*Students with Both Gifts and Learning Disabilities* Tina A. Newman, Robert J. Sternberg, 2012-12-06 We were motivated to

edit this book when we began to hear stories of exceptional students who were struggling with reading writing or math but who could solve seemingly any problem with computers or build the most intricate structures with Legos or could draw beautiful pictures or could tell the most creative stories but ended up in tears when asked to write it out How is it possible to have so much talent in some areas and yet to appear to have a disability in another What resources are available for these students How can we ensure that these students abilities are nurtured and developed Our goal in this book is to provide ideas and possibly even tentative answers for educators and to stimulate more questions to be answered by researchers We have ourselves been addressing related questions for some time Our group at the PACE Center at Yale has explored the development of abilities competencies and expertise that allow people to be successful in life Through this work we have collaborated with school districts and other educators and researchers across the country to expand the notion of what is traditionally thought of as intelligence We use the concept of successful intelligence to allow for the possibility that the skills traditionally taught in school are not the only ones and often not even the most important ones that allow people to be successful in the world

**Genius Denied** Jan Davidson, Bob Davidson, Laura Vanderkam, 2007-11-01 With all the talk of failing schools these days we forget that schools can fail their brightest students too We pledge to leave no child behind but in American schools today thousands of gifted and talented students fall short of their potential In *Genius Denied* Jan and Bob Davidson describe the quiet crisis in education gifted students spending their days in classrooms learning little beyond how to cope with boredom as they relearn material they've already mastered years before This lack of challenge leads to frustration underachievement and even failure Some gifted students become severely depressed At a time when our country needs a deep intellectual talent pool the squandering of these bright young minds is a national tragedy There are hundreds of thousands of highly gifted children in the U S and millions more whose intelligence is above average yet few receive the education they deserve Many school districts have no gifted programs or offer only token enrichment classes Education of the gifted is in this sorry state say the Davidsons because of indifference lack of funding and the pernicious notion that education should have a leveling effect a one size fits all concept that deliberately ignores the needs of the gifted But all children are entitled to an appropriate education insist the authors those left behind as well as those who want to surge ahead The Davidsons show parents and educators how to reach and challenge gifted students They offer practical advice based on their experience as founders of a nonprofit organization that assists gifted children They show parents how to become their children's advocates how to win support for gifted students within the local schools and when and how to go outside the school system They discuss everything from acceleration skipping a grade to homeschooling and finding mentors for children They tell stories of real parents and students who overcame poor schooling environments to discover the joy of learning *Genius Denied* is an inspiring book that provides a beacon of hope for children at risk of losing their valuable gift of intellectual potential

**Neurodiversity Studies** Hanna Rosqvist, Nick Chown, Anna Stenning, 2020-06-02 Building on work
