Soul Of Nature Visions Of A Living Earth:

The Soul of Nature Michael Tobias, Georgianne Cowan, 1996 This collection of vivid and eloquent testimonies by environmentalists eco theologians and native peoples illustrates a variety of responses to the same universal question Where are we as a species heading on this planet Contributors include Rick Bass Wendell Berry Annie Dillard Gretel Ehrlich Barry Lopez Peter Mattheisen Thomas Moore Terry Tempest Williams and others The Nature of Order, Book Three: A Vision of A Living World Christopher Alexander, 2020-03-30 Christopher Alexander's series of ground breaking books including A Pattern Language and The Timeless Way of Building have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns Now in The Nature of Order Alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities From a practical point of view A Vision of a Living World is the most compelling of the four books Hundreds of photographs and plans of new buildings that have living structure and the processes which gave them life demonstrate for the first time what the concept of living structure can mean in buildings of our time and of the future The really good building The really good space Places that reach an archetypal level of human experience reaching across centuries across continents across cultures across technology across building materials and climates They connect us to ourselves They connect us to our feelings What is more as we study them we realize that they all share a similar geometry How are they made The practical task of making beauty is the principal subject of this volume Hundreds of examples of buildings and places are shown New forms for large buildings public spaces communities neighborhoods lead to discussions about equally important small scale of detail and ornament and colour Many of the examples are built by Alexander and his colleagues other buildings explored take us around the world and through time With these examples lay people architects builders artists and students are able to make this new framework real for themselves understand how it works and understand its significance The book is a feast for the eyes and mind and heart Places created by living process Book 2 have living structure Book 1 and they connect us to our essence as people Book 4 The seven hundred pictures of Alexander's buildings and works of art shown in this book demonstrate in detail what he means Taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart A step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united The Nature of Order constitutes the backbone of Building Beauty Ecologic Design Construction Process an initiative aimed at radically reforming architecture education with the emphasis of making as a way to access a transformative vision of the world The 15 fundamental properties of life guide our work and have given us much more than a set of solutions The Nature of Order has given us the

framework in which we can search and build up our own solutions In order to be authentically sustainable buildings and places have to be cared for and loved over generations Beautiful buildings and places are more likely to be loved and they become more beautiful and loved through the attention given to them over time Beauty is therefore not a luxury or an option it includes and transcends technological innovation and is a necessary requirement for a truly sustainable culture **The Soul of Nature** Michael Tobias,Georgianne Cowan,1994 Thirty two essays written by contributors representing a variety of viewpoints that confront the problems of ecological and environmental degradation and offer a variety of solutions

Restoring the Soul of the World David Fideler,2014-11-20 Humanity s creative role within the living pattern of nature Explores important scientific discoveries that reveal the self organizing intelligence at the heart of nature Examines the idea of a living cosmos from its roots in the earliest cultures to its eclipse during the Scientific Revolution to its return today Reveals ways to reengage our creative partnership with nature and collaborate with nature s intelligence For millennia the world was seen as a creative interconnected web of life constantly growing developing and restoring itself But with the arrival of the Scientific Revolution in the 16th and 17th centuries the world was viewed as a lifeless clock like mechanism bound by the laws of classical physics Intelligence was a trait ascribed solely to human beings and thus humanity was viewed as superior to and separate from nature Today new scientific discoveries are reviving the ancient philosophy of a living interconnected cosmos and humanity is learning from and collaborating with nature s intelligence in new life enhancing ways from ecological design to biomimicry Drawing upon the most important scientific discoveries of recent times David Fideler explores the self organizing intelligence at the heart of nature and humanity s place in the cosmic pattern He examines the ancient vision of the living cosmos from its roots in the world soul of the Greeks and the alchemical tradition to its eclipse during the Scientific Revolution to its return today He explains how the mechanistic worldview led to humanity s profound sense of alienation for if the universe only functioned as a machine there was no longer any room for genuine creativity or spontaneity He shows how this isn t the case and how even at the molecular level natural systems engage in self organization self preservation and creative problem solving mirroring the ancient idea of a creative intelligence that exists deep within the heart of nature Revealing new connections between science religion and culture Fideler explores how to reengage our creative partnership with nature and new ways to collaborate with nature s intelligence Encyclopedia of Religion and Nature Bron Taylor,Jeffrey Kaplan,2005-01-01 No Marketing Blurb **Super, Natural Christians** Sallie McFague, A former dean at Vanderbilt University s Divinity School Sallie McFague calls Christians down to earth In a readable and available style alive with concrete imagery and autobiographical material McFague crafts a Christian spirituality centered on nature as the focus and locus of our encounter with the divine She helps us see all life as created in the image of God

cosmologies and sacred sciences of the great traditions Each tradition Nasr shows has a wealth of knowledge and experience concerning the order of nature The resuscitation of this knowledge he argues would allow religions all over the globe to enrich each other and cooperate to heal the wounds inflicted upon the Earth Voices of Nature to her Foster-child, the Soul of Man: a series of analogies between the natural and the spiritual world.
