Animal Behavior: Mechanisms, Ecology, Evolution Lee C. Drickamer, Stephen H. Vessey, Elizabeth Jakob, 2001-07-17
Designed for a one semester introductory course in Animal Behavior Animal behavior is a broad discipline with investigators and contributions from diverse perspectives including anthropology comparative psychology ecology ethology physiology and zoology The authors goal in this textbook is to use evolutionary principles as a unifying theme to provide students exposure to a number of approaches to the field of animal behavior They also demonstrate that the varied perspectives used to study behavior are complementary and often integrated they are not mutually exclusive The subtitle Mechanisms Ecology and Evolution reflects the broad themes that dominate the book **Animal Behavior** Lee C. Drickamer, Stephen H. Vessey, Elizabeth M. Jakob, 2001 Uses evolutionary principles as a unifying theme to provide students with an exposure to approaches in the field of animal behavior This work demonstrates that the varied perspectives used to study behavior are complementary and often integrated It is designed for a one semester introductory course in Animal Behavior **Animal Behavior Desk Reference** Edward M. Barrows, 2000-12-28 Revised and updated containing over 5 000 entries with over 1 100 more entries than in the previous edition Animal Behavior Desk Reference Second Edition A Dictionary of Behavior Ecology and Evolution provides definitions for terms in animal behavior biogeography evolution ecology genetics psychology statistics systematics and other **Animal Behaviour** C. J. Barnard, 2012-12-06 The study of animal behaviour particularly from evolutionary and ecological viewpoints has been one of the major growing points in biology over the last 10 to 15 years The degree of quantitative rigour in theoretical observational and experimental approaches to behaviour has increased dramatically As more of the rapidly growing research literature becomes a basic requirement for students reading animal behaviour at undergraduate level there is a need for a readily comprehensible text covering all major aspects of behaviour study to accompany their courses This book based on my first second and third year undergraduate lectures at the University of Nottingham is designed to meet that requirement The book begins with a discussion of the physiological and anatomical bases of behaviour the relationship between nervous system structure and function and behaviour hormonal effects on behaviour biological clocks perceptual mechanisms and stimulus filtering This leads to a consideration in Chapter 2 of how the animal integrates internal and external stimuli in making decisions about its behaviour and the way natural selection has shaped decision making processes and the organisation of motivation The first two chapters therefore deal with the instigation or causation of behaviour within the animal Chapters 3 and 4 deal with developmental aspects of behaviour Chapter 3 discusses behaviour genetics including the relationship between specific genes and behaviour the heritability of behaviour patterns the site of gene action in the body and the evolutionary consequences of a genetic basis to behaviour

Animal Behavior Lee C. Drickamer, 1992 **Animal Personalities** Claudio Carere, Dario Maestripieri, 2024-05-31 Ask anyone who has owned a pet and they'll assure you that yes animals have personalities And science is beginning to agree Researchers have demonstrated that both domesticated and nondomesticated animals from invertebrates to monkeys and apes behave in consistently different ways meeting the criteria for what many define as personality But why the differences and how are personalities shaped by genes and environment How did they evolve The essays in *Animal Personalities* reveal that there is much to learn from our furred and feathered friends The study of animal personality is one of the fastest growing areas of research in behavioral and evolutionary biology Here Claudio Carere and Dario Maestripieri along with a host of scholars from fields as diverse as ecology genetics endocrinology neuroscience and psychology provide a comprehensive overview of the current research on animal personality Grouped into thematic sections chapters approach the topic with empirical and theoretical material and show that to fully understand why personality exists we must consider the evolutionary processes that give rise to personality the ecological correlates of personality differences and the physiological mechanisms underlying personality variation **Animal Behaviour: Evolution and Mechanisms** Nils Anthes, Peter M. there is ambiguity between scientific and common definitions and even discrepancies in the scientific literature Providing a common ground and platform for precise scientific communication in animal behavior ecology evolution and related branches of biology *Animal Behavior Desk Reference A Dictionary of Behavior Ecology and Evolution Third Edition* contains more than 800 new terms and definitions 48 new figures and thousands of additions and improvements Using a dictionary format to present definitions in a standard easily accessible manner the book's main body emphasizes conceptual terms rather than anatomical parts or taxonomic terms and focuses on nouns rather than verbs or adjectives Term hierarchies are handled with bulleted entries and terms with multiple definitions are included as superscripted entries All sources are cited and most are paraphrased to conform to uniform style and length The dictionary also includes nontechnical and obsolete terms synonyms pronunciations and notes and comments as well as etymologies term originators and related facts Appendices address organism names organizations and databases Devoted to the precise and correct use of scientific language this third edition of a bestselling standard enables students and scientists alike to communicate their findings and promote the efficient advancement of science

Cognitive Ecology II Reuven Dukas, John M. Ratcliffe, 2009-11-15 Merging evolutionary ecology and cognitive science cognitive ecology investigates how animal interactions with natural habitats shape cognitive systems and how constraints on nervous systems limit or bias animal behavior Research in cognitive ecology has expanded rapidly in the past decade and this second volume builds on the foundations laid out in the first published in 1998 *Cognitive Ecology II* integrates numerous scientific disciplines to analyze the ecology and evolution of animal cognition The contributors cover the mechanisms ecology and evolution of learning and memory including detailed analyses of bee neurobiology bird song and spatial learning They also explore decision making with mechanistic analyses of reproductive behavior in voles escape hatching by frog embryos and predation in the auditory domain of bats and eared insects Finally they consider social cognition focusing on alarm calls and the factors determining social learning strategies of corvids fish and mammals With cognitive ecology ascending to its rightful place in behavioral and evolutionary research this volume captures the promise that has been realized in the past decade and looks forward to new research prospects

Behaviour and Evolution Peter James Bramwell Slater, Tim Halliday, 1994-09-15 Some of the most exciting recent advances in animal behaviour have occurred at the interface between that subject and the study of evolution This book written by experts in this area illustrates how the profound changes in our understanding of evolution have influenced behavioural research Its chapters span both studies of how behaviour itself has evolved dealing with topics such as comparative studies the genetics of behaviour speciation and the evolution of sociality and of intelligence and also the adaptiveness which this evolution has brought about with treatment of mating and fighting strategies and theories of kinship and altruism *Behaviour and Evolution* will be invaluable to senior undergraduate and graduate students of biology and psychology especially those studying animal behaviour behavioural ecology sociobiology evolution ecology and environmental biology

Living in Groups Jens

Krause, Graeme D. Ruxton, 2002-10-17 Shoals swarms flocks herds group formation is a widespread phenomenon in animal populations It raises several interesting questions for behavioral ecologists Why do animals form and live in groups and what factors influence the ways in which they do this What are the costs and benefits to an animal of group living How are these influenced by ecological factors The authors familiarize the reader with cutting edge ideas on the ecology and evolution of group living animals and detail fascinating case studies demonstrating them in action **Encyclopedia of Animal Behavior**, 2019-01-21 Encyclopedia of Animal Behavior Second Edition Four Volume Set the latest update since the 2010 release builds upon the solid foundation established in the first edition Updated sections include Host parasite interactions Vertebrate social behavior and the introduction of overview essays that boost the book's comprehensive detail The structure for the work is modified to accommodate a better grouping of subjects Some chapters have been reshuffled with section headings combined or modified Represents a one stop resource for scientifically reliable information on animal behavior Provides comparative approaches including the perspective of evolutionary biologists physiologists endocrinologists neuroscientists and psychologists Includes multimedia features in the online version that offer accessible tools to readers looking to deepen their understanding Animal Behavior Lee Drickamer, 2001-07 Animal behaviour is a broad discipline with investigators and contributions from diverse perspectives including anthropology comparative psychology ecology physiology and zoology This book for a one semester introductory course uses evolutionary principles as a unifying theme to expose students to a number of approaches to the field of animal behaviour The authors also show that the varied perspectives used to study behaviour are complementary and often integrated rather than mutually exclusive The subtitle Mechanisms Ecology and Evolution reflects the book's theme *An Introduction to Behavioural Ecology* Nicholas B. Davies, John R. Krebs, Stuart A. West, 2012-04-02 This textbook helped to define the field of Behavioural Ecology In this fourth edition the text has been completely revised with new chapters and many new illustrations and full colour photographs The theme once again is the influence of natural selection on behaviour an animal's struggle to survive and reproduce by exploiting and competing for resources avoiding predators selecting mates and caring for offspring and how animal societies reflect both cooperation and conflict among individuals Stuart A West has joined as a co author bringing his own perspectives and work on microbial systems into the book Written in the same engaging and lucid style as the previous editions the authors explain the latest theoretical ideas using examples from micro organisms invertebrates and vertebrates There are boxed sections for some topics and marginal notes help guide the reader The book is essential reading for students of behavioural ecology animal behaviour and evolutionary biology Key Features Long awaited new edition of a field defining textbook New chapters illustrations and colour photographs New co author Focuses on the influence of natural selection on behavior and how animal societies reflect both cooperation and conflict among individuals The long awaited update to a classic in this field is now here presenting new directions in thinking and addressing burning questions Richly informed by

progress in many other disciplines such as sensory physiology genetics and evolutionary theory it marks the emergence of behavioural ecology as a fully fledged discipline This is a marvellous book written in a lucid style A must read for those in the field it is also a cornucopia of new thinking for anyone interested in evolution and behaviour Manfred Milinski Nature 2012
