Smallpox The Fight To Eradicate A Global Scourge:

Smallpox David A. Koplow, 2003 Looks at the history of the smallpox virus providing an overview of the political biological environmental medical and legal issues surrounding the question of whether or not the virus should be exterminated The End of a Global Pox Bob H. Reinhardt, 2015-06-24 By the mid twentieth century smallpox had vanished from North America and Europe but continued to persist throughout Africa Asia and South America In 1965 the United States joined an international effort to eradicate the disease and after fifteen years of steady progress the effort succeeded Bob H Reinhardt demonstrates that the fight against smallpox drew American liberals into new and complex relationships in the global Cold War as he narrates the history of the only cooperative international effort to successfully eliminate a human disease Unlike other works that have chronicled the fight against smallpox by offering a biography of the disease or employing a triumphalist narrative of a public health victory The End of a Global Pox examines the eradication program as a complex exercise of American power Reinhardt draws on methods from environmental medical and political history to interpret the global eradication effort as an extension of U S technological medical and political power This book demonstrates the far reaching manifestations of American liberalism and Cold War ideology and sheds new light on the history of global public health and development Smallpox S.L. Kotar, J.E. Gessler, 2013-04-19 Scientifically known as Variola major the deadliest form of smallpox has plagued mankind since time immemorial This text chronicles the worldwide effects of the killer disease with particular emphasis on the 19th and 20th centuries including the devastations of the speckled disease during great armed conflicts Specific attention is paid to the development and utilization of Dr Edward Jenner s vaccination chronicling the anti vaccination movement the evolving concept of compulsory vaccination and the global march toward eradication Legal and moral challenges the National Vaccine Institute the treatment of American Indians and African Americans immigrants the often bloody quarantine battles germ warfare superstitions and home remedies are addressed from the historical perspectives of those who lived through and those who died of this scourge The Poet Zheng Zhen (1806-1864) and the Rise of Chinese Modernity Jerry D. Schmidt, 2013-06-20 In The Poet Zheng Zhen 1806 1864 and the Rise of Chinese Modernity J D Schmidt provides the first detailed study in a Western language of one of China s greatest poets and explores the nineteenth century background to Chinese modernity challenging the widely held view that this is largely of Western origin The volume contains a study of Zheng s life and times an examination of his thought and literary theory and four chapters studying his highly original contributions to poetry on the human realm nature verse narrative poetry and the poetry of ideas including his writings on science and technology Over a hundred pages of translations of his verse conclude the work **A Planet of Viruses** Carl Zimmer, 2021-03-29 A captivating primer to the world of viruses that requires zero background in biology a suitable first introduction to this fascinating part of our world The Inquisitive Biologist In 2020 an invisible germ a virus emerged and wholly upended our lives We ve now become familiar with the new virus that gave us

Covid 19 but viruses also cause a vast range of other diseases including one disorder that makes people sprout branch like growths as if they were trees. Viruses have been a part of our lives for so long that we are actually part virus: the human genome contains more DNA from viruses than our own genes. Meanwhile scientists are discovering viruses everywhere they look in the soil in the ocean even in deep caves miles underground. Fully revised and updated with new illustrations and a new chapter about coronaviruses and the spread of Covid 19, this third edition of Carl Zimmer's information packed superbly readable *A Planet of Viruses* Booklist starred review pulls back the veil on this hidden world. It presents the latest research on how viruses hold sway over our lives and our biosphere how viruses helped give rise to the first life forms how viruses are producing new diseases how we can harness viruses for our own ends and how viruses will continue to control our fate as long as life endures. Zimmer is one of the best science writers we have today. Rebecca Skloot New York Times bestselling author of *The Immortal Life of Henrietta Lacks* *Mummies, Cannibals and Vampires* Richard Sugg, 2015-11-06 *Mummies Cannibals and Vampires* charts in vivid detail the largely forgotten history of European corpse medicine which saw kings ladies gentlemen priests and scientists prescribe swallow or wear human blood flesh bone fat brains and skin in an attempt to heal themselves of epilepsy bruising wounds sores plague cancer gout and depression. In this comprehensive and accessible text Richard Sugg shows that far from being a medieval therapy corpse medicine was at its height during the social and scientific revolutions of early modern Britain surviving well into the eighteenth century and amongst the poor lingering stubbornly on into the time of Queen Victoria. Ranging from the execution scaffolds of Germany and Scandinavia through the courts and laboratories of Italy France and Britain to the battlefields of Holland and Ireland and on to the tribal man eating of the Americas *Mummies Cannibals and Vampires* argues that the real cannibals were in fact the Europeans. Picking our way through the bloodstained shadows of this remarkable secret history we encounter medicine cut from bodies living and dead sacks of human fat harvested after a gun battle gloves made of human skin and the first mummy to appear on the London stage. Lit by the uncanny glow of a lamp filled with human blood this second edition includes new material on exo cannibalism skull medicine the blood drinking of Scandinavian executions Victorian corpse stroking and the magical powers of candles made from human fat. In our quest to understand the strange paradox of routine Christian cannibalism we move from the Catholic vampirism of the Eucharist through the routine filth and discomfort of early modern bodies and in to the potent numinous source of corpse medicine's ultimate power the human soul itself. Now accompanied by a companion website with supplementary articles interviews with the author related images summaries of key topics and a glossary the second edition of *Mummies Cannibals and Vampires* is an essential read for anyone interested in the history of medicine early modern history and the darker hidden past of European Christendom *World on Fire* Mark Rowlands, 2021 The philosopher Mark Rowlands takes a novel perspective on the problem of climate change and how to address it. With energy consumption at the core of the issue he claims climate extinction and pestilence as three epoch defining environmental issues.

of our time Rowlands proposes a single solution to all three breaking our collective habit of eating animals Bringing to bear analytic rigor and empirical data Rowlands argues that reversing the industrial farming of animals for our consumption will both significantly reduce energy emissions and allow for free space to aggressively reforest land being used by industrial animal farms to mitigate the effects of climate change **IR** James M. Mekong Medicine Richard W. Carlson, M.D.,2022-08-01 In 1966 Dr Richard Carlson two years out of medical school embarked on a year long tour in Vietnam to treat the many forgotten victims of the war the civilians During medical school he was introduced to the Los Angeles County General Hospital the huge institution that served LA s socially and medically deprived When drafted he applied to work in a Vietnamese civilian hospital His tenure at the LA hospital was the best training for what he would encounter in Vietnam His arrival coincided with a bloody escalation of the conflict But like many Americans he believed South Vietnam desired a democratic future and that the U S was helping to achieve that goal He diligently chronicled his efforts to save lives in the Mekong delta province of Bac Lieu and detailed the stories of the AMA volunteer doctors USAID nurses and corpsmen that he worked with to treat the local citizens many of whom were Viet Cong He gives a glimpse of the emerging understanding of post traumatic stress disorder and his team s development of a pioneering family planning clinic With more than 80 photographs this book relates hi efforts including the competition among civilians for medical services The facilities and equipment were primitive and the doctors efforts were often hampered by folk remedies and superstition

Making Spaces through Infrastructure Marian Burchardt,Dirk Laak,2023-07-04 Infrastructures are fundamental means through which societies create spaces but little is known about the precise ways in which this occurs How have infrastructures animated certain understandings of space How do infrastructures stabilize or undermine the spatial formats in which we live which shape our everyday practices and which regulate access to services and resources And conversely how do spaces frame the ways infrastructural provision is organized How do existing spaces shape infrastructural development and the scope and forms of access to vital services such as transport and water In this volume historians and sociologists draw on a range of fascinating case studies and provide compelling answers to these questions Exploring among others the provision of irrigation water in nineteenth century Los Angeles the invention of airport transit zones and the infrastructural practices of homeless people in Berlin the book demonstrates how the making of spaces through infrastructure is deeply political Intent on revealing uneven geographies of provision and hierarchies of access the contributors highlight how infrastructures are products of global entanglements

Germ Wars Melanie Armstrong,2017-01-17 The United States government has spent billions of dollars to prepare the nation for bioterrorism

despite the extremely rare occurrence of biological attacks in modern American history Germ Wars argues that bioterrorism has emerged as a prominent fear in the modern age arising with the production of new forms of microbial nature and the changing practices of warfare In the last century revolutions in biological science have made visible a vast microscopic world and in this same era we have watched the rise of a global war on terror Germ Wars demonstrates that these movements did not occur separately but are instead deeply entwined new scientific knowledge of microbes makes possible new mechanisms of war Whether to eliminate disease or create weapons the work to harness and control germs and the history of these endeavors provide an important opportunity for investigating how biological natures shape modern life Germ Wars aims to convince students and scholars as well as policymakers and activists that the ways in which bioterrorism has been produced have consequences for how people live in this world of unspecifiable risks

78. St. Cyprian Dunn, Geoffrey D.,2024 This volume contains his *De mortalitate* and *Ad Demetrianum* both dealing with a Christian understanding of pandemic a topic of international interest given the Covid experience of the last few years The former addresses concerns within the Christian community about why they are suffering as though they were being punished equally with non Christians and the second addresses non Christian concerns that Christian non participation in societal religious practice was responsible for the appearance of the pandemic There is an extensive introduction to the two works that situate them within Cyprian s literary output and within the history of pandemic The reader is invited to take the sense of powerlessness that was experienced in the early days of Covid to appreciate afresh how threatened people must have felt in a world without the medical capacity to combat disease

Discursive Perspectives in Therapeutic Practice Andy Lock,Tom Strong,2012-04-05 For an

endeavour that is largely based on conversation it may seem obvious to suggest that psychotherapy is discursive After all therapists and clients primarily use talk or forms of discourse to accomplish therapeutic aims However talk or discourse has usually been seen as secondary to the actual business of therapy a necessary conduit for exchanging information between therapist and client but seldom more Psychotherapy primarily developed by mapping particular experiential domains in ways responsive to human intervention Only recently though has the role that discourse plays been recognized as a focus in itself for analysis and intervention *Discursive Perspectives in Therapeutic Practice* presents an overview of discursive perspectives in therapy along with an account of their conceptual underpinnings The book starts by setting out the case for a discursive and relational approach to therapy by juxtaposing it to the tradition that leads to the diagnostic approach of the DSM V and medical psychiatry It then presents a thorough review of a range of innovative discursive methods each presented by an authority in their respective area The book shows how discursive therapies can help people construct a better sense of their world and move beyond the constraints caused by the cultural preconceptions opinions and values the client has about the world The book makes a unique contribution to the philosophy and psychiatry literature in examining both the philosophical bases of discursive therapy whilst also showing how discursive perspectives can be applied in real therapeutic situations The

book will be of great value and interest to psychotherapists and psychiatrists wishing to understand explore and apply these innovative techniques

The Top Ten Diseases of All Time Stacey Smith?,2023-10-24 Infectious diseases have been with us for millennia and continue to pose a threat from the irritation of flu season to the potential extinction of our species We instinctively fear them and alter our behaviour as a result The reason we bury bodies six feet deep is because that was the depth that stopped plague transmission from the dead in the Middle Ages Many religious practices such as avoiding certain meats were established because of foodborne disease transmission In **The Top Ten Diseases of All Time** Stacey Smith presents the top ten deadliest diseases and their effects on society providing a wealth of information about the trajectory and terrible impact of each disease and humanity's reaction to these diseases throughout the millennia Did you know for example that The medical symbol evolved from the worms wrapped around a stick because that was the only way to remove Guinea worms from the body so having a stick meant you were a doctor Smallpox is the third worst disease ever yet it remains the only successfully eradicated human disease but not for long thanks in part to a successful vaccine in part to photographic recognition cards and in part due to helicopter led forced vaccinations of whole villages in the former Yugoslavia This brings up issues of individual rights versus public good that remain relevant today Four diseases were targeted for eradication in the 20th century the failure to do so led directly to the creation of the environmental movement The inability of priests to explain how to stop the plague in the Middle Ages broke the back of the church as an all powerful and all knowing institution and led to colonialism and slavery **The Top Ten Diseases of All Time** offers a fascinating overview of the deadliest diseases to spread throughout the world including HIV AIDS Spanish Flu Measles The Black Death Smallpox and others

Hidden History of Boston Dina Vargo,2018-06-11 Quirky and little known true stories of one of America's most historic cities Boston may play a big role in American history textbooks but it also has quite a bit of forgotten past For example during the colonial era riotous mobs celebrated their hatred of the pope in an annual celebration called Pope's Night In 1659 Christmas was made illegal a ban by the Puritans that remained in effect for twenty two years William Monroe Trotter published the Boston Guardian an independent African American newspaper and was a beacon of civil rights activism at the turn of the century And in more recent times a centuries long turf war played out on the streets of quiet Chinatown ending in the massacre of five men in a back alley in 1991 Author and historian Dina Vargo shines a light into the cobwebbed corners of Boston's hidden history in this riveting read complete with illustrations
