Hyperthematics Marc M. Anderson, 2019-08-01 Presents a new and unique method for developing principles to be applied in creating and increasing value In this innovative work Marc M Anderson presents an account of value and value creation which both defines value and introduces a method to manipulate value practically Using this new methodology Anderson first explores where value lies in experience both human and otherwise uncovering tendencies in human action and

the natural world that create and destroy value From that analysis he generates practical principles to be applied in creating value in any region or discipline of human experience at any scale including corporate organization and product design economics the sciences the arts urban and architectural design and sustainable development He tests this methodology by focusing on the organization and production of commercial corporations in particular suggesting ways to rethink and transform organization product creation and the contemporary currency system He considers the implications for the many intersections of corporate production with human life from urban planning medicine and food production to pornography weaponry and environmental engagement with corresponding suggestions for transformation toward value Throughout Hyperthematics examines complexity the nature of objects the inevitable future intermingling of science and ethics and assumptions driving the contemporary culture wars

A Passion for Egypt Julie Hankey, 2001-09-27 The biography of Arthur Weigall the British Egyptologist who was involved in the exploration and conservation of the monuments and antiquities of a region stretching from Luxor to the Sudan border At a

time when Egypt was being ransacked by private collectors and the agents of Western museums it was said that without Weigall much more would have been lost altogether most notably the wall paintings in the Tombs of the Nobles The enthusiasm and energy of the man and of the books and articles he wrote played a large part in popularising Egypt and Egyptology and in promoting the then radical view that Egypt's antiquities belonged to the Egyptians When in 1922 Tutankhamun's tomb was discovered by his old colleague Howard Carter Weigall came into open conflict with Carter's patron Lord Carnarvon for his handling of the question of rights in the tomb and for his sale of information from it to the London Times Following Carnarvon's premature death in Egypt it was Weigall's remarks to the press that led to the notorious story of the Curse of the Pharaohs a myth that persists to this day Weigall had many talents he also designed theatre scenery made films and wrote novels But his real legacy derives from his passion for Egypt both ancient and modern a passion that informs the whole of his compelling story *A Biblical-Theological Introduction to the Old Testament* Miles V. Van Pelt, 2016-05-31 The Old Testament is not just a collection of disparate stories each with its own meaning and moral lessons Rather it's one cohesive story tied together by the good news about Israel's coming Messiah promised from the beginning Covering each book in the Old Testament this volume invites readers to teach the Bible from a Reformed covenantal and redemptive historical perspective Featuring contributions from twelve respected evangelical scholars this gospel centered introduction to the Old Testament will help anyone who teaches or studies Scripture to better see the initial outworking of God's plan to redeem the world through Jesus Christ
