The Decline Effect Dean Brooks, 2023-01-23 A crisis is coming for everyone who uses math and science For decades now the classical model of probability the indifference principle and the Gaussian distribution has been breaking down and revealing its limitations in fields from economics to epidemiology Now a new approach has revealed the underlying non classical principle behind all these anomalous laws Pareto s law of elite incomes Zipf s law of word frequencies Lotka s law of scientific publications Kleiber s law of metabolic rates the Clausewitz Dupuy law of combat friction Moore s law of computing costs the Wright Henderson cost law Weibull s law of electronics failures the Flynn Effect in IQ scores Benford s law of digit frequencies Farr s law of epidemics Hubbell s neutral theory of biodiversity Rogers law of

Corporations and Persons David Silver,2025-05-20 We need to reimagine how we think about the firm The dominant view of today sees corporations as relentlessly driven profit maximizers and while many see this as an unfortunate reality others maintain that a sophisticated understanding of law economics and morality reveals that corporations have a duty to act in this fashion Either way the dominant view is out of step with the needs and values of society People and especially members of younger generations are clamoring for more meaningful and ethically engaged work We also have recent memory of a global financial crisis that shook confidence in the free market system and relatedly there has subsequently been a diminution in trust in liberal democratic institutions and values This work in philosophy and applied ethics responds to these events by presenting a persons based theory of the firm It views the for profit corporation as a corporate person standing in moral relationships with human persons rather than as a purely calculating or even psychopathic actor It fills out this theory by exploring the normative dimensions of the firm s relationships with key stakeholders such as customers employees and shareholders and it recognizes a special importance to the relationship between the firm and the citizens of a democratic society and the role this relationship plays in understanding all of the others The resulting way of thinking about corporations is more attuned to their duties within democratic society and more ethically empowering for their personnel **The**
