 Procreation "* Anthony Colantuono,2017-07-05 Titian Colonna and the Renaissance Science of Procreation demonstrates that  
 two major monuments of Italian Renaissance culture Bellini s and Titian s famous series of mytho poetical paintings for the  
 camerino of Duke Alfonso d Este of Ferrara and Francesco Colonna s Hypnerotomachia Poliphili were conceived as  
 mnemonic or pedagogical devices aimed at educating the reader beholder in the medical science of reproductive physiology  
 and the maintenance of sexual health It is further argued that the learned courtier Mario Equicola who conceived the  
 pictorial program of Duke Alfonso s camerino had read Colonna s text and was extensively inspired by its prior literary  
 argument The study is organized in two parts intimately interrelated The first part is a study of Alfonso d Este s camerino  
 with a general introduction individual chapters on each of Bellini s and Titian s four pictorial bacchanals and a conclusion  
 proposing a new and more accurate reconstruction of the layout of the room also including a completely new way of  
 interpreting the ensemble The second part of the study concerns Colonna s Hypnerotomachia Poliphili again beginning with  
 its own introductory essay and advancing a completely new interpretation of the text The brief conclusion brings the insights  
 of the two sections together clarifying the historical relationship between the pictorial and literary works and explaining their  
 larger cultural significance Emphasizing Equicola s use of the Hypnerotomachia as a model for pictorial invention the author  
 reveals how Titian s remarkably sensuous paintings and Colonna s erotically charged romance are related by their common  
 reference to the neo Aristotelian medical theory of the libidinal seasons and by corollary themes of marriage and sexual  
 consummation This peculiar intersection of cultural themes came to prominence in the context of a courtly world in which
