accurately depicts the overlapping and extended battle waged by women activists With the gift of hindsight and the awareness of the limitations of and backlash to this Second Wave the time is right to reflect on the feminist cause in America and to chart its path forward

The Stratified State: Radical Institutional Theories of Participation and Duality William M. Dugger,William T. Waller Jr,2019-07-26 These essays in the purest tradition of political economy consider three major themes from the multiple relationships between the state and the economy duality myth and crisis The state is a complex mix of dualisms the welfare versus the warfare state the agency of both social integration and exploitation and public versus private institutions The editors aim to distinguish true from false dualisms Myths in modern society are important as they enables whites to dominate blacks men to dominate women warplanners to dominate peacemakers the rich to dominate the poor The editors consider the myth that the state and the market are separate the state as a single monolithic structure and that we can all identify and share in a national interest The crisis of the state is the third major theme The state is in crisis because we have no fully developed theory of the state because its welfare and warfare functions are undergoing profound change The essays are all written from the point of view of radical institutionalism and emphasise the need for increased participation in the policymaking and policy evaluating processes of the state
