Carroll,2010-07-15 Art in Three Dimensions is a collection of essays by one of the most eminent figures in philosophy of art The animating idea behind Noël Carroll's work is that philosophers of art should eschew the sort of aestheticism that often implicitly but sometimes explicitly as in the case of aesthetic theories of art and of their commitments to the notion of the autonomy of art governs their methodology Instead Carroll argues that philosophers of art need to refocus their attention on the ways in which art enters the life of culture and the lives of individual audience members The reference to three dimensions in the title refers to Carroll's view that philosophers of art should look at art from multiple angles and treat it as a substantial participant not only in society but also as a significant influence upon the moral and emotional experiences of audiences GPU Overclocking Guide Alisa Turing,2025-01-08

The concept of democratic freedom refers to more than the kind of freedom embodied by political institutions and procedures Democratic freedom can only be properly understood if it is grasped as the expression of a culture of freedom that encompasses an entire form of life Juliane Rebentisch's systematic and historical approach demonstrates that we can learn a great deal about the democratic culture of freedom from its philosophical critics From Plato to Carl Schmitt the critique of democratic culture has always been articulated as a critique of its aestheticization Rebentisch defends various phenomena of aestheticization from the irony typical of democratic citizens to the theatricality of the political as constitutive elements of democratic culture and the notion of freedom at the heart of its ethical and political self conception This work will be of particular interest to students of
