The Commentaries of Living Immortals Martin K. Ettington, This is a book about living immortals in their own words People who are hundreds if not thousands of years old and living in our world today Their commentaries come from a discussion board I have been using for a couple of years to market my earlier book Physical Immortality A History and How to Guide There are over twelve distinct immortal personalities who posted on this board and they all have different perspectives on their lives as immortals One of the main characters on the site said this about the immortals I have met over 170 other immortals dating from 20 000 years old to 110 years old from around Earth Gods are in another league I have met 15 Gods Goddesses most are norce celtic Gods There is at least 2000 of us out of your 7 billion humans doing the exact same as me ie jobs names some still hide in mountans and forests Do I believe all of this I do have some skepticism but even if it s not true it is a great story If true it is one of the greatest revelations of all time

Embodying Gender and Age in Speculative Fiction Derek J. Thiess, 2015-10-14 Following scholarship on gender in science fiction this book explores the limits of considering age as a social construction positing that an acknowledgement of aged bodies necessarily changes the way we read both age and science fiction The volume employs contemporary clinical psychology the biopsychosocial model to demonstrate that age is an important and neglected topic relevant to the study of speculative fiction While gender offers a vocabulary the biopsychosocial approach provides a method to consider age and gender as an embodied synthesis of physicality psychology and social environment This respected model of clinical psychology allows a unique and innovative lens through which to read age and the body in literature Thiess offers readings of established sf classics including Octavia Butler's Parable series Orson Scott Card's Ender's Game and cyberpunk authors such as Bruce Sterling Pat Cadigan and Neal Stephenson also exploring more mainstream speculative works including Stephanie Meyer's Twilight series and Joss Whedon's Firefly Serenity Visiting topics such as care work sexuality sport and the military in these works the book demonstrates that acknowledging a more fully embodied age is not only necessary for the individual subject but will also enrich our understanding of other social categories including gender and race Taking a constructive rather than adversarial stance this book does not merely question how much one can ethically and responsibly bend age but suggests there is a great deal to learn when one explores those limits
