The Enemy Within Combating Corruption In Asia:

The Enemy Within Simon Tay, 2003 This book shares best practices and practical experiences from Asian countries and should serve as a resource book in the hands of counter corruption agencies and government leaders It examines common challenges and shared experiences and lays out tested strategies and solutions The Enemy Within, 2003 Preventing Corruption in Asia Ting Gong, Stephen K. Ma, 2011-05-30 Despite intensified governmental and public efforts at corruption control in recent years official transgression continues to surface in various ways of abusing the unique power and trust that a government holds Preventing Corruption in Asia addresses a number of crucial questions What institutional arrangements are necessary to ensure a clean and honest government What self regulatory capabilities must government institutions develop in order to maintain integrity How should a sense of ethical responsibility be instilled in the civil services Do special anti corruption agencies help keep government clean How will a regulatory framework of official conduct work properly How useful are anti corruption campaigns in containing corruption Focusing on a number of carefully selected countries in the Asia and Pacific region the book sets as its focal point the choice of institutional design in preventing corruption rather than treating corruption as a practical or technical problem to be corrected by strong political will and good anti corruption policy measures While focusing on institutional designs and policy choices the book also examines other aspects of clean government such as the social environment legal and regulatory framework role of the public and the impact of culture

Corporate Social Responsibility and Human Rights in Asia Robert J. Hanlon, 2014-04-16 As globalization has brought about new concerns and responsibilities for business particularly in the realm of human rights many multinational corporations MNC operating in Asia have argued that such rights are the responsibility of government However as globalization continues to improve market access for MNCs it increasingly exposes them to new forms of transnational social movements and as a result the private sector has emerged as one of the central stakeholders in the region s human rights dialogue Taking three of Asia s fastest emerging economies Cambodia China and Thailand as its starting point *Corporate Social Responsibility and Human Rights in Asia* explores the business case for corporate social responsibility human rights and anti corruption in the region In doing so it examines how industry perceives human rights and corruption within the corporate social responsibility CSR paradigm and builds on the argument that the CSR regime is a socially constructed concept Drawing on interviews with key stakeholders including business leaders nongovernmental organizations international organizations and government officials Robert Hanlon argues that industry perceives human rights as outside their sphere of influence that divergent stakeholder interests are side lining the human rights debate and that human rights are increasingly ignored in the quest for profit maximization This leads to the conclusion that human rights and corruption will remain peripheral business issues until stakeholders find new ways of creating space for CSR engagement and business actors will continue to marginalize the human rights issue so long as governments in the region let them This

interdisciplinary book draws on political science business and sociological perspectives and as such will be of great interest to students and scholars working across the fields of Asian business corporate social responsibility and business ethics human rights and international political economy

The Haze Problem in Southeast Asia Helena Varkkey, 2015-07-16

Despite the efforts of Southeast Asian governments and of ASEAN transboundary haze continues to be a major environmental problem in Southeast Asia This book demonstrates that the issue is complex and explains why efforts to solve the problem in purely political terms are ineffective and likely to continue to be ineffective The book shows how state led state incentivised agribusiness development lies at the heart of the problem leading to a large rise in palm oil production with extensive clearing of forests leading to deliberate or accidental fires and the resulting haze Moreover although the forest clearing is occurring in Indonesia many of the companies involved are Malaysian and Singaporean and further many of these companies have close relationships with the politicians and officials responsible for addressing the problem and who thereby have a conflict of interest The author concludes by discussing the huge difficulties involved in overturning this system of patronage politics

Managing Conflicts in a Globalizing ASEAN Mikio Oishi, 2019-11-11 This book investigates the patterns of conflict management in contemporary Southeast Asia The region has long been characterized by the twin process of state formation and nation building which has been responsible for most of the region's intrastate and interstate conflicts While this process is still ongoing regional conflicts and their management are increasingly affected by globalisation which not only serves as a new source of or exacerbating factor to conflict but also makes new instruments available for conflict management Employing the concepts of incompatibility management and mediation regime the book analyses the management of seven conflicts in the region the Rohingya crisis and the Kachin conflict in Myanmar the Khmer Krom conflict in Vietnam the West Papua conflict in Indonesia the political conflict in Thailand the Mekong River conflicts involving five Southeast Asian countries and China and the transboundary haze problem emanating from Indonesia The efforts to manage each of them are imagined as constituting a mediation regime and its effectiveness is assessed in terms of good governance Among the findings of the book is that the measures of manoeuvring around incompatibilities are employed predominantly in managing regional conflicts In intrastate conflicts which mostly involve ethnic minorities the authorities first aim to eliminate or impose its own position on ethnic parties When this strategy proves unsuccessful they have no choice but manoeuvre around incompatibilities which may eventually open up a space for mutual learning In interstate conflicts the manoeuvring around strategy works in a more straightforward manner contributing to regional stability However the stability is achieved at the cost of local communities and the natural environment which absorb the incompatibilities in conflict
