SMART

BUSINESS ASSETS

TOOLS

Thomas M. Koulopoulos

Author of Corporate Instinct

Sándor Gyula Nagy, Tamás Stukovszky

Smart Companies, Smart Tools Thomas M. Koulopoulos, 1997 Smart Companies Smart Tools is about the inextricable connections between business process and business assets This concise user friendly guide provides key insights into implementing new processes and strategically using workflow to provide faster delivery of products and services while improving quality minimizing errors and reducing costs Identifying, Measuring, and Valuing Knowledge-Based Intangible Assets: New Perspectives Vallejo-Alonso, Belen, Rodriguez-Castellanos, Arturo, Arregui-Ayastuy, Gerardo, 2010-10-31 The main scope of the book is to highlight the importance of intangible resources in business management evidenced in their measurement and financial valuation and the need for a strategic analysis that enables them to be identified and then assessed Provided by publisher Transforming the Organization Howard W. Oden, 1999-11-30 The rapidly increasing rate of world change demands not just incremental change that organizations have used in the past but fast radical alterations of their strategy culture structure and processes Nothing less than transformation will do says Dr Oden a complex continuing effort that may be closer to revolution than evolution Oden lays it out in his customarily clear programmatic way He covers actions that must precede the initiation of a transformation guidance on how to perform the technical social and behavioral tasks and the actions required to wrap up and integrate everything into a complete workably transformed organization His book provides a clear goal for the transformation an excellent description of transformational leadership and a simple powerful model of the process The result is essential reading for upper management in private and public sector organizations and for their colleagues in the academic community Part I covers the preparatory actions that organizations should take before initiating a transformation without which the effort is doomed to failure says Dr Oden In Part II he covers the technical or engineering aspects of the transformation First he develops a process map of the organization as the basis for process improvement then he diagnoses the existing and future organization to determine how processes should be improved In Part III he looks at the various organizational change methods that are available conducts a broad design of the total organization and then designs the human resource support processes for the transformed organization Finally in Part IV Dr Oden shows how to incorporate the redesigned processes into the existing system the most difficult part of the transformation and ends by showing how better integration can be achieved to provide better overall transformational results

<u>Learning Organizations</u> Marcus Goncalves,2012-09-01 In a world facing economic recession more and more professionals teams organizations and inter organizational networks are facing the need to restructure and renew themselves with the primary purpose of profitably to add even higher value to their bottom line Knowledge management has become a key strategic asset for the twenty first century economy and for every organization that values knowledge it must invest in developing the best strategy for identifying developing and applying the knowledge assets it needs to succeed it must strive to become a learning organization This book demonstrates how the effective capture dissemination and management of

knowledge throughout an organization can make it more competitive In the book the author discusses the importance of transforming traditional organizations into learning organizations entities that foster a culture of continuous learning so that external change in all its facets can be recognized when it happens and internal change can be effected and managed when necessary This book includes cases and lessons from leading world organizations that invested in knowledge management in order to remain competitive and it offers strategies and guidance to organizational leaders who endeavor to deliver heightened value to all their stakeholders while eliminating the learning disabilities that threaten corporate productivity and success To remain competitive every organization must invest in creating and implementing the best knowledge networks processes methods tools and technologies This will enable them to learn create new knowledge and apply the best knowledge much faster Creating the Discipline of Knowledge Management Michael Stankosky, 2005 Publisher Description The Smart Estate Jason Challender, Akponanabofa Henry Oti, 2024-02-29 The Smart Estate Bring your estate management methods into the future with this accessible guide Building information modeling or BIM is a catch all term for a wide array of tools and processes for creating digital representations of buildings or building components These tools have been widely embraced for use in the construction phase of projects but their potential has only begun to be realized in facility management and maintenance even though these account for 85% of costs in the life cycle of a building Organizations controlling diverse estates with multiple buildings of varying ages stand to benefit enormously from a BIM informed approach to estate management The Smart Estate outlines such an approach and its potential to improve facility and estate management Emphasizing practical applications it moves beyond the project delivery stage to focus on the much longer and costlier period of building operation and maintenance The result is a thorough and accessible guide to generating collaborative BIM informed methods The Smart Estate readers will also find Case studies and real world scenarios illustrating best practices Detailed discussion particularly suited to the needs of large scale or public sector organizations Detailed step by step guide to developing a BIM informed approach to a given asset portfolio The Smart Estate is ideal for professionals in construction management and facilities management as well as for advanced students and professionals in all construction related disciplines Building Smart and Sustainable Businesses With Transformative Technologies Nozari, Hamed, 2023-12-01 The digital revolution has brought about a significant shift in the business landscape making it crucial for organizations to adapt and leverage transformative technologies However many businesses struggle to effectively harness the potential of these technologies hindering their success in the era of digital transformation Moreover the pressing need for sustainability adds another layer of complexity to this challenge requiring businesses to develop innovative models that address both digital transformation and sustainability Building Smart and Sustainable Businesses With Transformative Technologies by Hamed Nozari offers a comprehensive solution to this pressing problem With expertise in business management Nozari provides invaluable insights for academic scholars students and professionals on integrating digital
