Stern,1979 The irrigation scene introduction the choice of technology is it worthwhile irrigating Irrigation practice moisture conservation techniques surface irrigation sub soil irrigation overhead irrigation Planning and design climatic factors crops and water physical and chemical characteristics of soil soil and water drainage source development channels and pipelines water lifting      *Small Scale Irrigation* Peter Stern,1988-01-01

*Small Scale Irrigation Manual of Low-Cost Water Technology* Peter H. Stern,1990-02-01      **Water Resources and Agricultural Development in the Tropics** Christopher J. Barrow,2016-07-01 First published in 1988 There are many excellent texts on water supply and irrigation engineering irrigation economics agricultural development and the problems which often plague such efforts Few syntheses of such writings have been made despite a clear need for them from people interested in water resources and agricultural development students of geography economics development studies and agricultural management administrators planners and aid agency staff This book attempts to provide a broad interdisciplinary introduction for such people      **The Arid Frontier** Hendrik J. Bruins,Harvey Lithwick,2012-12-06 The arid frontier has been a challenge for humanity from time immemorial Drylands cover more than one third of the global land surface distributed over Africa Asia Australia America and Southern Europe Disasters may develop as a result of complex interactions between drought desertification and society Therefore proactive planning and interactive management including disaster coping strategies are essential in dealing with arid frontier development This book presents a conceptual framework with case studies in dryland development and management The option of a rational and ethical discourse for development that is beneficial for both the environment and society is emphasized avoiding extreme environmentalism and human destructionism combating both desertification and human livelihood insecurity Such development has to be based on appropriate ethics legislation policy proactive planning and interactive management Excellent scholars address these issues focusing on the principal interactions between people and dryland environments in terms of drought food land water renewable energy and housing Audience This volume will be of great value to all those interested in Dryland Development and Management professionals and policy makers in governmental international and non governmental organizations NGOs as well as researchers lecturers and students in Geography Environmental Management Regional Studies Development Anthropology Hazard and Disaster Management Agriculture and Pastoralism Land and Water Use African Studies and Renewable Energy Resources      **The Last Oasis** Sandra Postel,2014-07-16 For decades now we have wasted and mismanaged the world s water supplies Today 27 countries are short of water a quarter of the world s population has no safe water 46 per cent have no proper sanitation and each year four million children die of water borne diseases As most of the world s major river systems cross several national boundaries the scope disputes and the threat to international security is

becoming more and more real In *The Last Oasis* Sandra Postel examines the economic ecological and political factors affecting fresh water supply She confronts the issues of mismanagement and profligacy and analyses and dangers of confrontation both between nations and between rural and urban users She also emphasises that the technology and know how for effective water husbandry does exist With methods already in use farmers could cut their demand for water by 40 90 per cent and cities by one third without sacrificing economic output or quality of life Investing in water efficiency recycling and conservation help meet rising demands and stave off disaster But the priority is a common recognition of the gravity of the position and with that a widespread push for institutions to manage sustainable use of water **The Literature of**

**Agricultural Engineering** Carl W. Hall,Wallace C. Olsen,1992 The second of a seven volume series *The Literature of the Agricultural Sciences* this book analyzes the trends in published literature of agricultural engineering during the past century with emphasis on the last forty years It uses citation analysis and other bibliometric techniques to identify the most important journals report series and monographs for the developed countries as well as those in the Third World **Wood**

Indigenous Agricultural Revolution Paul Richards,2023-07-26 Originally published in 1985 this book argues forcefully and practically for new relationship between science and the small farmer It advocates scientific research seeking out changes

which are already taking place within the smallholder farming sector and building on local initiatives Drawing on his experience of West Africa the author demonstrates that many of the most successful innovations in food crop production during the 20th century have indigenous roots and that there should therefore be less emphasis on teaching farmers how to farm and more emphasis on how to foster and support local adaptation and inventiveness This book will be of interest to students of agriculture environmental studies and rural development as well as those working with relief and development agencies

**Irrigation Technology Transfer in Support of Food Security** Food and Agriculture Organization of the United Nations,1997-01-01 **Smallholder Irrigation Technology** Melvyn Kay,2001-01-01 This report is a view of irrigation technologies for smallholders in the context of improving rural livelihoods especially in regard to the prospects for sub Saharan Africa The role of traditional technologies is evaluated and modern water distribution technologies such as sprinkler and trickle irrigation are reviewed A broad classification has been made based on climate and the traditional agricultural background of the local people which links technology options to specific places to agricultural regions and to countries

**Wasting the Rain (Routledge Revivals)** William M. Adams Adams,2014-05-01 First published in 1992 this title offers an experienced and constructive evaluation of the ways in which water resources have been developed in Africa Adams argues that the best hope of productive development lies in working and engaging with local people and using local knowledge of the environment effectively Modern large scale developments that have largely been ineffective are examined and emphasis is placed on the importance of using the skills and concerns of those affected such as small farmers to develop ingenious water projects an approach that can be applied worldwide This is an interesting and relevant title which will be of particular value to those with an interest in the developments in water resource conservation over the past two decades
