the past twenty years and to consider their value to the institutions that host them and to the communities of users they serve This book brings together a group of international experts to consider the following key issues What is the role of digital resources in the research life cycle Do the arts and humanities face a data deluge How are digital collections to be sustained over the long term How is use and impact to be assessed What is the role of digital collections in the digital economy How is public engagement with digital cultural heritage materials to be assessed and supported This book will be of interest to academics librarians archivists and the staff of cultural heritage organizations as well as funders and other key stakeholders with an interest in the development and long term sustainability of digital collections Publisher s website **The Fight Over Food** Wynne Wright,Gerad Middendorf,2015-06-17 One problem with the food system is that price is the bottom line rather than having the bottom line be land stewardship an appreciation for the environmental and social value of small scale family farms

or for organically grown produce Interview with farmer in Skagit County Washington For much of the later twentieth century food has been abundant and convenient for most residents of advanced industrial societies The luxury of taking the safety and dependability of food for granted pushed it to the back burner in the consciousness of many Increasingly however this once taken for granted food system is coming under question on issues such as the humane treatment of animals genetically engineered foods and social and environmental justice Many consumers are no longer content with buying into the mainstream commodity driven food market on which they once depended Resistance has emerged in diverse forms from protests at the opening of McDonald s restaurants worldwide to ever greater interest in alternatives such as CSAs community supported agriculture fair trade and organic foods The food system is increasingly becoming an arena of struggle that reflects larger changes in societal values and norms as expectations are moving beyond the desire for affordable convenient foods to a need for healthy and environmentally sound alternatives In this book leading scholars and scholar activists provide case studies that illuminate the complexities and contradictions that surround the emergence of a new day in agriculture The essays found in *The Fight Over Food* analyze and evaluate both the theoretical and historical contexts of the agrifood system and the ways in which trends of individual action and collective activity have led to an accumulation of resistance that greatly affects the mainstream market of food production The overarching theme that integrates the case studies is the idea of human agency and the ways in which people purposefully and creatively generate new forms of action or resistance to facilitate social changes within the structure of predominant cultural norms Together these studies examine whether these combined efforts will have the strength to create significant and enduring transformations in the food system
