**The Eco-spasm Report** Alvin Toffler, 1975      *The Death of Industrial Civilization* Joel Jay Kassiola, 1990-01-01 The Death of Industrial Civilization explains how the contemporary ecological crisis within industrial society is caused by the values inherent in unlimited economic growth and competitive materialism Kassiola shows that the limits to growth critique of industrial civilization is the most effective stance against what seems to be a dominant and invincible social order He prescribes the social changes that must be implemented in order to transform industrial society into a sustainable and more satisfying one      The Eco-spasm Report Uppsala universitet, 1975      Restorative Redevelopment of Devastated Ecocultural Landscapes Robert L. France, 2016-04-19 A fusion of ecological restoration and sustainable development restorative redevelopment represents an emerging paradigm for remediating landscapes Rather than merely fixing the broken bits and pieces of nature restorative development advocates the reuse of devastated landscapes to improve the value and livability of a location for humans at the      **Hearings, Reports and Prints of the Senate Committee on Public Works** United States. **The Fourth Wave** Herman Maynard, Susan E. Mehrtens, 1996-08-31 Applying the concept of historical waves originally propounded by Alvin Toffler in *The Third Wave* Herman Maynard and Susan Mehrtens look toward the next century and foresee a fourth wave an era of integration and responsibility far beyond Toffler's revolutionary description of third wave postindustrial society Whether we attain this stage of global well being however will depend on how well our business institutions adapt and change The Fourth Wave examines the ways business has changed in the second and third waves and must continue to change in the fourth The changes concern the basics how an institution is organized how it defines wealth how it relates to surrounding communities how it responds to environmental needs and how it takes part in the political process Maynard and Mehrtens foresee a radically different future in which business principles concern for the environment personal integrity and spiritual values are integrated The authors also demonstrate the need for a new kind of leadership managers and CEOs who embrace an attitude of global stewardship who define their assets as ideas information creativity and vision and who strive for seamless boundaries between work and private lives for all employees

Quality of Life for People with Disabilities Roy I. Brown, 1997 Interest in quality of life has increased considerably over recent years and is now making considerable impact amongst all practitioners concerned with people with disabilities This book looks critically at the concepts assessment and practice as they relate to quality of life issues in many fields of disability The issues for professional training and practice are evaluated and the benefits of involvement in creative activities are examined Vocational social and leisure implications for quality of life considerations are also explored in a number of chapters Case studies and examples are used throughout the book to make this edition accessible and of real practical use to all those working with people with disabilities

**Revolutionary Wealth**

Alvin Toffler, Heidi Toffler, 2007-06-12 Since the mid 1960s Alvin and Heidi Toffler have predicted the far reaching impact of emerging technological economic and social developments on our businesses governments families and daily lives In REVOLUTIONARY WEALTH they once again demonstrate their unparalleled ability to illuminate current trends and anticipate what they mean for the future REVOLUTIONARY WEALTH focuses on how wealth will be created and who will get it in the twenty first century As the knowledge based economy a reality the Tofflers predicted forty years ago continues to replace the industrial based economy they argue money is no longer the sole determinate of wealth The Tofflers explain that we are becoming a nation of prosumers consuming what we ourselves produce and argue that we have all taken on third jobs work we unwittingly do without pay for some of the biggest corporations in the country Using fascinating examples from our daily lives they illustrate how our everyday activities from parenting and volunteering to blogging painting our houses and improving our diets contribute to a non monetary economy that is largely hidden from economists Writing with the same insight and clarity that made their earlier books bestsellers the Tofflers present fresh groundbreaking new ways of thinking about wealth     Catatan Pinggir I Tempo Publishing,
