Books In Print 2004-2005 Ed Bowker Staff, Staff Bowker, Ed, 2004 **The British National Bibliography** Arthur James Wells, 1996 **The Australian Mathematics Teacher**, 1989 The Sociology of Mathematics Education Paul Dowling, 2002-11-01 Until the 1960s maths was studied as an academic subject in a desire to have more mathematicians The current trend however has moved away from viewing maths as a purely intellectual endeavour and towards developing a more mathematically competent workforce and citizenry This trend has seen a large increase in the number of maths schemes being produced by the major educational publishers which attempt to make maths easier and more approachable by using language instead of symbols So why do so many children still fail at maths The author contends that to understand this teachers need to analyze and evaluate the maths textbooks they are currently using The author shows the reader how to systematically analyze and evaluate these textbooks This interrogation of classroom resources should have important implications for teaching strategies and for textbook design and use *National Union Catalog*, 1978 Big Data Approach to Firm Level Innovation in Manufacturing Seyed Mehrshad Parvin Hosseini, Aydin Azizi, 2020-08-03 This book discusses utilizing Big Data and Machine Learning approaches in investigating five aspects of firm level innovation in manufacturing 1 factors that determine the decision to innovate 2 the extent of innovation 3 characteristics of an innovating firm 4 types of innovation undertaken and 5 the factors that drive and enable different types of innovation A conceptual model and a cost benefit framework were developed to explain a firm's decision to innovate To empirically demonstrate these aspects Big data and machine learning approaches were introduced in the form of a case study The result of Big data analysis as an inferior method to analyse innovation data was also compared with the results of conventional statistical methods The implications of the findings of the study for increasing the pace of innovation are also discussed **Resources in Education**, 1999-04

The Cumulative Book Index, 1989 A world list of books in the English language *Assessing Children's Mathematical Knowledge* Cooper, Barry, Dunne, Mairead, 1999-12-01 this work is highly relevant to the proliferation of accountability measures worldwide James Scheurich and Douglas Foley In many countries the lives of teachers and children are increasingly dominated by programmes of national testing of mathematics and other subjects In England the majority of the items in such tests have set mathematical tasks in every day situations such as shopping This requires children to make decisions about whether to use or not their own every day knowledge and experience in their problem solving Some children are likely to have a better feel for this game than others Assessing Children's Mathematical Knowledge draws on the analysis of national curriculum test data from more than 600 children of 10 11 and 13 14 years of age as well as in depth interviews with 250 of these as they attempt to solve test problems in order to explore the nature of the difficulties children experience with realistic items The book shows by comparing test and interview data that many children as a consequence of their confusion over the requirements of realistic test items fail in tests to demonstrate mathematical knowledge and

understanding that they actually possess The book also explores whether this problem of invalid measurement is equally spread across children from different social backgrounds and across the sexes The book will be of interest to academics and teachers studying for advanced degrees in mathematics education sociology of education and educational assessment
