Applied Olfactory Cognition Gesualdo M Zucco, Benoist Schaal, Mats Olsson, Ilona Croy, 2014-12-02 Foreword by Richard J Stevenson Macquarie University Australia It was long thought that the human nose might be able to discriminate somewhere in the order of 10 000 different odourants The recent finding that the human nose can discriminate something like a trillion different smells serves as yet another reminder that we have again underestimated the capacity of our sense of smell Bushdid Magnasco Vosshall Keller 2014 This volume serves as a further corrective for anyone who should hold the view that olfaction is unimportant in human affairs The papers presented in this ebook carefully collated and overseen by Aldo Zucco Benoist Schaal Mats Olsson and Ilona Croy showcase a large number of quite different reasons for studying the applied side of olfaction and indeed human olfaction in general The 23 contributions presented here cover a broad range of topics which illustrate contemporary interests in our field Although with a strong applied focus a noteworthy feature of this ebook is the richness of the theoretical perspectives that are developed These range from considerations of olfactory perception memory expertise and priming right the way through to receptor genetics These contributions from many leading experts in the field will surely shape much of the applied work linking olfaction to disease which is a further focus of this ebook In respect to health and disease the chapters on aging pregnancy depression alcohol dependency and environmental odours present overviews and rich new data on many contemporary

problems to which the study of olfaction is now contributing. A particularly notable aspect of olfactory experience is the affective impact that odours can have on people and their lives. The ebook covers some particularly intriguing aspects of work in this area with empirical studies investigating dissociations between wanting and liking, stress reduction in the elderly, mother-infant bonding and the emotions that different odourants can evoke. This affective line of work is nicely complemented by empirical studies on expertise, the effect of odours on visual attention and the relationship between particular personality traits and interest in olfaction. The gradual appropriation of methods from cognitive neuroscience into olfaction is also nicely represented in this ebook with at least three of the chapters reporting data using neuroimaging including a particularly intriguing study looking at recognition of odours in mixtures. Finally, the close links between olfactory perception and sensory evaluation are also reflected in a chapter on wine. I hope that readers of this ebook will be struck as I have been in reading its various chapters, how much olfaction affects our lives and how the study of this sense can enrich it.

Uncle John is your #1 source when it comes to throne room reading entertainment. This book celebrates the very best articles from the BRI's first ten years plus 150 all new pages. As always, the contents are divided by length: short articles for the reader on the go, medium articles if you have a few minutes to spare, and the extended sitting section for those truly leg-numbing experiences. Read about: The origin of Twinkies, Who invented the Hula Hoop, The untold history of the Three Stooges, Space toilets where no man has gone before, 1876 the year they stole the presidency, The FBI's Ten Most Wanted list, How to start your own country, Celebrity imposters, And much, much more. *The Foul and the Fragrant* Alain Corbin, 1986. In a book whose insight and originality have already had a dazzling impact in France, Alain Corbin has put the sense of smell on the historical map. He conjures up the dominion that the combined forces of smells from the seductress's civet to the ubiquitous excremental odors of city cesspools exercised over the lives and deaths of the French in the eighteenth and nineteenth centuries. *The Oxford Handbook of Evolution and the Emotions* Laith Al-Shawaf, Todd K. Shackelford, 2024. In this Handbook, Laith Al-Shawaf and Todd K. Shackelford have gathered a group of leading scholars in the field to present a centralized resource for researchers and students wishing to understand emotions from an evolutionary perspective. Experts from a number of different disciplines including psychology, biology, anthropology, psychiatry, and others tackle a variety of how proximate and why ultimate questions about the function of emotions in humans and nonhuman animals, how emotions work, and their place in human life. Comprehensive and integrative in nature, this Handbook is an essential resource for students and scholars from a diversity of fields wishing to build upon their theoretical and empirical understanding of the emotions.
