Social Sciences Studies in Turkey Eyup Saritas, 2018-05-14 OPEC members have been suffering from the dramatic decline in oil prices over the past two years which has seen crude dropping to between 40 and 50 per barrel from more than 100 in 2014 Since OPEC declared its noncutting policy on November 2014 both government budgets and economies of oil exporting countries felt tremendous pressure Saudi Arabia's economy had especially been seriously affected because of the strategy against the USA Faced with these challenges OPEC members finally agreed in a September 2016 meeting in Algeria to cut production in principle Exact quotas were determined in late November After this meeting OPEC oil production began to decrease and the oil prices began to increase In this study we found that there is a relation between OPECs oil production and oil prices We observed the monthly data from November 2014 to May 2017 and we showed that the OPECs influence on oil prices are dwindling OPEC is still important on prices and the announcements have an effect on these prices however this impact is dwindling Recently on May 2017 OPEC and other oil producers are on course to agree to an extension of supply cuts by a further nine months According to Forbes crude oil prices had gone up by more than 9% in November following the initial agreement to reduce output as opposed to just a 2% jump in oil prices when OPEC announced the extension of the cut This not only indicates that the proposed output restrictions are not enough to have a meaningful impact on oil prices but also hints at the fact that OPECs power to influence crude oil prices is waning

Genocide Studies Jeffrey S. Bachman, 2024-10-11 In recent years, the world has been shaken by numerous events that have caused and continue to cause massive human suffering, from the COVID-19 pandemic to intrastate and interstate armed conflicts. Moreover, climate change continues to plow ahead, contributing to growing tensions, population movements, and resource scarcity. Meanwhile, the methods by which groups and group life are threatened and the means by which violence is incited and perpetrated continue to evolve. Such divergent crises, even when they overlap or intersect, confound definition and label. This book seeks not to answer the question "What is genocide?" but rather "What is genocide studies?" When Raphael Lemkin coined the term genocide in 1944, he could not have foreseen what the world would look like today. Now is the time to think about current manifestations of genocide and those likely to emerge in the future.
