The Structure of Production Mark Skousen, 2017-12-12 In 2014 the U S government adopted a new quarterly statistic called gross output GO the most significance advance in national income accounting since gross domestic product GDP was developed in the 1940s The announcement came as a triumph for Mark Skousen who advocated GO nearly 25 years ago as an essential macroeconomic tool and a better way to measure the economy and the business cycle Now it has become an official statistic issued quarterly by the Bureau of Economic Analysis at the U S Department of Commerce In this new revised edition of Structure of Production Skousen shows why GO is a more accurate and comprehensive measure of the economy because it includes business to business transactions that move the supply chain along to final use GDP measures the value of finished goods and services only and omits B to B activity GO is an attempt to measure spending at all stages of production Using GO Skousen demonstrates that the supply side of the business spending is far more important than consumer spending is more consistent with economic growth theory and a better measure of the business cycle
