Museum Media Michelle Henning, 2020-11-19 MUSEUM MEDIA Edited by Michelle Henning. Museum Media explores the contemporary uses of diverse media in museum contexts and discusses how technology is reinventing the museum. It considers how technological changes from photography and television through to digital mobile media have given rise to new habits forms of attention and behaviors. It explores how research methods can be used to understand people's relationships with media technologies and display techniques in museum contexts as well as the new opportunities media offer for museums to engage with their visitors. Entries written by leading experts examine the transformation of history and memory by new media the ways in which exhibitions mediate visitor experience how designers and curators can establish new kinds of relationships with visitors the expansion of the museum beyond its walls and its insertion into a wider commercial and corporate landscape. Focusing on formal theoretical and technical aspects of exhibition practice this in depth volume explores questions of temporality attachment to objects atmospheric and immersive exhibition design the reinvention of the exhibition medium and much more.

Contemporary Applications of Actor Network Theory Idongesit Williams, 2020-09-25 This book provides empirically driven discussions and investigations in the relevance of Actor Network Theory (ANT) and its theoretical concepts. As our civilization evolves from a human to a technologically driven society new socio technical network of actors in society industry and government are emerging by the day. These networks of actors collaborate to produce contemporary goods and services handle production processes manage risks develop social and commercial networks develop policies manage complexities and create a new way of life. This book provides unique conceptual tools needed to analyze such processes highlighting the effectiveness of ANT in fostering collaborations between governments organizations and society.

Tarpons Stephen Spotte, 2016-05-16 Stephen Spotte Mote Marine Laboratory Sarasota Florida USA Tarpons arose from an ancient lineage and just two species exist today confined to the tropics and subtropics. *Megalops atlanticus* in the western and eastern Atlantic and *Megalops cyprinoides* distributed widely across the Indo West Pacific. The Atlantic tarpon is considered

king of the saltwater sport fishes and supports a multi billion dollar recreational fishery in the U S alone The Pacific tarpon which is much smaller is less valued by anglers Both have limited commercial value but offer considerable potential for future aquaculture because of their hardiness rapid growth and ease of adaptation to captivity This book is the latest and most thorough text on the biology ecology and fisheries sport and commercial of tarpons The chapters comprise clear intricate discourses on such subjects as early development and metamorphosis population genetics anatomical and physiological features and adaptations migrations reproductive biology and culminate with a concise overview of the world s tarpon fisheries A comprehensive appendix includes Spotte s original translations of important papers published previously by others in Spanish and Portuguese and unavailable until now to English readers Tarpons Biology Ecology Fisheries will be of considerable interest and use to fishery and research biologists marine conservationists aquaculturists and informed anglers
