Staying Alive After 35 The Bare Essentials:

Our Babies, Ourselves Meredith Small, 2011-09-07 A thought provoking combination of practical parenting information and scientific analysis *Our Babies Ourselves* is the first book to explore why we raise our children the way we do and to suggest that we reconsider our culture's traditional views on parenting New parents are faced with innumerable decisions to make regarding the best way to care for their baby and naturally they often turn for guidance to friends and family members who have already raised children But as scientists are discovering much of the trusted advice that has been passed down through generations needs to be carefully reexamined In this ground breaking book anthropologist Meredith Small reveals her remarkable findings in the new science of ethnopediatrics Professor Small joins pediatricians child development researchers and anthropologists across the country who are studying to what extent the way we parent our infants is based on biological needs and to what extent it is based on culture and how sometimes what is culturally dictated may not be what's best for babies Should an infant be encouraged to sleep alone Is breast feeding better than bottle feeding or is that just a myth of the nineties How much time should pass before a mother picks up her crying infant And how important is it really to a baby's development to talk and sing to him or her These are but a few of the important questions Small addresses and the answers not only are surprising but may even change the way we raise our children [The Return of Ethics and Spirituality in Global Development](#)

Mahmoud Masa'eli, Rico Sneller, 2020-06-02 The theory of modernization basically reduces the meaning of development to economic growth often measured by Growth Domestic Product of the country or overall purchase power parity of the nation This approach ignores the variety of perspectives on development hence excludes the role of culture identity and spirituality as social determinants of good development More importantly modernization theory which informs the mainstream view on development ignores the structural causes of underdevelopment including colonial heritage or the current unbridled capitalism in many societies Against reductionist views of development fundamental questions are raised about the theory and programming of development From what perspective is the conception of development perceived Who should decide and depict development goals What kind of development could result in desirable changes Is it morally desirable to dictate an exclusively Western understanding of development to others Is there any link between development and a right of nations to self determination Who is morally accountable for global inequality or bad development The novelty of this book lies in its multidisciplinary approach in exploring the role of ethics and spirituality as the curing alternates for the gamut of ills which originate in global inequality All authors are academics based in a variety of countries and specialize in questions concerning development and spirituality **U.S. Air Force Survival Handbook** United States Air Force, 2017-01-17 Ideal for fans of History Alive United States books Survivalist handbook with pieces of Air Force history Essential piece of any aircraft survival kit This Air Force handbook was written to help pilots who find themselves in hostile environments While it is designed for use in formal Air Force training it is also useful for the general reader seeking a
