childhood diseases like diphtheria, tetanus and pertussis has made a major contribution to the improvement of public health. Understanding the biology of causative agents and the pathogenesis is an essential step in achieving control and elimination of disease. Today pediatric infectious diseases research is closely interconnected with other disciplines. This volume addresses vaccination, historical, epidemiological and sociocultural issues as well as clinical and molecular biological aspects of pediatric infectious diseases. New insights into the pathogenesis of infection are presented and an update on diagnostics, prevention and treatment of pediatric bacterial, viral, fungal and parasitic diseases is provided. The role of emerging new pathogens is also pointed out. Finally, the future perspectives of pediatric infectious diseases are highlighted. Therefore, this book aims at an interdisciplinary audience of clinicians and non-clinicians, pediatricians, infectious disease researchers, virologists, microbiologists as well as public health scientists and politicians. We would like to sincerely thank the staff of Birkhäuser publishers and notably Dr. Beatrice Menz for editing this volume of the Advances in Infectious Diseases series. Most of all, we would like to thank all our colleagues who are international experts and scientists in their respective field and who generously shared their knowledge in the broad interdisciplinary area of pediatric infectious diseases with us.

Celebrating Life Customs around the World Victoria R. Williams, 2016-11-21. This book documents hundreds of customs and traditions practiced in countries outside of the United States, showcasing the diversity of birth, coming of age and death celebrations worldwide. From the beginning of our lives to the end, all of humanity celebrates life's milestones through traditions and unique customs. In the United States, we have specific events like baby showers, rites of passage such as Bat and Bar Mitzvahs and sweet 16 birthday parties, and sober end-of-life traditions like obituaries and funeral services that honor those who have died. But what kinds of customs and traditions are practiced in other countries? How do people in other cultures welcome babies, prepare to enter into adulthood and commemorate the end of the lives of loved ones? This three-volume encyclopedia covers more than 300 birth, life and death customs, with the book's content organized chronologically by life stage. Volume 1 focuses on birth and childhood customs; Volume 2 documents adolescent and early adulthood customs; and Volume 3 looks at aging and death customs. The entries in the first volume examine pre-birth traditions such as baby showers and other gift-giving events and post-birth customs such as naming ceremonies, child-rearing practices and traditions performed to ward off evil or promote good health. The second volume contains information about rites of passage as children become adults, including indigenous initiations, marriage customs and religious ceremonies. The final volume concludes with coverage on customs associated with aging and death, such as retirement celebrations, elaborate funeral processions and the creation of fantasy coffins. The set features beautiful color inserts that illustrate examples of celebrations and ceremonies and includes an appendix of excerpts from primary documents that include legislation on government-accepted names, wedding vows and maternity/paternity leave regulations.

The State of the World's Children 2006 UNICEF, 2005. The 2006 edition of UNICEF's annual report focuses on the millions of children who are most in need of access to essential education, health and

protection services but who are also the hardest to reach and often overlooked by current development programmes These include children living in the poorest countries and most deprived communities within countries children who face discrimination on the basis of gender ethnicity or disability children caught up in armed conflicts or affected by HIV AIDS children who lack a formal identity and who suffer from abuse and exploitation The report examines the factors which result in their exclusion from current child development programmes and services and highlights the policy options and actions required to address these challenges in order to ensure all children benefit from the progress being made to achieve the Millennium Development Goals Topics discussed include income disparities and child survival the marginalisation of Roma communities and their children disability issues children and HIV AIDS children living on the streets early marriages child labour child protection and child rights The State of the World's Children 2011 ,2011-02 The State of the World's Children 2011 Adolescence An Age of Opportunity examines the global state of adolescents outlines the challenges they face in health education protection and participation and explores the risks and vulnerabilities of this pivotal stage The report highlights the singular opportunities that adolescence offers both for adolescents themselves and for the societies they live in The accumulated evidence demonstrates that investing in adolescents second decade is our best hope of breaking the intergenerational cycle of poverty and inequity and of laying the foundation for a more peaceful tolerant and equitable world
