**The Life of Sir Thomas Fowell Buxton** David Bruce, 2013-12-05 The social conscience of Sir Thomas Fowell Buxton 1786 1845 developed as he operated a brewery in Spitalfields nineteenth century London s poorest parish His interest and research on penal discipline brought him national prominence and led to a parliamentary career that lasted nearly two decades Buxton s association with noted activist William Wilberforce led to his own involvement in the anti slavery movement a cause he fiercely championed resulting in Britain s abolition of slavery in 1834 Buxton s involvement in the disastrous 1841 Niger expedition effectively ended his public career and paved the way to British imperialism in Africa A man of many interests Buxton also supported Catholic emancipation and ending the Hindu suttee Few nineteenth century social reformers have had as much of an impact or have cast as long a shadow as Buxton At the time of his death many saw him as the epitome of Christian activism yet today Buxton remains largely ignored and forgotten David Bruce examines the life of one of Great Britain s most prominent social activists Using his personal papers and the papers and books of his friends associates and contemporaries The Life of Sir Thomas Fowell Buxton paints a portrait of a unique individual driven to improve his world

Value Practices in the Life Sciences and Medicine Isabelle Dussauge, Claes-Fredrik Helgesson, Francis Lee, 2015-01-29 Many deep concerns in the life sciences and medicine have to do with the enactment ordering and displacement of a broad range of values This volume articulates a pragmatist stance for the study of the making of values in society exploring various sites within life sciences and medicine and asking how values are at play This means taking seriously the work scientists regulators analysts professionals and publics regularly do in order to define what counts as proper conduct in science and health care what is economically valuable and what is known and worth knowing A number of analytical and methodological means to investigate these concerns are presented The editors introduce a way to indicate an empirically oriented research program into the enacting ordering and displacing of values They argue that a research programme of this kind makes it possible to move orthogonally to the question of what values are and thus ask how they are constituted This rectifies some central problems that arise with approaches that depend on stabilized understandings of value At the heart of it such a research programme encourages the examination of how and with what means certain things come to count as valuable and desirable how registers of value are ordered as well as displaced It further encourages a sense that these matters could be and sometimes simultaneously are otherwise

**Reproductive Labor and Innovation** Jennifer Denbow, 2024-09-27 In *Reproductive Labor and Innovation* Jennifer Denbow examines how the push toward technoscientific innovation in contemporary American life often comes at the expense of the care work and reproductive labor that is necessary for society to function Noting that the gutting of social welfare programs has shifted the burden of solving problems to individuals Denbow argues that the aggrandizement of

innovation and the degradation of reproductive labor are intertwined facets of neoliberalism. She shows that the construction of innovation as a panacea to social ills justifies the accumulation of wealth for corporate innovators and the impoverishment of those feminized and racialized people who do the bulk of reproductive labor. Moreover, even innovative technology aimed at reproduction such as digital care work platforms and noninvasive prenatal testing obscures structural injustices and further devalues reproductive labor. By drawing connections between innovation discourse, the rise of neoliberalism, financialized capitalism, and the social and political degradation of reproductive labor, Denbow illustrates what needs to be done to destabilize the overvaluation of innovation and to offer collective support for reproduction.

**Enacting Dismal Science**

Ivan Boldyrev, Ekaterina Svetlova, 2016-07-14 In this book, sociologists, philosophers, and economists investigate the conceptual issues around the performativity of economics over a variety of disciplinary contexts and provide new case studies illuminating this phenomenon. In featuring the latest contributions to the performativity debate, the book revives discussion of the fundamental questions: What precise meaning can we attribute to the notion of performativity? What empirical evidence can help us recognize economics as performative? And what consequences does performativity have for contemporary societies? The contributions demonstrate how performativity can serve as a powerful conceptual resource in dealing with economic knowledge as an inspiring framework for investigating performative practices and as an engine of discovery for thinking of the economic proper.

**Bruno Latour** Kyle McGee, 2014-06-23 The first extended study of Bruno Latour's legal theory, this book presents a critical reconstruction of the whole of Latour's oeuvre to date, from *Laboratory Life* to *An Inquiry into the Modes of Existence*. Based on the powerful insights into normative effects that actor network theory makes possible, the book advances a new theory of legal normativity and the force of law, rethinking Latour's work on technology, the image, and referential scientific inscriptions, among others, and placing them within the ambit of legality. The book also captures and deepens the contrast between the modern legal institution and the value of law as a mode of existence and provides a fulsome theoretical account of legal veridiction. Throughout, Latour's thought is put into dialogue with important progenitors and adversaries as well as historical and contemporary strands of legal and political philosophy. But the thread of legality is not confined to Latour's reflections on the making of law; rather, it cuts through the whole of his highly diverse body of work. The empire of mononaturalism, augured by modern philosophies of science, is thoroughly juridical; as such, the actor network theory that promises to undo that empire by freeing the value of the sciences from its epistemological clutches is unthinkable without the device of the trial and the descriptive semiotics of normativity that sustain ANT. The democratization of the sciences and the vibrancy of ecologized politics that become possible once the bifurcation of nature into essential, primary, and disposable secondary qualities is disabled, and once the modern Constitution is called into doubt, also have important legal dimensions that have gone largely unexamined. Bruno Latour's *The Normativity of Networks* remedies this and other omissions, evaluating Latour's thought about law while carrying it in striking new directions. This book introduces legal

scholars and students to the thought of the philosopher and sociologist Bruno Latour whilst also presenting a critical analysis of his work in and around law This interdisciplinary study will be of interest to those researching in Law Philosophy and Sociology     **The British National Bibliography** Arthur James Wells,2005     *The Knowledge Book* Steve

Fuller,2014-11-27 *The Knowledge Book* is a unique interdisciplinary reference work for students and researchers concerned with the nature of knowledge It is the first work of its kind to be organized on the assumption that whatever else knowledge might be it is intrinsically social The book consists of 42 alphabetically arranged entries on key concepts at the intersection of philosophy and sociology what used to be called sociology of knowledge but is now increasingly called social epistemology The entries include concepts common to disciplines that in recent years have devoted more of their attention to knowledge cultural studies communication studies information science education policy studies and business studies Special attention is given to concepts from the emerging field of science and technology studies Each entry presents a short self contained essay providing an overview of a concept and concludes with suggestions for further reading All the entries are fully cross referenced allowing readers to both make connections and follow their own interests     Forthcoming Books Rose Army,2004

Mass-Market Fiction and the Crisis of American Liberalism, 1972-2017 Michael J. Blouin,2018-05-10 *Mass Market Fiction and the Crisis of American Liberalism* 1972 2017 tracks the transformation of liberal thought in the contemporary United States through the unique lens of the popular paperback The book focuses on cultural shifts as they appear in works written by some of the most widely read authors of the last fifty years the idea of love within a New Economy Danielle Steel the role of government in scientific inquiry Michael Crichton entangled political alliances and legacies in the aftermath of the 1960s Tom Clancy the restructured corporation John Grisham and the blurred line between state and personal empowerment Dean Koontz To address the current crisis this book examines how the changed character of American liberalism has been rendered legible for a mass audience     Mass Intellectuality and Democratic Leadership in Higher Education Joss Winn,Richard Hall,2017-08-24 Higher education in the UK is in crisis The idea of the public university is under assault and both the future of the sector and its relationship to society are being gambled Higher education is increasingly unaffordable its historic institutions are becoming untenable and their purpose is resolutely instrumental What and who have led us to this crisis What are the alternatives To whom do we look for leadership in revealing those alternatives This book critically analyses intellectual leadership in the university exploring ongoing efforts from around the world to create alternative models for organizing higher education and the production of knowledge Its authors offer their experience and views from inside and beyond the structures of mainstream higher education in order to reflect on efforts to create alternatives In the process the volume asks is it possible to reimagine the university democratically and cooperatively If so what are the implications for leadership not just within the university but also in terms of higher education s relationship to society The authors argue that mass higher education is at the point where it no longer reflects the needs capacities and longterm

interests of global society An alternative role and purpose is required based upon mass intellectuality or the real possibility of democracy in learning and the production of knowledge American Book Publishing Record ,2003 *The SAGE*

Guyer,2016-05-27 *Legacies Logics Logistics* brings together a set of essays written both before and after the financial crisis of 2007 08 by eminent Africanist and economic anthropologist Jane I Guyer Each was written initially for a conference on a defined theme When they are brought together and interpreted as a whole by Guyer these varied essays show how an anthropological and socio historical approach to economic practices both in the West and elsewhere can illuminate deep facets of economic life that the big theories and models may fail to capture Focusing on economic actors whether ordinary consumers or financial experts Guyer traces how people and

institutions hold together past experiences legacies imagined scenarios and models logics and situational challenges logistics in a way that makes the performance of economic life on platforms made of these legacies logics and logistics work in practice Individual essays explore a number of topics including time frames and the future the use of percentages in observations and judgments the explanation of prices the coexistence of different world currencies the reapplication of longtime economic theories in new settings and crucially how we talk about the economy how we use stable terms to describe a turbulent system Valuable as standalone pieces the essays build into a cogent method of economic anthropology

Di Leo, Christian Moraru, 2021-11-18 Disciplines from literary studies to environmentalism have recently undergone a spectacular reorientation that has refocused entire fields methodologies and vocabularies on the world and its sister terms such as globe planet and earth The Bloomsbury Handbook of World Theory examines what world means and what it accomplishes in different zones of academic study The contributors raise questions such as What happens when world is appended to a particular form of humanistic or scientific inquiry How exactly does worlding bear on the theoretical operating system and the history of that field What is the theory or theoretical model that allows world to function in a meaningful way in coordination with that knowledge domain With contributions from 38 leading theorists from a vast range of fields including queer studies religion and pop culture this is the first large reference work to consider the profound effect both within and outside the academy of the worlding of discourse in the 21st century **Behemoth** Irving Horowitz, 2017-10-19 The title Behemoth derives from the Hebrew word Behemah a beast an enormous creature monstrously

huge and vast It is an apt description of the State on the eve of the twenty first century Loved by few vilified by many from all perspectives it nonetheless continues to grow by turns rivaling and co opting that more pleasant sounding word Society Political sociology aims to define and understand the interrelationship between these two huge terms State and Society Continuing in a path begun by Horowitz in the 1950s in *The Idea of War and Peace in Contemporary Social and Philosophical Thought* expanded upon in the 1970s with *Foundations of Political Sociology* this summing up in the late 1990s is an effort to extract and evolve the canon of political sociology Starting with Montesquieu Horowitz proceeds through the European experience of Rousseau Tocqueville Hegel Marx Durkheim Sorel and Weber He then takes the field on its tangled migration to America with the Frankfurt School in exile followed by searching chapters on Schumpeter Mills Arendt and Huntington among others The result is a stunning revaluation of the intellectual sources of the present day divisions between statist and socialists welfarists and individualists advocates of dictatorship and of democracy mandated rules and voluntary association hard realists and soft utopians a world without states and a world with a single state Horowitz does not offer the usual evolutionary notion of doctrines but a canon embedded in and embattled with the societies they aim to serve or overthrow in the present as in the past The result is a major recasting of the theory and practice of social science and normative frameworks The final chapter offers Horowitz s own prognosis of what we can expect in the recasting of the Welfare State to include the Welfare Society and its growing nemesis the global economy which threatens to engulf State and Society alike in a return to civilizational concerns This is an essential text for policy makers and social scientists interested in macroscopic changes in the political order
