The Edge Of Extinction The Real Deal:

Watching, from the Edge of Extinction Beverly Peterson Stearns, Stephen C. Stearns, 2000-01-01 Annotation In this mesmerizing series of interviews with dedicated people who work to save endangered species throughout the world an alarming truth emerges the obstacles of human politics greed corruption folly and hypocrisy can present as much danger to a species survival as biological causes The dramatic lessons of this book shed new light on the problems of declining species and offer hope that we may yet change their fate **Authenticity** James H. Gilmore, B. Joseph Pine II, 2007-10-18 Contrived Disingenuous Phony Inauthentic Do your customers use any of these words to describe what you sell or how you sell it If so welcome to the club Inundated by fakes and sophisticated counterfeits people increasingly see the world in terms of real or fake They would rather buy something real from someone genuine rather than something fake from some phony When deciding to buy consumers judge an offering s and a company s authenticity as much as if not more than price quality and availability In *Authenticity* James H Gilmore and B Joseph Pine II argue that to trounce rivals companies must grasp manage and excel at rendering authenticity Through examples from a wide array of industries as well as government nonprofit education and religious sectors the authors show how to manage customers perception of authenticity by recognizing how businesses fake it appealing to the five different genres of authenticity charting how to be true to self and what you say you are and crafting and implementing business strategies for rendering authenticity The first to explore what authenticity really means for businesses and how companies can approach it both thoughtfully and thoroughly this book is a must read for any organization seeking to fulfill consumers intensifying demand for the real deal **The Edge of Extinction** Jim Howes, 1982

Graves,2019-07-24 When CDC HQ is brutally attacked Jake and Soliz crisscross the globe to find Tracker before she exterminates humanity *At Home in the Universe* Stuart Kauffman,1996-11-21 A major scientific revolution has begun a new paradigm that rivals Darwin s theory in importance At its heart is the discovery of the order that lies deep within the most complex of systems from the origin of life to the workings of giant corporations to the rise and fall of great civilizations And more than anyone else this revolution is the work of one man Stuart Kauffman a MacArthur Fellow and visionary pioneer of the new science of complexity Now in *At Home in the Universe* Kauffman brilliantly weaves together the excitement of intellectual discovery and a fertile mix of insights to give the general reader a fascinating look at this new science and at the forces for order that lie at the edge of chaos We all know of instances of spontaneous order in nature an oil droplet in water forms a sphere snowflakes have a six fold symmetry What we are only now discovering Kauffman says is that the range of spontaneous order is enormously greater than we had supposed Indeed self organization is a great undiscovered principle of nature But how does this spontaneous order arise Kauffman contends that complexity itself triggers self organization or what he calls order for free that if enough different molecules pass a certain threshold of complexity they begin to self organize into a new entity a living cell Kauffman uses the analogy of a thousand buttons on a rug join two buttons randomly with thread then another two and so on At first you have isolated pairs later small clusters but suddenly at around the 500th repetition a remarkable transformation occurs much like the phase transition when water abruptly turns to ice and the buttons link up in one giant network Likewise life may have originated when the mix of different molecules in the primordial soup passed a certain level of complexity and self organized into living entities if so then life is not a highly improbable chance event but almost inevitable Kauffman uses the basic insight of order for free to illuminate a staggering range of phenomena We see how a single celled embryo can grow to a highly complex organism with over two hundred different cell types We learn how the science of complexity extends Darwin s theory of evolution by natural selection that self organization selection and chance are the engines of the biosphere And we gain insights into biotechnology the stunning magic of the new frontier of genetic engineering generating trillions of novel molecules to find new drugs vaccines enzymes biosensors and more Indeed Kauffman shows that ecosystems economic systems and even cultural systems may all evolve according to

similar general laws that tissues and terra cotta evolve in similar ways And finally there is a profoundly spiritual element to Kauffman's thought If as he argues life were bound to arise not as an incalculably improbable accident but as an expected fulfillment of the natural order then we truly are at home in the universe Kauffman's earlier volume *The Origins of Order* written for specialists received lavish praise Stephen Jay Gould called it a landmark and a classic And Nobel Laureate Philip Anderson wrote that there are few people in this world who ever ask the right questions of science and they are the ones who affect its future most profoundly Stuart Kauffman is one of these In *At Home in the Universe* this visionary thinker takes you along as he explores new insights into the nature of life

Death Work Vincent E. Henry, 2004-04-01 In this fascinating new book Vincent Henry a 21 year veteran of the NYPD who recently retired to become a university professor explores the psychological transformations and adaptations that result from police officers encounters with death Police can encounter death frequently in the course of their duties and these encounters may range from casual contacts with the deaths of others to the most profound and personally consequential confrontations with their own mortality Using the survivor psychology model as its theoretical base this insightful and provocative research ventures into a previously unexplored area of police psychology to illuminate and explore the new modes of adaptation thought and feeling that result from various types of death encounters in police work The psychology of survival asserts that the psychological world of the survivor one who has come in close physical or psychic contact with death but nevertheless managed to live is characterized by five themes psychic numbing death guilt the death imprint suspicion of counterfeit nurturance and the struggle to make meaning These themes become manifest in the survivor's behavior permeating his or her lifestyle and worldview Drawing on extensive interviews with police officers in five nominal categories rookie officers patrol sergeants crime scene technicians homicide detectives and officers who survived a mortal combat situation in which an assailant or another officer died Henry identifies the impact such death encounters have upon the individual the police organization and the occupational culture of policing He has produced a comprehensive and highly textured interpretation of police psychology and police behavior bolstered by the unique insights that come from his personal experience as an officer his intimate familiarity with the subtleties and nuances of the police culture's value and belief systems and his meticulous research and rigorous method *Death Work* provides a unique prism through which to view the individual organizational and social dynamics of contemporary urban policing With a foreword by Robert Jay Lifton and a chapter devoted to the local police response to the World Trade Center attacks *Death Work* will be of interest to psychologists and criminal justice experts as well as police officers eager to gain insight into their unique relationship to death
