CHAPTER VIII PLANKING PERHAPS planking presents more difficulties to the amateur than any other part of the construction but there is no mystery about it and once the principle is grasped it should be a comparatively easy matter to cover a frame so that it is both strong and watertight The principal difficulty for the inexperienced is to proportion and run the strakes as the planks are called so that the material is used to good advantage and the seams show fair and sweet from all points of view A planking job may look well when viewed from the side but an end view which foreshortens the planks may show unfair curves reverse curves and other defects I strongly advise the amateur to examine critically the work of professionals when much information will be gained There are many different methods of planking but only four will be considered as they no doubt fully cover all amateur requirements These are 108 carvel ribband carvel clinker and double

planking See Plate 8 Carvel or smooth planking is the most common form and may be used for all types of boats providing the planking is not too thin to hold the caulking % is about the minimum The planks are fitted edge to edge and the seams caulked with cotton or oakum to make them watertight Ribband Carvel also called batten seam is just like carvel planking with the addition of a ribband or batten fitted over the seams on the inside to which the planks are riveted Thin planking may be used and a strong job obtained the same as with clinker planking but it has the advantage of being smooth on the outside and if well done requires no caulking Clinker or lap strake which is principally used for small boats has the edges of the planks lapped like the clapboards *Stitch-and-Glue Boatbuilding* Chris Kulczycki,2005-07-08 In *Stitch and Glue Boatbuilding* one of the leading practitioners and teachers of the craft assembles the definitive how to manual for the most popular method of amateur boatbuilding today Enlivened with tales of boat shop mishaps and designs gone bad that entertain as they instruct this invaluable book includes full plans and assembly instructions for nine boats seven kayaks a sailing skiff and a wherry Step by step photos and drawings make this an ideal guide for visual learners **How to Build and Sail Small Boats - Canoes - Punts and Rafts** Tony Read,2011-06-14 A fascinating collection of articles by various authors first published in 1886 Contains detailed illustrated chapters on making and sailing a variety of boats Contents include Small Boats How to Rig and Sail Them How to Make a Boat How to Build a Catamaran Flat Boating for Boys How to Make a Canvas Canoe Canadian and Birch Bark Canoes Paper and Other Typical Canoes How to Build a Punt Rafts and Catamarans etc
