two countries were so strained that they could break up at any time The war the Continental Congress intended to wage would require money men and the experience of soldiers skilled in the art form of warfare such as it was waged in the 18th century The American resistance to power got organized with great difficulty but how could the American colonists hope to defeat the English in the art of war Get a deeper understanding of the American war of Independence thanks to this essay

EXCERPT A major problem for the American colonists was that one third of the people remained loyal to the crown and another third did not know what to think about the war The various colonies which rejected the authority of a king did not completely want to rely on the sole authority of a Continental Congress The only force in the colonies was that of the militias but they were not trained for pitched battles even if they excelled in guerrilla warfare The Continental Congress realized that relying only on guerrilla warfare would not allow the American colonists to take well populated cities and ports occupied by the British army In order to win the American War of Independence they had to demonstrate their ability to fight European types of battles Then they would be able to rely on foreign support

ABOUT THE AUTHOR The author at the master s level Jean Christophe Malevil chose to write his thesis about the American War of Independence in seeing Roland Emmerich s The Patriot in 2000 He knew he would work on the art of war and to illustrate his work he of course decided to rely on this movie
