bodypositivity to understand how they relate to current body ideals Healthism and culture bound illnesses such as hysteria and eating disorders are examined to demonstrate the impact of commodified body ideals on consumers bodies An analysis of thinspiration images photographs of emaciated bodies shared on pro eating disorder blogs and websites suggests that the anorexic body represents the logical and fatal end point for the idealised body in consumer culture Fat acceptance selfies suggest there is a fourth mode of address empowering presence that has the potential to liberate consumers from the trap of visibleness produced by the other three modes of address In conclusion the book identifies some creative methods for producing selfies that evade commoditisation and discipline
