the 15 sessions for oral presentations and two poster sessions 52 contributions were selected which are representative for
the new developments and trends in the area of small satellites for Earth observation They reflect the potentials of a diversity
of missions and related technologies This may be based on national projects or international co operations single satellites of
constellations pico nano micro or mini satellites developed by companies research institutions or agencies The main focus is
on new missions to monitor our Earth's resources Part I and the environment in which our Earth is embedded Part II Part III
deals with distributed space systems a unique feature of small satellites and in most cases impractical to do with large
satellites Here we concentrate on constellations of satellites with focus on future missions relying on co operating satellites
For all the new developments and projects we need well educated specialists coming from the universities Many universities
included already the development and implementation of small satellites in their curriculum The university satellites chapter
Part IV shows the high quality which is already reached by some of the universities worldwide na , Small Business
