das dissects them using a method inspired by Freudian dream interpretation Sounds scenes smells feelings all are probed for details that might allow him to reconstruct what happened and when and where To avoid conscious or unconscious distortions he deconstructs the stories of others too moving in concentric circles toward cause and effect until their meaning and significance come to light In *Shimmering Details* Volume I N das probes the history of his family from the late nineteenth century to his birth in 1942 and beyond In a work that encompasses World War II and the Hungarian Revolution N das traces the hidden connections between the seemingly random events of a life and assembles them into a memoir like no other

**The Politics of Electoral Systems** Michael Gallagher, Paul Mitchell, 2005-09-15 Electoral systems matter They are a crucial link in the chain connecting the preferences of citizens to the policy choices made by governments They are chosen by political actors and once in existence have political consequences for those actors They are an important object of study for anyone interested in the political process and in this book we subject them to systematic analysis In addition to some comparative chapters the book contains full accounts of the operation of electoral systems in 22 countries France the UK Germany Italy Israel Spain Austria Belgium Denmark Finland The Netherlands Ireland Hungary Russia Australia Canada India the USA Japan New Zealand Chile and South Africa The book provides detailed analyses of the operation of a diverse set of electoral systems in their national context Each chapter explains how the electoral system really works in the given country examining the strategic incentives the system provides to voters candidates and parties All country chapters have a common format and structure Successive sections analyse the institutional context how each electoral system was chosen historically how the current electoral system operates the rules mechanics and ballot structure and the political consequences of the current system the impact on the party system the internal life of parties and the impact on parliament and government formation Each country chapter then contains a final section which focuses on the politicization of electoral institutions In recent years many countries have changed their electoral systems either entirely or in part so there is a strong focus on the processes of electoral reform both historically and prospectively The book concentrates on the real world politics as well as the political science of electoral systems The book will be of interest to those concerned with the practical political business of electoral reform The book contains a wealth of evidence about the performance of various kinds of proportional representation and of non PR systems This will be invaluable for anyone interested in the question What would be the best electoral system for my country

**Cross-Level Inference** Christopher H. Achen, W. Phillips Shively, 1995-05-20 In the last several years new disputes have erupted over the use of group averages from census areas or voting districts to draw inferences about individual social behavior Social scientists policy analysts and historians often have little choice about using this kind of data but statistical analysis of them is fraught with pitfalls The recent debates have led to a new menu of choices for the applied researcher This volume explains why older methods like ecological regression so often fail and it gives the most comprehensive treatment available of the promising new techniques for cross level inference Experts in statistical analysis of aggregate data Christopher H Achen and W Philips Shively contend that cross level inference makes unusually strong demands on substantive knowledge so that no one method such as Goodman s ecological regression will fit all situations Criticizing Goodman s model and some recent attempts to replace it the authors argue for a range of alternate techniques including extensions of cross tabular regression analysis and unobservable variable estimators

*Privileging Industry* Fiona McGillivray, 2018-06-26 Why do some industries win substantial protection from the whims of international trade while others do not Privileging Industry challenges standard approaches to this question in its examination of when governments use trade and industrial policy for political goals Fiona McGillivray shows why aiding an industry can be a politically efficient way for a government to redistribute resources from one industrial sector to another Taking a comparative perspective that stands in contrast with the usual focus on U S trade politics she explores for example how electoral rules party strength and industrial geography affect redistribution politics across countries How do political institutions and the geographical dispersion of industries interact to determine which industries governments privilege What tests can assess how governments distribute assistance across industries Research has focused on the industries that legislators want to protect but just as important is identifying those legislators able to deliver trade assistance Assisting an industry requires both a will and a means Whether an industry is a good vehicle through which to redistribute income depends on its geographic make up and the country s electoral system In turn the electoral system and party strength affect how legislators preferences contribute to policy McGillivray tests these arguments using a tariff based empirical test and nonstandard dependent variables such as the dispersion of stock prices within fourteen different capital markets and government influence in the targeting of plant closures within declining industries

*Insight Turkey 2015 - Fall 2015 (Vol. 17, No. 4)* , Last year was the year of elections in Turkey with two parliamentary elections and months long electoral campaigns that dominated the political agenda of the country The parliamentary elections of June 7 2015 brought an end to the AK Party s 12 year long era of parliamentary majority and single party government in Turkey Nevertheless the endeavors

to form a coalition government could not be concluded successfully and another election appeared on the horizon The country was ruled by an AK Party led interim government and the elections were repeated five months later on November 1 2015 While close in time the two elections were quite distant with regard to the political contexts in which they were carried out and in their respective results The November elections witnessed a comeback for the AK Party which increased its votes by over 9 points with the addition of five million new votes in the ballot box **Enchanted Enclosure** Kenneth Huntress Baldwin,1976 El Alto, Rebel City Sian Lazar,2008-01-04 El Alto Rebel City combines ethnography and political theory to explore the astonishing political power exercised by the indigenous citizens of El Alto Bolivia in the past decade

*Revitalizing Electoral Geography* Jonathan Leib,2016-04-08 Electoral Geography the analysis of spatial patterns of voting is undergoing a renaissance with new methodological advances theoretical shifts and changes in the political landscape Integrating new conceptual approaches with a broad array of case studies from the USA Europe and Asia this volume examines key questions in electoral geography How has electoral geography changed since the 1980s when the last wave of works in this sub discipline appeared In what ways does contemporary scholarship in social theory inform the analysis of elections and their spatial patterns How has electoral geography been reconfigured by social and technological changes and those that shape the voting process itself How can the comparative analysis of elections inform the field In addressing these issues the volume moves electoral geography beyond its traditional empiricist focus on the United States to engage with contemporary theoretical developments and to outline the myriad theoretical conceptual and methodological perspectives and applications that together are ushering in electoral geography s revitalization The result is a broader comparative analysis of how elections reflect and in turn shape social and spatial relations
