The Image of Christ in Modern Art Richard Harries,2016-03-03 The Image of Christ in Modern Art explores the challenges presented by the radical and rapid changes of artistic style in the 20th century to artists who wished to relate to traditional Christian imagery In the 1930s David Jones said that he and his contemporaries were acutely conscious of the

break by which he meant the fragmentation and loss of a once widely shared Christian narrative and set of images In this highly illustrated book Richard Harries looks at some of the artists associated with the birth of modernism such as Epstein and Rouault as well as those with a highly distinctive understanding of religion such as Chagall and Stanley Spencer He discusses the revival of confidence associated with the rebuilding of Coventry Cathedral after World War II and the commissioning of work by artists like Henry Moore Graham Sutherland and John Piper before looking at the very testing last quarter of the 20th century He shows how here and even more in our own time fresh and important visual interpretations of Christ have been created both by well known and less well known artists In conclusion he suggests that the modern movement in art has turned out to be a friend not a foe of Christian art Through a wide and beautiful range of images and insightful text Harries explores the continuing challenge present from the beginning of Christian art as to how that which is visual can in some way indicate the transcendent

Henry James and the Art of Impressions John Scholar, 2020 Henry James criticized the impressionism which was revolutionizing French painting and French fiction and satirized the British aesthetic movement which championed impressionist criticism Yet time and again he used the word impression to represent the most intense moments of consciousness of his characters as well as the work of the literary artist Henry James and the Art of Impressions argues that the literary art of the impression as James practised it places his work within the wider cultural history of impressionism Henry James and the Art of Impressions offers an unprecedentedly detailed cultural and intellectual history of the impression It draws on philosophy psychology literature critical theory intellectual influences and aesthetics to study James s early art criticism literary criticism travel writing prefaces and the three great novels of his major phase The Ambassadors The Wings of the Dove and The Golden Bowl It argues that the coherent philosophical meanings of the Jamesian impression emerge when they are comprehended as a family of related ideas about perception imagination and aesthetics bound together by James s attempt to reconcile the novel s value as a mimetic form and its value as a transformative creative activity Henry James and the Art of Impressions traces the development of the impression across a range of disciplines to show how James s use of the word owes them cultural and intellectual debt It offers a more philosophical account of James to complement the more historicist work of recent decades

Decker, 2017-07-05 Investigating the complex interactions between devotional imagery and Church doctrine in the Low Countries during the fifteenth century this book demonstrates how the pictorial arts intersected with popular religious practice The author reconstructs the conceptual frameworks underlying the use and production of religious art in this period and provides a more nuanced understanding of the use of images in the process of soul formation This study delves into the complexity of the early modern system of personal justification and argues that religious images and objects were part of a larger Technology of Salvation In order to make these connections clearer the author analyzes selected works by Geertgen tot Sint Jans Little Gerard at St John's and shows how they functioned within their larger social and historical milieu
