**Gene Drives on the Horizon** National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Life Sciences, Committee on Gene Drive Research in Non-Human Organisms: Recommendations for Responsible Conduct, 2016-08-28 Research on gene drive systems is rapidly advancing Many proposed applications of gene drive research aim to solve environmental and public health challenges including the reduction of poverty and the burden of vector borne diseases such as malaria and dengue which disproportionately impact low and middle income countries However due to their intrinsic qualities of rapid spread and irreversibility gene drive systems raise many questions with respect to their safety relative to public and environmental health Because gene drive systems are designed to alter the environments we share in ways that will be hard to anticipate and impossible to completely roll back questions about the ethics surrounding use of this research are complex and will require very careful exploration Gene Drives on the Horizon outlines the state of knowledge relative to the science ethics public engagement and risk assessment as they pertain to research directions of gene drive systems and governance of the research process This report offers principles for responsible practices of gene drive research and related applications for use by investigators their institutions the research funders and regulators

**The Effect of Interactivity in e-Learning Systems** Chris Evans, Luis Palacios, 2014-07-18 This book is based on research conducted to investigate whether interactivity yields a learning effect when used appropriately in e Learning Systems and whether this effect enhances learning There is no doubt interactivity is vital in learning This statement is emphasized to such an extent that it is claimed that students with higher levels of interaction will obtain more positive and higher levels of achievement However little scientific evidence can be found to support this relationship The importance of this book is based on the fact that it provides evidence of the impact of interactivity on e Learning Systems considering the three main agents of an educational activity the learner the teacher and the environment In addition the concept of feedback as a key element in any interactive mechanism for enhancing learning is well documented in several studies throughout this book Three empirical studies are presented that investigated interactivity within the educational triangle These three studies were conducted based on the framework of positivism and action research paradigms The first study entitled Interactive Pedagogical Feedback gathers evidence for how highly interactive pedagogically designed formative feedback enhances students memory and understanding The second study entitled Interactive Audio Feedback examines whether the speed enhancements of oral feedback improve the conditions for the production of the lecturer's feedback and the quality of the feedback delivered to the students The final study Interactive Texting Feedback takes a pedagogical approach to provide formative feedback to a student audience using mobile text messages and determines whether Interactive Texting Feedback enhances the learning experience within the e Learning environment The information contained in the book is useful for academics and institutions to improve their teaching and the efficiency of their learning delivery mechanisms and will guide the design of instructional content It will also be of utility to other researchers and those in roles that require an
