The Economic Anthropology Of The State:

The Economic Anthropology of the State Elizabeth M. Brumfiel, 1994 This work examines the scope rationality and limits of state intervention in the economy drawing upon studies of tribute based states of antiquity and modern capitalist states In examining how state personnel intervene in the economy this book draws three conclusions about the economic anthropology of the state First there is a great range of variation in the way that states intervene in the economy Second the economic impact of the state extends far beyond its role in organising or managing production and distribution Finally understanding the economic anthropology of the state requires an awareness of the strength of powerholders outside the state especially those who are often regarded as powerless [The Economic Anthropology of the State](#) Ted L.

GRAGSON, ALACRAN., 1994 *The Anthropology of the State* Aradhana Sharma, Akhil Gupta, 2009-02-09 This innovative reader brings together classic theoretical texts and cutting edge ethnographic analyses of specific state institutions practices and processes and outlines an anthropological framework for rethinking future study of the state Focuses on the institutions spaces ideas practices and representations that constitute the state Promotes cultural and transnational approaches to the subject Helps readers to make anthropological sense of the state as a cultural artifact in the context of a neoliberalizing transnational world

Fiscal Regimes and the Political Economy of Premodern States Andrew Monson, Walter Scheidel, 2015-04-23 Inspired by the new fiscal history this book represents the first global survey of taxation in the premodern world What emerges is a rich variety of institutions including experiments with sophisticated instruments such as sovereign debt and fiduciary money challenging the notion of a typical premodern stage of fiscal development The studies also reveal patterns and correlations across widely dispersed societies that shed light on the basic factors driving the intensification abatement and innovation of fiscal regimes Twenty scholars have contributed perspectives from a wide range of fields besides history including anthropology economics political science and sociology The volume s coverage extends beyond Europe the Mediterranean and the Near East to East Asia and the Americas thereby transcending the Eurocentric approach of most scholarship on fiscal history **Intermediate Elites in Pre-Columbian States and Empires** Christina

M. Elson, R. Alan Covey, 2022-06-21 From the Mesoamerican highlands to the Colca Valley in Peru pre Columbian civilizations were bastions of power that have largely been viewed through the lens of rulership or occasionally through bottom up perspectives of resistance Rather than focusing on rulers or peasants this book examines how intermediate elites both men and women helped to develop sustain and resist state policies and institutions Employing new archaeological and ethnohistorical data its contributors trace a 2 000 year trajectory of elite social evolution in the Zapotec Wari Aztec Inka and Maya civilizations This is the first volume to consider how individuals subordinate to imperial rulers helped to shape specific forms of state and imperial organization Taking a broader scope than previous studies it is one of the few works to systematically address these issues in both Mesoamerica and the Central Andes It considers how these individuals influenced

the long term development of the largest civilizations of the ancient Americas opening a new window on the role of intermediate elites in the rise and fall of ancient states and empires worldwide The authors demonstrate how such evidence as settlement patterns architecture decorative items and burial patterns reflect the roles of intermediate elites in their respective societies arguing that they were influential actors whose interests were highly significant in shaping the specific forms of state and imperial organization Their emphasis on provincial elites particularly shifts examination of early states away from royal capitals and imperial courts explaining how local elites and royal bureaucrats had significant impact on the development and organization of premodern states Together these papers demonstrate that intricate networks of intermediate elites bound these ancient societies together and that competition between individuals and groups contributed to their decline and eventual collapse By addressing current theoretical concerns with agency resistance to state domination and the co option of local leadership by imperial administrators it offers valuable new insight into the utility of studying intermediate elites

Comparative and Global Framing of Enslavement Stephan Conermann, Youval Rotman, Ehud R. Toledano, Rachel Zelnick-Abramovitz, 2023-09-05 The study of enslavement has become urgent over the last two decades Social scientists legal scholars human rights activists and historians who study forms of enslavement in both modern and historical societies have sought and often achieved common conceptual grounds thus forging a new perspective that comprises historical and contemporary forms of slavery What could certainly be termed a turn in the study of slavery has also intensified awareness of enslavement as a global phenomenon inviting a comparative trans regional approach across time space divides Though different aspects of enslavement in different societies and eras are discussed each of the volume s three parts contributes to and has benefitted from a global perspective of enslavement The chapters in Part One propose to structure the global examination of the theoretical ideological and methodological aspects of the global local and glocal Part Two Regional and Trans regional Perspectives of the Global presents through analyses of historical case studies the link between connectivity and mobility as a fundamental aspect of the globalization of enslavement Finally Part Three deals with personal points of view regarding the global local and glocal Grosso modo the contributors do not only present their case studies but attempt to demonstrate what insights and added value explanations they gain from positioning their work vis vis a broader big picture

Yaxcabá and the Caste War of Yucatán Rani T. Alexander, 2004 Rani Alexander s study of the Caste War of Yucatan 1847 1901 uses archaeological evidence ethnography and history to explore the region s processes of resistance

Empire and Domestic Economy Terence N. D'Altroy, Christine A. Hastorf, 2005-12-27 The Upper Mantaro Archaeological Research Project is a benchmark for a new level of quality in Andean archaeological research This volume continues to develop UMARP approaches to understanding prehistoric Andean economy and polity

World-systems Theory in Practice P. Nick Kardulias, 1999 In the quarter century since Wallerstein first developed world systems theory WST scholars in a variety of disciplines have adopted the approach to explain intersocietal interaction on a grand scale These

essays bring to light archaeological data and analysis to show that many historic and prehistoric states lacked the mechanisms to dominate the distant and in some cases nearby societies with which they interacted Core periphery exploitation needs to be demonstrated not simply assumed as the interdisciplinary dialogue which occurs in this volume demonstrates World Systems Theory in Practice will appeal to individuals with an interest in the application of WST in both the Old World and the New World The papers in this volume reflect the vitality of the debate concerning the use of such generalizing theories and will be of interest to archeologists anthropologists historians sociologists and those involved in the study of civilizations

Gender in Pre-Hispanic America Cecelia F. Klein, 2001 Gender in Pre Hispanic America offers rich opportunities for comprehending current trends and considering future directions in research It is unique in that it puts social theory at the forefront of the discussion The book has a special intellectual presence and contemporary relevance in its engagement with the social lives and constructs of its authors and readers alike The consideration of the role of gender in our daily lives including in our professions becomes inescapable when reading this book It is not simply a question of men s roles having been possibly overemphasized and overstudied to the detriment of women s The fact that genders as opposed to sexes are socially constructed categories focuses our attention on the ways in which these and other social constructs have shaped our present understanding of the past and informed past peoples understand of their present In various articles in this book the reader will not find unanimity in what is meant by gender or how to go about studying it What will be found however is a collection of interesting informed thought provoking and often lively essays It is hoped that this volume will mark a stage in an evolving study of this field and provoke new research in the future

Migration and Economy Lillian Trager, 2005 Focuses on migration not as a single event but as a dynamic process that responds to and is shaped by broader economic cultural and social forces This title features individual essays that offer studies on Mexico Puerto Rico West Africa Kazakstan and Mozambique It is useful for development anthropology migration studies and more This book focuses on the historical sociology of the Turkish state It seeks to compare the development of the Ottoman Turkish state with similar processes of large scale historical change in Europe identified by Michael Mann in The Sources of Social Power It traces the contours of Turkey s modernisation with the intention of formulating a fresh way to approach state development in countries on the global economic periphery particularly those attempting to effect closer ties with Northern markets It also highlights matters of social change pertinent to states grappling with issues relating to political Islam minority identity and irredentist dissent

Early State Economics Henri Claessen, Pieter van de Velde, 2017-09-08 The central theme of this volume is the political economy of early state societies the ways in which the income of the central government of such systems was collected and spent The work contains descriptive as well as narrative and commemorative essays Contributions present data on early states as diverse as the Interlacustrine states of East Africa the Sudanic states of West Africa prehistoric Cahokia in the Mississippi Valley Aztec Mexico the Classical Maya eighteenth century Nepal and Polynesian Tahitian and Mayan case

studies At the theoretical end of the spectrum the book offers a general discussion of the concept of political economy modes of production in antiquity and the editors themselves offer an overview of early state organizational forms With the data of the contributions to this volume such theoretical viewpoints are evaluated The conclusion is that inherited approaches fall far short of explaining the political economies of early states The editors of this volume maintain that much thinking on this issue of the early state is off base because it is confined to the study of redistribution They hold that a prestige goods system is probably as important while in some cases the key factor to look at is tribute or taxation Likewise the system of gift giving often viewed as ancillary should be considered central to the performance of the ancient states In short political economy is rooted in the stages of social growth Nearly all contributors agree that simple evolutionary generalizations can no longer be applied to specific cases without considerable modification and in this undertaking formalist and Marxist canons alike need to be invoked for a deeper understanding of the actual operations of the state in earlier societies **Economy and Politics**

in the Mycenaean Palace States Sofia Voutsaki, John Killen, 2020-08-30 This volume gathers fourteen papers on the Mycenaean palace states of the late Bronze Age Coverage ranges across Mycena Pylos Knossos and the Near East with topics including administration agriculture ceramic production and Linear B **Archaeology at the Millennium** Gary M.

Feinman, T. Douglas Price, 2007-09-27 In this book internationally distinguished contributors consider hot topics in turn of the millennium archaeology and chart an ambitious agenda for the future *The Incas* Gordon Francis McEwan, 2006-01-30

Defying many of the supposed rules of civilization building and lacking the advantages of a written language hard metals the wheel or draft animals the Incas forged one of the greatest imperial states in history The Incas New Perspectives offers a revealing portrait of the ancient Andean empire from the earliest stages of its development to its final capitulation to Pizarro in the mid 16th century In recent years researchers have employed new tools to get to the heart of the mysterious Inca culture Drawing on recent work in archaeology anthropology ethnohistory and other sources The Incas provides the most up to date interpretations of Inca culture religion politics economics and daily life available Readers will discover how the Incas discovered medicines still in use and kept records using knotted cords how Inca builders created masterful highways and stone bridges and how the inhabitants of seemingly unfarmable lands came to give the world potatoes beans corn squashes tomatoes avocados peanuts and peppers **The Postclassic to Spanish-Era Transition in Mesoamerica** Susan

Kepecs, Rani T. Alexander, 2005-12-15 A historical and archaeological analysis of native and Spanish interactions in Mesoamerica and how each culture impacted the other **Economy and State** Nina Bandelj, Elizabeth Sowers, 2013-05-08

Should governments be involved in economic affairs Challenging prevailing wisdom about the benefits of self regulating markets Nina Bandelj and Elizabeth Sowers offer a uniquely sociological perspective to emphasize that states can never be divorced from economy From defining property rights and regulating commodification of labor to setting corporate governance standards and international exchange rules the state continuously manages the functioning of markets and

influences economic outcomes for individuals firms and nations The authors bring together classical interventions and cutting edge contemporary research in economic sociology to discuss six broad areas of economy state connection property money labor firms national economic growth and global economic exchange A wealth of empirical examples and illustrations reveals that even if the nature of state influence on economy varies across contexts it is always dependent on social forces This accessible and engaging book will be essential reading for upper level students of economic sociology and those interested in the major economic dilemmas of our times *Economic Interpretations of England's State Formation and Its Management to 1850* Gordon Holmes,2024-10-24 The book is divided into two sections The first half provides a historiography of the literature on state formation from antiquity to the present day In the second Gordon identifies a new theme using the methodologies of economic history the history of economic thought and the history of ideas His interdisciplinary approach demonstrates that the process of state formation is best understood through the prism of science economy and culture The narrative highlights significant events and institutions as markers of change in the Middle Ages and the Early Modern era The core of the book focuses on England s economic culture and its impact on state management University elites in science and Aristotle s philosophy educated literate and numerate professionals for the Royal court They became indispensable for the ever growing complexity of governing England was unique because it embraced statistical thinking and quantitative reasoning at the heart of the English State State and Society John Gledhill,Barbara Bender,Mogens Trolle Larsen,1995 The traditional Eurocentric view of state formation and the rise of civilization is challenged in this broad ranging book Bringing archaeological research into contact with the work of ethno historians and anthropologists it generates a discussion of fundamental concepts rather than a search for modern analogies for processes that occurred in the past *Fast Food/slow Food* Richard R. Wilk,2006 Wilk and his colleagues draw upon their own international field experience to examine how food systems are changing around the globe The authors offer a cultural perspective that is missing in other economic and developmental studies and provide rich ethnographic data on markets industrial production and food economies This new book will appeal to professionals in economic and environmental anthropology economic development agricultural economics consumer behavior nutritional sciences environmental sustainability and globalization studies
